Implementing the Information Literacy Framework: A Practical Guide for Librarians is written with three types of people in mind: librarians, classroom educators, and students. This book and its website address the implementation of the Association of College and Research Libraries' Framework of

Information Literacy in Higher Education. One of the few books written jointly by an academic librarian and a classroom faculty member, Implementing the Information Literacy Framework packs dozens of how-to ideas and strategies into ten chapters specifically intended for librarians and classroom instructors. If you have been waiting for a no-nonsense, carefully explained, yet practical source for implementing the Framework, this book is for you, your colleagues, and your students, all in the context of a discipline-specific, equal collaboration between the library liaison and classroom educator. Implementing the Information Literacy Framework gives you the tools and strategies to put into practice a host of Framework-based information literacy experiences for students and faculty, creating a campus culture that understands and integrates information literacy into its educational mission.

Between Borders

This book considers the place and value of knowledge in contemporary society. "Knowledge" is not a self-evident concept: both its denotations and connotations are historically situated. Since the Enlightenment, knowledge has been a matter of discovery through effort, and "knowledge for its own sake" a taken-for-granted ideal underwriting progressive education as a process which not only taught "for" and "about" something, but also ennobled the soul. While this ideal has not been explicitly rejected, in recent decades there has been a tacit move away from a strong emphasis on its centrality, even in Higher Education. The authors address the values that inform knowledge production in its present forms, and seek to identify social and cultural factors that support these values.Against the background of increasingly restrictive conditions of academic work, the first section of this volume offers

incisive critiques of Higher Education, with examples drawn from Australia and New Zealand. The second group of chapters considers how academics have viewed, and have tried to adapt to, present circumstances. The third section comprises papers that consider epistemological issues in the generation and promulgation of knowledge. The chapters in this volume are indicative of the work that needs to be done so that we can come to comprehend – and perhaps try and improve – our relationship to learning and knowledge in the 21st Century.This timely book will be of particular interest to workers in higher education; it should also inform and challenge all those who have concerns for the future of the intellectual life of our civilization.

Political or social groups wanting to commit mass murder on the basis of racial, ethnic or religious differences are never hindered by a lack of willing executioners. In Becoming Evil, social psychologist James Waller uncovers the internal and external factors that can lead ordinary people to commit extraordinary acts of evil. Waller debunks the common explanations for genocide- group think, psychopathology, unique cultures- and offers a more sophisticated and comprehensive psychological view of how anyone can potentially participate in heinous crimes against humanity. He outlines the evolutionary forces that shape human nature, the individual dispositions that are more likely to engage in acts of

evil, and the context of cruelty in which these extraordinary acts can emerge. Illustrative eyewitness accounts are presented at the end of each chapter. An important new look at how evil develops, Becoming Evil will help us understand such tragedies as the Holocaust and recent terrorist events. Waller argues that by becoming more aware of the things that lead to extraordinary evil, we will be less likely to be surprised by it and less likely to be unwitting accomplices through our passivity.

The Book of Mormon

"Entertainers and trainers have a lot in common. Both require an audience. Both require a polished, professional delivery. And both must attract -- and keep -- attention. Or else the show is over. Unlike the audience at a show, training participants are often disinterested and easily distracted. In order to keep them tuned in and help them retain information, trainers are constantly in search of new ways to engage learners. Grounded in the latest adult learning and training theories, "Show Biz Training" provides creative techniques that use comedy, props, magic, theater, and music, giving readers all the tools they need to perform the many activities found inside. The book uses specific examples and provides step-by-step instructions, resource lists, and worksheets to help trainers support and further learning by engaging emotion, building rapport, creating the proper atmosphere, and crafting lessons out of a host of entertainment-inspired ideas. Packed with fun, original concepts for serious educators, "Show Biz

Training"is a highly informative way to set the stage for exciting, effective learning."

Knowledge as Value

A balanced editorial approach, a highly respected editor, and comprehensive glosses, footnotes, and historical and cultural essays make this the most reader-friendly introduction to Shakespeare available today. The seventh edition of this comprehensive anthology addresses the two key issues confronted by

readers approaching Shakespeare today: a lack of knowledge about the historical period and difficulty with the language of Shakespeare's plays. A richly illustrated general introduction offers insight into Shakespeare's England and background on the literary and cultural contexts in which Shakespeare wrote and produced plays. Each play is introduced by a descriptive essay designed to help the reader appreciate the cultural contexts and interpretive issues raised by the play -- without dictating their interpretations. Thoroughly revised and updated notes and glosses provide additional support to understanding the language of Shakespeare's time.
