An electrifying new voice in military fiction, Joe Buff has written a riveting and utterly realistic submarine adventure. Jeffrey Fuller is going back to war. Commander Fuller has distinguished himself in battle, becoming one of America's most inspirational heroes in its war with the Berlin-Boer Axis. Time and time again, Fuller has taken his crew of elite submariners into the most dangerous waters in the world, matching wits and weapons with the best of Germany's and South Africa's fighting force, and every time he has emerged the victor. But this time, Fuller is given an impossible mission. As the captain of America's most technologically advanced tactical nuclear submarine, Fuller is told that the Allies will lose the war unless two conditions are met. The only problem: if Fuller devotes his time to achieving one of his goals, he will sacrifice the other. With the war hanging in the balance, Fuller must accomplish the impossible, or he will lose not only his life, but the war itself.

The book presents an overview of the International practices and state-of-the-art of LCA studies in the agri-food sector, both in terms of adopted methodologies and application to particular products; the final purpose is to characterise and put order within the methodological issues connected to some important agri-food products (wine, olive oil, cereals and derived products, meat and fruit) and also defining practical guidelines for the implementation of LCAs in this particular sector. The first chapter entails an overview of the application of LCA to the food sector, the role of the different actors of the food supply chain and the methodological issues at a general level. The other chapters, each with a particular reference to the main foods of the five sectors under study, have a common structure which entails the review of LCA case studies of such agri-food products, the methodological issues, the ways with which they have been faced and the suggestion of practical guidelines.
