Child prodigy and brilliant MIT mathematician, Norbert Wiener founded the revolutionary science of cybernetics and ignited the information-age explosion of computers, automation, and global telecommunications. His best-selling book, *Cybernetics*, catapulted him into the public spotlight, as did his chilling visions of the future and his ardent social activism. Based on a wealth of primary sources and exclusive access to Wiener's closest family members, friends, and colleagues, *Dark Hero of the Information Age* reveals this eccentric genius as an extraordinarily complex figure. No one interested in the intersection of technology and culture will want to miss this epic story of one of the twentieth century's most brilliant and colorful figures.

Surveys the historical development of the computer, paying special attention to events since the World War II creation of ENIAC

Interpellations, Questions and Replies of the National Assembly

View our feature on Charles Stross' The Fuller Memorandum. National bestselling author Charles Stross brings back Bob Howard-"a British super spy with a long-term girlfriend, no fashion sense, and an aversion to martinis" (San Francisco Chronicle) Bob Howard is taking a much needed break from the field to catch up on his filing in The Laundry's archives when a top secret dossier known as The Fuller Memorandum vanishes-along with his boss, who the agency's executives believe stole the file. Determined to discover exactly what the memorandum contained, Bob runs afoul of Russian agents, ancient demons, and the apostles of a hideous faith, who have plans to raise a very unpleasant undead entity known as the Eater of Souls
