While many effective interventions can reduce cancer risk, incidence, and death, as well as enhance quality of life, they are of no benefit if they cannot be delivered to those in need. In the face of increasingly dynamic and resource-constrained conditions, implementation science plays a critical role in delivering cancer control practices. This 30-page workbook was written by members of the NCI (National Cancer Institute) implementation Science team and reviewed by nearly 100 public health practitioners and implementation science researchers. Through summaries of key theories, methods, and models, the guide shows how greater use of implementation science can support the effective adoption of evidence-based interventions. Case studies illustrate how practitioners are successfully applying implementation science in their cancer control programs

LLEWELLYN'S 2020 DAILY PLANETARY GUIDE

Biblical history can be some of the most difficult material for beginning students to grasp. The conventions of contemporary history writing are quite different from those of ancient Israelite writers. Here a master teacher offers basic orientation to the genre and conventions of the Old Testament historical books, helping students become careful and attentive readers. Written in an accessible style with many ancient and contemporary examples, this book introduces students to some of the phenomena they will encounter in the historical books and provides strategies for understanding their significance. The goal is to make further reading and study of Scripture more informed and sensitive. Sidebars, discussion questions, and further reading suggestions are included.
