Travels Through the French Riviera

A beautifully written, timeless tale by Cao Wenxuan, best-selling Chinese author and 2016 recipient of the prestigious Hans Christian Andersen Award. Sunflower is an only child, and when her father is sent to the rural Cadre School, she has to go with him. Her father is an established artist from the city and finds his new life of physical labor and endless meetings exhausting. Sunflower is lonely and longs to play with the local children in the village across the river. When her father tragically drowns, Sunflower is taken in by the poorest family in the village, a family with a son named Bronze. Until Sunflower joins his family, Bronze was an only child, too, and hasn't spoken a word since he was traumatized by a terrible fire. Bronze and Sunflower become inseparable, understanding each other as only the closest friends

100 Plants to Feed the Bees

The Low-Tech, No-Grow-Lights Approach to Abundant Harvest Year-Round Indoor Salad Gardening offers good news: with nothing more than a cupboard and a windowsill, you can grow all the fresh salad greens you need for the winter months (or throughout the entire year) with no lights, no pumps, and no greenhouse. Longtime gardener Peter Burke was tired of the growing season ending with the first frost, but due to his busy work schedule and family life, didn't have the time or interest in high-input grow lights or greenhouses. Most techniques for growing what are commonly referred to as "microgreens" left him feeling overwhelmed and uninterested. There had to be a simpler way to grow greens for his family indoors. After some research and diligent experimenting, Burke discovered he was right—there was a way! And it was even easier than he ever could have hoped, and the greens more nutrient packed. He didn't even need a south-facing window, and he already had most of the needed supplies just sitting in his pantry. The result: healthy, homegrown salad greens at a fraction of the cost of buying them at the market. The secret: start them in the dark. Growing

“Soil Sprouts”—Burke’s own descriptive term for sprouted seeds grown in soil as opposed to in jars—employs a method that encourages a long stem without expansive roots, and provides delicious salad greens in just seven to ten days, way earlier than any other method, with much less work. Indeed, of all the ways to grow immature greens, this is the easiest and most productive technique. Forget about grow lights and heat lamps! This book is a revolutionary and inviting guide for both first-time and experienced gardeners in rural or urban environments. All you need is a windowsill or two. In fact, Burke has grown up to six pounds of greens per day using just the windowsills in his kitchen! Year-Round Indoor Salad Gardening offers detailed step-by-step instructions to mastering this method (hint: it’s impossible not to succeed, it’s so easy!), tools and accessories to have on hand, seeds and greens varieties, soil and compost, trays and planters, shelving, harvest and storage, recipes, scaling up to serve local markets, and much more.

Nature's Best Hope

Plant a pumpkinseed with a child, and cultivate wonder. This simple act of reconnecting with children with nature is Sharon Lovejoy's purpose and joy and gift. Author of *Sunflower Houses: Garden Discoveries for Children of All Ages* and *Hollyhock Days: Garden Adventures for the Young at Heart*, Sharon Lovejoy is a nationally known garden writer whose books, television specials, and projects at her learning landscape in California have introduced thousands of children to the pleasures of gardening. In her newest book, *Roots, Shoots, Buckets & Boots*, she presents 12 spirited, easy-to-implement ideas for theme gardens that parents and kids can grow together. Illustrated throughout by the author's own lyrical watercolors, each garden includes a plan, the planting recipe -- seeds, seedlings, and growing instructions spelled out step-by-step -- and activities. There's the *Pizza Patch*, a giant-size wheel garden planted in "slices" of tomatoes, zucchini, oregano, and basil. A *Flowery Maze* to get lost in. A *Moon Garden* of night-blooming flowers, including a moonflower tent. And *Mother Nature's Medicine Chest*. *Discovery Walks*

"Up in the garden, the world is full of green--leaves and sprouts, growing vegetables, ripening fruit. But down in the dirt there is a busy world of earthworms digging, snakes hunting, skunks burrowing, and all the other animals that make a garden their home. In this exuberant book, discover the wonder and activity that lie hidden between the stalks, under the shade of leaves and down in the dirt."--

In this irresistible marriage of watercolorist's sketchbook and traveler's guide, Virginia Johnson lovingly captures the magic of one of the world's most storied regions, the French Riviera. We walk the Promenade des Anglais in Nice. Shop for handmade sandals at Rondini in Saint-Tropez. Visit the Madoura workshop in Antibes, where Picasso discovered his genius for pottery. Meet legendary characters like Pierre Gruneberg, a swimming instructor who taught Jean Cocteau, Brigitte Bardot, Paul McCartney, and many others. Saturated with the limpid colors of sea and sun, the dazzling greens of verdant gardens, and the rose and ochre of sunbaked villas and joyous with paisleys and blue-striped sailor's shirts and the riotous look of a patisserie window filled with confections, *Travels Through the French Riviera* is a gift book of visual wonder, the souvenir every Francophile will want. But it is also a quirky yet singularly useful travel guide, whether showing how to order coffee like a local, plan a beach day at Menton, or hike the Cap Ferrat peninsula or where to taste the best ice cream in Antibes (at Amarena—try the mint).

How does your garden grow? Book-loving Lola is inspired by a collection of garden poems that she reads with her mommy. She wants to plant her own garden of beautiful flowers, so she and Mommy go to the library to check out books about gardening. They choose their flowers and buy their seeds. They dig and plant. And then they wait. Lola finds it hard to wait for her flowers to grow, but she spends the time creating her own flower book. Soon she has a garden full of sunflowers and invites all of her friends for cakes and punch and a story amongst the flowers. Lola is a beloved character that continues to shine for young readers. Her curiosity and love of books is infectious. Parents and children love sharing Lola's stories. Rosalind Beardshaw's beautiful illustrations highlight Lola's close-knit family and how they use stories and books to interact with their world. Lola's brightly colored and growing garden is the perfect surrounding for this bright little girl.

Lizards and snakes (squamate reptiles) are the most diverse vertebrate group in Australia, with approximately 1000 described species, representing about 10% of the global squamate diversity. Squamates are a vital part of the Australian ecosystem, but their conservation has been hindered by a lack of knowledge of their diversity, distribution, biology and key threats. The Action Plan for Australian Lizards and Snakes 2017 provides the first comprehensive assessment of the conservation status of Australian squamates in 25 years. Conservation assessments are provided for 986 species of Australian lizards and snakes (including sea snakes). Over the past 25 years there has been a substantial

increase in the number of species and families recognised within Australia. There has also been an increase in the range and magnitude of threatening processes with the potential to impact squamates. This has resulted in an increase in the proportion of the Australian squamate fauna that is considered Threatened. Notably over this period, the first known extinction (post-European settlement) of an Australian reptile species occurred – an indication of the increasingly urgent need for better knowledge and management of this fauna. Six key recommendations are presented to improve the conservation management and plight of Australian squamates. This Action Plan represents an essential resource for research scientists, conservation biologists, conservation managers, environmental consultants, policy makers from Commonwealth and State/Territory governments, and the herpetological community.

NEW YORK TIMES BESTSELLER - NATIONAL BOOK AWARD FINALIST "Disturbing and riveting! It will sear your soul." —Dave Eggers, New York Times Book Review SHELF AWARENESS'S BEST BOOK OF 2017 Named a best book of the year by Wall Street Journal, The Boston Globe, San Francisco Chronicle, GQ, Time, Newsday, Entertainment Weekly, Time Magazine, NPR's Maureen Corrigan, NPR's "On Point," Vogue, Smithsonian, Cosmopolitan, Seattle Times, Bloomberg, Lit Hub's "Ultimate Best Books," Library Journal, Paste, Kirkus, Slate.com and Book Browse From New Yorker staff writer David Grann, #1 New York Times best-selling author of *The Lost City of Z*, a twisting, haunting true-life murder mystery about one of the most monstrous crimes in American history In the 1920s, the richest people per capita in the world were members of the Osage Indian nation in Oklahoma. After oil was discovered beneath their land, they rode in chauffeured automobiles, built mansions, and sent their children to study in Europe. Then, one by one, the Osage began to be killed off.

The family of an Osage woman, Mollie Burkhart, became a prime target. Her relatives were shot and poisoned. And it was just the beginning, as more and more members of the tribe began to die under mysterious circumstances. In this last remnant of the Wild West—where oilmen like J. P. Getty made their fortunes and where desperadoes like Al Spencer, the “Phantom Terror,” roamed—many of those who dared to investigate the killings were themselves murdered. As the death toll climbed to more than twenty-four, the FBI took up the case. It was one of the organization’s first major homicide investigations and the bureau badly bungled the case. In desperation, the young director, J. Edgar Hoover, turned to a former Texas Ranger named Tom White to unravel the mystery. White put together an undercover team, including one of the only American Indian agents in the bureau. The agents infiltrated the region, struggling to adopt the latest techniques of detection. Together with the Osage they began to expose one of the most chilling conspiracies in American history. In *Killers of the Flower Moon*, David Grann revisits a shocking series of crimes in which dozens of people were murdered in cold blood. Based on years of research and startling new evidence, the book is a masterpiece of narrative nonfiction, as each step in the investigation reveals a series of sinister secrets and reversals. But more than that, it is a searing indictment of the callousness and prejudice toward American Indians that allowed the murderers to operate with impunity for so long. *Killers of the Flower Moon* is utterly compelling, but also emotionally devastating.
