In this deeply considered meditation on aging in Western culture, Jan Baars argues that, in today's world, living longer does not necessarily mean living better. He contends that there has been an overall loss of respect for aging, to the point that understanding and "dealing with" aging people has become a process focused on the decline of potential and the advance of disease rather than on the accumulation of wisdom and the creation of new skills. To make his case, Baars compares and contrasts the works of such modern-era thinkers as Foucault, Heidegger, and Husserl with the thought of Plato, Aristotle, Sophocles, Cicero, and other Ancient and Stoic philosophers. He shows how people in the classical period "less able to control health hazards" had a far better sense of the provisional nature of living, which led to a philosophical and religious emphasis on cultivating the art of living and the idea of wisdom. This is not to say that modern society's assessments of aging are insignificant, but they do need to balance an emphasis on the measuring of age with the concept of "living in time." Gerontologists, philosophers, and students will find Baars' discussion to be a powerful, perceptive conversation starter.

It is a fictionalized story of the relationship between the artist, Paul Maze, and his young married assistant, Clara, during and after the writing of his memoir of the Great War. A feature film based on the author's screenplay of 21 Aldgate, titled "The One I Love," is presently in development by Progress Pictures, Ltd., U.K. and The Future Film Group, U.K. The target audience includes WWI and WWII history buffs, Jewish history enthusiasts, Anglophiles across the globe, and readers who enjoy a great love story. Caution: what you are about to read is real: names have been changed to protect the identities of the innocent and the demented. If you haven't yet started the college living experience, then this book is what you need. Unlike other college anecdotes you might have seen, this one doesn't give a deceiving, sunshine approach to collegiate living. It isn't trying to soothe or coddle you when the world seems harsh, but instead gives clear, cold hard truths about what can happen when students choose to leave the nest. So be warned: these are true stories of roommate experiences that people have lived to share. Some will make you want to laugh, weep, repent, disinfect, or heave. It'd be best to wait until mom and dad drive away before opening this book; that way you can't

change your mind and run back home. No doubt about it, Dorothy said it all when she left Oz, "There's no place like home." This book contains insane tales of deficient hygiene, soiled environments, untreated psychosis, and sexual malfunctions. Be advised that you may find it to be amusing yet strangely disturbing. Enjoy!

Envision a cold and calculating future world, where mankind has attained miraculous gains on the one certain, chilling fact of life that has plagued the species since the dawn of time. In this bold new landscape, humans are able to predict the body's natural demise with a specific numerical prediction of the age of death, called a PDA. What's more, life spans have dramatically increased, and humans can fend off the inevitable depending on how they live. That is, all humans except for one: Sophia Nolan, who, since birth, has faced a number that has idled at a grim twenty-seven. Twenty-Seven, Shayne Woodsmith's arresting, dystopian debut novel, lays bare the plight of this one mere mortal and what her all-too-human condition suggests for a species that has been forever fixated on cheating death. As Sophia rapidly approaches the age of twenty-seven, she must

reckon with the consuming obsession of the society around her. Fast-paced, thought-provoking, and at times utterly frantic, Twenty-Seven delivers a disarmingly honest portrayal of human frailty and strength through the lens of one tormented outcast. While presciently casting a cold eye on our health-obsessed future, it exposes the darker side of an all-too-sterile world, where the ultimate prestige is longevity. You may never look at the notion of a long and healthy life in the same way again.

Is Catholicism more than giving up beer or chocolate for Lent? Even if it's good beer or great chocolate the answer is a resounding "yes!" In fact, we're called to have such faith that when others meet us they actually see Christ. But how do we do that in a world where Notre Dame means "football" and not Our Lady? By following the lead of so many before us We have living examples of holy men and women who overcame the same types of temptations we face and shortcomings we all have, to become "huge, blinking neon signs that pointed to Jesus." And if they can do it so can we with a little practice. Author, lecturer, and Catholic covert Matthew Leonard combines the stories of the saints' triumphs and struggles along with his own personal anecdotes and wry humor to show us all a fresh take on the art of being truly Catholic in a contemporary world.
