A Complete Guide

My One Hundred Best Games

In this easy-to-read guide, Grandmaster Joe Gallagher goes back to the basics of the Caro-Kann, studying the key principles of its many variations.

Play the Caro-Kann

The Caro-Kann Defence is one of the most solid chess openings at Black's disposal. This book studies the Classical variation, popularized by former World Champions Botvinnik, Petrosian and Karpov. Their successor Gary Kasparov is one of the authors of this book, which has been updated by the addition of a chapter by Grandmaster Raymond Keene.

The Caro-Kann Defense

Every chess player needs to decide which openings he is going to play. But where do you start? The risk of drowning in the turbulent sea of opening theory is only too real for beginning amateurs. Often your goals and ambitions will be misguided. If you are trying to win in 20 moves, copy what's in fashion among top-GM's or memorize variations, you are wasting your time. Most likely you will never get to play your 'preparation' and end up aimlessly switching from one opening to the other. Experienced French chess trainer Vincent Moret provides a complete, ready-to-go chess opening repertoire for White with a sound set of lines that do not outdate rapidly, do not require memorization and are easy to digest for beginners and post-beginners. To show the typical plans and the underlying ideas in the various lines of his repertoire, Moret not only selected games of grandmasters. He

mainly uses games of young, improving players to highlight the errors they tend to make. With many exercises to test your understanding of the ideas behind the repertoire.

The Final Theory of Chess

Opening for Black According to Karpov

Taming Wild Chess Openings

The English Opening

The Caro-Kann Defence, long renowned for being a solid and reliable defence against 1.e4, is undergoing a renaissance at the moment. In addition to being a mainstay in the repertoires of a recent World Champion (Viswanathan Anand) and a 2018 World Championship candidate (Ding Liren), it is being flooded with new and creative ideas from a range of other top players, notably Anand's Indian Olympiad teammates Vidit and Adhiban. The pawn structures in this opening leave

considerable room for individual interpretation. This book is written for the Black side, though new ideas for White are suggested and old ones occasionally improved. It contains not only the author's personal take on how to deal with all major White tries after 1.e4 c6, but also a range of alternatives for Black- to cater for different types of Caro-Kann player. This repertoire builds on the existing state of theory, taking it in novel, exciting and decidedly modern directions, while not forgetting about the opening's sound strategic underpinnings.

Caro Kann Defence

The Caro-Kann is one of Black's most reliable answers to 1.e4. It is a regular favourite of elite players, who know that computer-aided preparation now threatens the sharpest lines of the Sicilian or Ruy Lopez (at the very least with a forced draw). The Caro-Kann is less susceptible to such forcing lines -- Black sets out to equalise in the opening, and win the game later. Lars Schandorff reveals a bullet-proof opening repertoire and lucidly explains how Black should play the middle and endgame. Features: A complete repertoire against 1.e4 with 1c6; Written by an eminent opening expert; A rock-solid grandmaster repertoire.

Playing 1.E4

The Caro-Kann is a reliable yet at the same time dynamic answer to White's most popular opening move, 1 e4. It has the seal of approval of numerous leading Grandmasters including Vishy Anand, Evgeny Bareev and Alexey Dreev, as well as former World Champion Anatoly Karpov, who has utilized it with great success throughout his illustrious career. One of the attractions of the Caro-Kann is that it suits a variety of different styles; it can lead to wild tactical battles as well as quiet, positional play. In *Play the Caro-Kann*, Jovanka Houska presents the reader with a concise and trustworthy repertoire within the opening, providing a solution against all of White's main possibilities. Houska examines the important tactical and strategic plans for both sides, arming the reader with enough information to begin playing the Caro-Kann with confidence in his or her own games. *A complete repertoire against 1 e4 *Written by a Caro-Kann expert *Ideal for improvers, and club and tournament players

The Classical Caro-Kann

"The Final Theory of Chess" constructs an aggressive opening repertoire based primarily upon the use of computer analysis. The work lays a solid foundation upon which further computer analysis may be built in order to solve the game. 404 pp. (Games/Gamebooks)

The Caro-Kann

Former world champion Anatoly Karpov is a living legend, the winner of more tournaments than any other player in history. His opening analysis is absolutely definitive. In this indispensable resource for every serious player, he covers the main positional variations of the Caro Kann: the Classical System (1 e4 c6, 2 d4 d5, 3 Nc3) and the Advance Variation (3 e5). These lines may not be as fast and furious as the Panov Attack (the subject of another book in this series), but as Karpov shows, precision and good timing can give Black a successful defense and even a strategic advantage.

New in Chess Yearbook 127

Start every game with confidence! The two greatest challenges for beginning chess players are not only to survive the openings phase, but also to choose appropriate attack and defense formations in the process. Winning Chess Openings shows you how to do both. In Yasser Seirawan's entertaining, easy-to-follow style, you're shown formations that can be used with other White or Black pieces. Winning Chess Openings will help you develop a solid understanding of opening principles that you can apply to every game you play without having to memorise a dizzying array of tedious and lengthy opening lines. * Build a safe house for a King *

Estimate losses of ten moves or fewer * Utilise the elements: time, force, space and pawn structure * Plan strategy based on time-tested opening principles * Employ a defense for Black against any White Opening * Apply an opening for White used by World Champions Winning Chess Openings will help readers develop a solid understanding of opening principles that can be applied to every game they play--without having to memorize a dizzying array of tedious and lengthy opening lines.

The Caro-Kann Revisited -

This volume aims to provide an ideal platform to study chess openings. By continually challenging the reader to answer probing questions throughout the book, the 'Move by Move' format greatly encourages the learning and practicing of vital skills just as much as the traditional assimilation of opening knowledge. Selected questions and answers are designed to keep the reader actively involved and allow him to monitor his progress as he learn. This can be a good way to study any chess opening and at the same time improve general chess skills and knowledge. In this book, Cyrus Lakdawala examines the 'Caro-Kann' - he wants to share his experience and knowledge of the 'Caro-Kann', present a repertoire for Black and provide answers to all the key questions.

Chess Opening Essentials

A chess opening or simply an opening refers to the initial moves of a chess game. The term can refer to the initial moves by either side, White or Black, but an opening by Black may also be known as a defense. There are dozens of different openings, and hundreds of variants. The Oxford Companion to Chess lists 1,327 named openings and variants. These vary widely in character from quiet positional play to wild tactical play. In addition to referring to specific move sequences, the opening is the first phase of a chess game, the other phases being the middlegame and the endgame.

Beating the Caro-Kann

In this two volume book, published together for the first time, opening expert Nigel Davies produces a complete repertoire which is certainly not for the fainted-hearted: uncompromising and wild attacking ideas for both colours. The first volume deals with a gambit style approach for White; the second volume concentrates on an ambitious Black repertoire. All of the opening lines Davies advocates in Volume 1 lead to positions of open warfare, where sharp, tactical play completely dominates dreary positional sacrifices. In Volume 2, Davies produces an ambitious and uncompromising repertoire for Black. His two main choices are

the Albin Counter Gambit and the Schlieman Gambit, the pick of the crop having been tried and tested by some of the World's most inventive players. Nigel Davies is both an experienced Grandmaster and chess trainer. A former British Open Quickplay Champion is the author of several successful chess books including The Tropowsky and highly acclaimed Play 1 e4 e5, both published by Everyman Chess

French Defense

In modern chess, faster time controls have become more important than ever. Every day, countless numbers of rated blitz and rapid games are being played in online and over-the-board competitions and championships. In blitz chess it is important to make the right decisions quickly and almost instinctively. That is why world-famous opening expert Grandmaster Evgeny Sveshnikov and his son, International Master Vladimir Sveshnikov, have created an opening repertoire for club players that is forcing, both narrow and deep, and aggressive. The aim is to be in control as much as possible. You want to be the one who decides which opening is going to be played, you want to dictate the strategical and technical choices. And you want to keep the pressure, increasing your opponent's chances to stumble. If you play the lines the Sveshnikovs have selected, you will not end up in positions where finding the theoretically best move is all-important, but in positions where it is relatively easy to spot the moves with the greatest practical effect. Your

results will improve and you will probably end up playing their variations in 'slow chess' as well.

The Modernized Caro-Kann

Mihail Marin completes his opening repertoire for White with 1.c4, the English Opening, by covering 1.c4 c5. The theory is state-of-the-art with many novelties suggested, but most useful of all are Marin's lucid explanations of how to play the resulting positions. Features: A repertoire for White with 1.c4 c5; Written by an award-winning author; A repertoire to last a lifetime.

New in Chess Yearbook 129

The Caro-Kann is one of the most important and popular responses to 1.e4. World champions Botvinnik, Petrosian, Karpov and Anand have played this reliable chess opening in many of their games. Present-day elite players such as Hikaru Nakamura and Fabiano Caruana are proving that the 'drawish' reputation of the Caro-Kann no longer holds in modern chess. Victor Bologan presents a complete Caro-Kann repertoire for Black that is much more than just a lucidly explained and highly playable set of responses. In many lines Bologan provides – as he has done in his other recent major chess opening books for New In Chess – two options to

handle the Black position. Bologan's explanations are accessible for a wide range of players and he provides the reader with a thorough grounding in the strategic and tactical motifs. During his research, Bologan has found many new ideas and resources. After reading and studying this book you are bound win many exciting games with Bologan's Caro-Kann!

Chess Queen Checkmates Anthology.1.

New In Chess Yearbook, which appears four times a year, contains all major new chess opening developments in 35 chapters. Each issue brings you dozens of new ideas on the cutting edge of modern chess theory. An accessible way to keep up to date with main line opening theory. Indispensable for advanced players.

Modern Chess Openings

Effective recipes for club players No matter how unconventional, irrational or even crazy a chess opening is, sooner or later every chess player will have to face it. When that happens, you can count on a well-prepared opponent who is more than happy to roll out his pet line. John Watson and Eric Schiller provide club players with solutions to a huge selection of these rarely-played or tricky chess openings. They concentrate upon ideas and strategy, with enough analysis to satisfy the

needs of practical play. Only when a sharp reply is required, Watson and Schiller will recommend a more complex variation filled with tactics. In the vast majority of cases they present a simple and safe way to approach the position, requiring little memorization and still leading to a promising game. There is a lot of fun material in this book, and you may be surprised to see how even strong grandmasters have indulged in the craziest variations. Chess isn't all main lines and 20 moves of theory!

Opening Repertoire

A Complete Black Repertoire against 1.e4 Built around the Super-solid Rubinstein! The solid Rubinstein Variation of the French Defense – despite its having been played by world champions and elite grandmasters, it has never been subjected to detailed study. The author, German International Master Hannes Langrock, has produced a book with complete coverage of this line, along with solid recommendations for Black should White deviate on the second or third move. The first edition was widely acclaimed, and the second edition has been revised and expanded. “I never realized that Black could take such active measures in the Rubinstein Variation without significant drawbacks. This book is an eye-opener, and even top grandmasters might find that they have underestimated Black's resources in important positions. The average tournament and online player will appreciate Langrock's straightforward, no-nonsense style. He keeps the complexity

of the analysis within bounds, and highlights relevant details without drifting into obscure page-long analytical byways. General themes are clearly presented within the context of illustrative games. The result is a book that covers a broad swath of material in a modest number of pages. I'm sure that you will be well-rewarded for its study, and come out with a useful new weapon in your chess arsenal." – International Master John Watson in his Foreword to the first edition.

Gambiteer

Chess players are offered an ambitious repertoire for White with 1.e4 in two volumes, with this book covering all lines except the Sicilian and French defenses.

Complete Defense to King Pawn Openings

This book presents a comprehensive, ready-to-use, and high-quality repertoire for Black against 1.e4. With meticulous analysis and in-depth explanations, the author demonstrates how the Caro-Kann Defense can be used successfully by players of any level. He also draws on his experience and on his trove of novel ideas to present a new take on the Caro-Kann: one that emphasizes Black's dynamic options while maintaining a solid and flexible setup.

Play the Caro-Kann

This book describes the intense rivalry--and collaboration--of the four players who created the golden era when USSR chess players dominated the world. More than 200 annotated games are included, along with personal details--many for the first time in English. Mikhail Tal, the roguish, doomed Latvian who changed the way chess players think about attack and sacrifice; Tigran Petrosian, the brilliant, henpecked Armenian whose wife drove him to become the world's best player; Boris Spassky, the prodigy who survived near-starvation and later bouts of melancholia to succeed Petrosian--but is best remembered for losing to Bobby Fischer; and "Evil" Viktor Korchnoi, whose mixture of genius and jealousy helped him eventually surpass his three rivals (but fate denied him the title they achieved: world champion).

The Caro-Kann

Based on the powerful Caro-Kann, a favorite weapon of great players, you'll learn how to come right out of the gate and defend against 1.d4, the most popular first move in chess. This is a great beginners book because readers need to learn just one strong opening system, and it can be used to combat all of Whites 1.d4 openings. You'll learn every option and strategy White can throw on the board, the

correct plan to combat them all, and how to seize the initiative and take control of the game. Up-to-date analysis includes examples from world-class games. Includes more than 350 diagrams and clear explanations. 300 pages

My First Chess Opening Repertoire for White

Chess Opening Repertoire

The Caro-Kann has always been one of the most widely played openings among club and tournament players. This handy battle manual deals with the critical main line positions after 1 e4 c6 d4 d5 3 Nc3 dxe4 4 Nxe4. Highly regarded author Grandmaster Neil McDonald offers a comprehensive survey of the state of current theory for both White and Black players, explaining the basic elements, strategies and tactics for both sides. This guide covers one of the most fashionable chess openings in current practice. It is ideal for club and tournament players and it provides everything you need to know to start playing the main line Caro-Kann straightaway. (6 1/4 x 9 1/4, 144 pages, diagrams)

Winning Chess Openings

New In Chess Yearbook, which appears four times a year, contains all major new chess opening developments in 35 chapters. Each issue brings you dozens of new ideas on the cutting edge of modern chess theory. An accessible way to keep up to date with main line opening theory. Indispensable for advanced players.

Meeting 1 E4

Gone are the days when the Caro-Kann was adopted only with a view to playing for a draw. The 1980s saw a great resurgence of interest in the defence at all levels, and, while the Caro-Kann justly retained its reputation as Black's most solid response to 1 e4, the development of new ideas in both attack and defence has created a thoroughly modern and dynamic opening system suitable for players of all temperaments. This revised and updated second edition provides a comprehensive review of current theory and, with over 60 complete games, illustrates the practical application of the key tactical and strategical ideas.

Starting Out

Most chess opening books are either too detailed or too shallow. Chess Opening Essentials has exactly the right balance and is an accessible primer and a reference book at the same time. It gives a flavour of how every opening works

and explains the similarities with other openings, as well as the differences. In addition, it also points at the various middlegame plans that apply after the opening has ended. Beginning and improving chess players should get this powerful book before they buy ANY other chess opening book! *Helps beginners to develop a solid understanding of fundamental opening ideas *Gives casual players the ability to choose the opening that suits their style and taste *A tool for club players to test and review their opening repertoire *A reference book to which advanced players keep returning The authors do not propagate forcing tactical variations to be memorized mechanically, but explain what you should actually be trying to achieve when playing the opening of your choice. They include the main alternative responses and give clear indications for further study. *

Comprehensive: covers all main variations likely to arise * Easy-to-use: important moves and key positions are highlighted in colour * Long-lasting: it doesn't outdate because it is about basics - not the latest fashions * Complete: explains the plans and counterplans for both Black and White * Down-to-earth: simple, verbal introductions (not a database dump full of dead trees) * Convenient: every opening is illustrated with a number of instructive games

Keep it Simple: 1.e4

Why is this repertoire called simple? For the simple reason that the variations are straightforward, easy to remember and require little or no maintenance. International Master Christof Sielecki has created a reliable set of lines for chess players of almost all levels. The major objective is to dominate Black in the opening, by simple means. You don't need to sacrifice anything or memorize long tactical lines. Unless Black plays something stupid, when tactics are the simplest punishment. Sielecki developed this repertoire working with students who were looking for something that was easy to understand and to learn. Most of the lines he selected are occasionally played by grandmasters, but on the whole they lie outside the mainstream of opening theory. That means that there is hardly any need to monitor theoretical developments. Sielecki always clearly explains the plans and counterplans and keeps you focussed on what the position requires. Ambitious players rated 1500 or higher will get great value out of studying this extremely accessible book.

A Chess Opening Repertoire for Blitz & Rapid

Title page verso lists the actual publisher: Gloucester Publishers Limited.

The Extreme Caro-Kann

Fed up having to defend with Black? Annoyed by all those irritating white systems? Then this is the book for you! Russian International Master Alexander Raetsky draws upon his wealth of experience gained playing on the tough international tournament circuit to supply you with an all-in-one solution to your problems. The reader is provided with a complete repertoire for Black against 1 e4, based on the ever-reliable Sicilian Defense. Lines suggested are dependable and promise Black dynamic counterplay. The variations are also easy to learn: this book is especially useful for players who have neither the time nor inclination to learn reams and reams of the latest opening theory. (6 1/4 x 9 1/4, 178 pages, diagrams)

Bologan's Caro-Kann

Alexey Bezgodov presents an unusual idea for White against the ever popular Caro-Kann Defence. The Russian Grandmaster and chess opening expert advocates a

very early deviation, the annoying and little explored 3.f3!? This move may look unimpressive at first sight, but it considerably complicates life for Caro-Kann players, as it makes Black's main problem bigger: the development of his bishop on c8. Small wonder that an increasing number of strong grandmasters, such as Vassily Ivanchuk, Alexander Morozevich and Judit Polgar, have incorporated this move in their repertoire. After 3.f3!? the bishop on c8 has nowhere to go, and Black will often struggle to avoid enduring problems. White's chances to obtain an advantage are substantial, as Bezgodov shows in this fascinating new chapter in modern chess opening theory, packed with original analysis and clear explanations.

Tal, Petrosian, Spassky and Korchnoi

New In Chess Yearbook, which appears four times a year, contains all major new chess opening developments in 35 chapters. Each issue brings you dozens of new ideas on the cutting edge of modern chess theory. An accessible way to keep up to date with main line opening theory. Indispensable for advanced players.

Caro-Kann Defence

The Caro-Kann Defence has a justified reputation for reliability, making it an

attractive choice for players with a preference for positional play. However in recent years many new dangerous ideas have been discovered for White which makes a study of the theoretical main lines imperative for competitive players. The Panov Attack against the Caro-Kann, 1. e4 c6 2. d4 d5 3. exd5 cxd5 4. c4, covered in this second volume in the series, leads to a rapid opening of lines and very lively piece play with prospects of a quick attack on the kingside, queenside or the centre. Former world champion Anatoly Karpov and his collaborator Mikhail Podgaets select and analyse the essential main lines that provide Black not only with security, but also with active play. About the Author Anatoly Karpov is a living legend of the chess; he has dominated the world of the chess for over a decade as the world chess champion between 1975 and 1985. Garry Kasparov, the current champion, dethroned him and the two ideologically opposed Russians have had a bitter rivalry ever since. Anatoly Karpov is also the winner of the largest number of tournaments in the history of the chess, with more than 160 due tournaments. He is considered the best positional player of history of chess and is the author of several other books on chess theory.

Chess Openings the Easy Way

New in Chess Yearbook 128

A special edition of the acclaimed Modern Chess Openings is targeted to beginning and intermediate players and covers the most important chess openings, complemented by strategies based on the game's latest innovations. Original.

Alekhine Defense. A Complete Guide

Alekhine Defense is a bold choice for Black, challenging the classical chess rules from the very beginning of the game yet proving itself to be a flexible system. Black can choose to head for mind-boggling complications or carefully manoeuvre within the 6th to 8th ranks, waiting for the right time to strike out at the center. Although once a favorite of Bobby Fischer and occasionally played by Magnus Carlsen, the lack of Alekhine Defense games at the level of elite Grandmasters today means that many lines and ideas remain untested in practice. As a result, this opening leads to lively, often open positions with chances for both sides. With INf6 Black signals that he is playing to win. This book, consisting of 16 parts and 87 chapters, not only covers the traditional Alekhine lines but also takes a comprehensive look at variations rooted firmly in the 21st century. Moreover, thanks to the use of modern technology and the authors' deep analysis the evaluations of many well-known lines have been revised. The authors have strived to write a lively work which is useful for both players with high ELO ratings and club players.
