## **Twenty Fathoms Down**

Rantoul and the former Chanute Air Force Base are inseparably intertwined as primary players in a single historical narrative. Rantoul was first founded as an agriculturally based community in 1848 near an area known as Mink Grove. The settlement boomed with the coming of the Illinois Central Railroad in 1854; a railroad championed by the town's namesake, Robert Rantoul Jr. Disaster followed in 1899 and again in 1901 with devastating fires. Then, in 1917, a U.S. Army flying field was built on the outskirts of Rantoul. Named after the aviation pioneer Octave Chanute, Chanute Field, later Chanute Air Force Base, became a premier technical training facility. A mutually beneficial relationship quickly developed between these civilian and military establishments that would last for over 75 years. Chanute Air Force Base closed in 1993, ushering in yet another new era for the village of Rantoul.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling

auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

Taste this rich legacy, the oldest in the United States, in Donna Blake Birchell's account of the turmoil and triumph that shaped today's burgeoning industry. Despite greedy

Spanish monarchs, prim teetotalers and the one-hundred-year flood's gift of root rot and alkaline deposits, New Mexico winemakers continue to harvest the fruits of sun-soaked volcanic soils and clear skies, blending their family stories with the vines and traditions of the Old World. ### **Presentation S.O.S.**

International media assistance is a small but important form of international democracy-promotion aid. Media assistance boomed after the 1989 transitions in Central Europe, but now flows to virtually all regions of the world. Today the media assistance industry is focused on the problem of sustainability: How are free and independent public affairs media supposed to maintain their editorial mission while facing hostile political systems or the demands of the consumer marketplace? Many media in developing countries have been or are grant-dependent. When grants are exhausted or withdrawn, media that were funded to further democratic consolidation typically wither and die. Some become mere grant chasers. Others abandon public service to the demands of market competition, or political patronage. As a result, governmental and non-governmental grant makers now emphasize the need for sustainability in considering grants in the media sector. Many grant recipients have grown frustrated, sometimes bitter, and have sought to take a much more active role in the way assistance programs are put together. Just how is sustainability to be achieved while also ensuring a public-service editorial mission? Exporting Press Freedom examines the history and practice of media

assistance, and argues that the dilemma of media independence and sustainability is best understood as an economic problem rather than one of poor editorial standards or lack of will. It includes profiles of news and public affairs media in developing and democratizing countries, and also of two non-governmental organizations that have pioneered the use of low-interest loans in media assistance. These profiles exemplify strategic and entrepreneurial approaches to developing and supporting public service media. Such approaches may be of use not only in the developing world, but in the consolidated Western democracies as well, where concern has grown about poor journalistic performance and its consequences for democratic governance.
