A comprehensive guide to the kinds of verbal and mathematical questions likely to appear in the Graduate Management Admission Test (GMAT) is presented. The current GMAT consists of multiple-choice questions, which are divided among eight separately timed sections. A general description and brief discussion are presented of the objectives and techniques for each question type, followed by a math review useful in the problem solving and data sufficiency sections of the GMAT. Sample tests with answer keys and detailed explanations of the specific question type and selected questions and answers from the sample tests are provided, along with methods of determining the best answer to a particular kind of question.

Problem solving questions are designed to test basic mathematical skills, understanding of elementary and mathematical concepts, and the ability to reason quantitatively and to solve quantitative problems. Data sufficiency questions are designed to measure ability to analyze a quantitative problem, to recognize which information is relevant, and to determine at what point there is sufficient information to solve the problem. In addition, analysis of situations questions measure the ability to analyze and evaluate the major aspects of a business or management situation. Writing ability questions include sentence correction questions to test correct and effective expression; the reading comprehension section includes interpretive, applicative, and inferential questions. Guidelines for the use of scores and answer key and scoring information are presented, and public interest principles for the design and use of admissions testing programs are addressed. (SW)

Social Problems in India

Investment Banking, UNIVERSITY EDITION is a highly accessible and authoritative book written by investment bankers that explains how to perform the valuation work at the core of the financial world. This body of work builds on Rosenbaum and Pearl's combined 30+ years of experience on a multitude of transactions, as well as input received from numerous investment bankers, investment professionals at private equity firms and hedge funds, attorneys, corporate executives, peer authors, and university professors. This book fills a noticeable gap in contemporary financial literature, which tends to focus on theory rather than practical application. It focuses on the primary valuation methodologies currently used on Wall Street—comparable companies, precedent transactions, DCF, and LBO analysis—as well as M&A analysis. The ability to perform these methodologies is especially critical for those students aspiring to gain full-time positions at investment banks, private equity firms, or hedge funds. This is the book Rosenbaum and Pearl wish had existed when we were trying to break into Wall Street. Written to reflect today's dynamic market conditions, Investment Banking, UNIVERSITY EDITION skillfully:

- Introduces students to the primary valuation methodologies currently used on Wall Street
- Uses a step-by-step how-to approach for each methodology and builds a chronological knowledge base
- Defines key terms, financial concepts, and processes throughout
- Provides a comprehensive overview of the fundamentals of LBOs and an organized M&A sale process
- Presents new coverage of M&A buy-side analytical tools—which includes both qualitative aspects, such as buyer motivations and strategies, along with technical financial and valuation assessment tools
- Includes a comprehensive merger

consequences analysis, including accretion/(dilution) and balance sheet effects Contains challenging end-of-chapter questions to reinforce concepts covered A perfect guide for those seeking to learn the fundamentals of valuation, M&A, and corporate finance used in investment banking and professional investing, this UNIVERSITY EDITION—which includes an instructor's companion site—is an essential asset. It provides students with an invaluable education as well as a much-needed edge for gaining entry to the ultra-competitive world of professional finance.

Anand Kumar, a mathematics prodigy, defied all challenges to set up one of the most successful and innovative teaching initiatives in the world—Super 30. Born in Chandipur Bela, Patna, Anand secured a place in Cambridge University but couldn't attend because he had no money and sold papads in the evenings instead. He dealt with his own disappointment by setting up an innovative school in 2002 to prepare underprivileged students for the IIT JEE examination. Super 30 has an astonishing success rate and on an average, twenty-seven to twenty-eight of the thirty students crack the exam every year. Stirring and heart-wrenching, this is the extraordinary story of a visionary who has elevated these bright sparks and, through education, given them hope to rise above crippling poverty.
