The Masonry Institute of America believes that the best way to extend and improve the use of masonry is through education and dissemination of information. Following a long tradition of such ideals, the 1997 Masonry Codes and Specifications is a ready reference that furnishes, in one document, the various code requirements for masonry from the Uniform Building Code and Standards, the California State Building Code, and the American Society for Testing and Materials (ASTM) Standards that govern the specification of quality and testing of materials. The book includes Guide Specifications for masonry construction set forth in the CSI format with notes to the specifier.

## **Secrets of the Shaman**

Secrets Of The Shaman is a follow-up book to The Shaman Warrior, in which the author, Gini Graham Scott, a sociologist/anthropologist, describes her experiences in studying personally with Michael Fairwell, the shaman teacher she first met at a magical encampment. After she joined his group and studied with them in Northern California, as described in The Shaman Warrior, she met with Michael Fairwell and some of his students for advanced training in the L.A. area. The book describes how she participated in a variety of exercises and lessons, from working with altered states of consciousness and raising and manipulating subtle energies to working with intention and creating gateways into other dimensions.
