The two-volume set LNCS 10484 and 10485 constitutes the refereed proceedings of the 19th International Conference on Image Analysis and Processing, ICIAP 2017, held in Catania, Italy, in September 2017. The 138 papers presented were carefully reviewed and selected from 229 submissions. The papers cover both classic and the most recent trends in image processing, computer vision, and pattern recognition, addressing both theoretical and applicative aspects. They are organized in the following topical sections: video analysis and understanding; pattern recognition and machine learning; multiview geometry and 3D computer vision; image analysis, detection and recognition; multimedia; biomedical and assistive technology; information forensics and security; imaging for cultural heritage and archaeology; and imaging solutions for improving the quality of life.

Creating Competitive Advantage with HRM

Cars of Eastern Europe tells the story of the cars and vans made in Latvia, Poland, the former Yugoslavia, the Czech Republic and Slovakia, Hungary, Romania, Bulgaria and East Germany. In a region that stretches from the Black Sea to the Baltic, the vehicles were as varied as the nations themselves. Now that eastern Europe has come in from the cold, this book offers a unique and timely survey of the motor industry in this often overlooked part of the continent.

Bentley is a brand that is rich in history but forward thinking and innovative. This is the company that created a Le Mans winner and a state limousine in the same year. Their 200 mph vehicles contain the hands-titching of fine leather and of high glossed veneers from 80-year-old trees; as well as the latest in-car technologies. For Bentley there is no contradiction between supreme luxury and sheer exhilaration. This was James Bond's first car, the record-setting ride of the Bentley Boys, the vision of founder W.O. Bentley-- "a fast car, a good car, the best in its class"-- and a vision that is still unfolding. Here is a grand tour through one of automotive's truly distinctive brands. English/German/French/Russian/Chinese edition.

Stumptown Vol. 3

In the 50s & 60s Coventry Climax engines powered many race-winning cars, including some driven by Stirling Moss & Jack Brabham. To get the true inside story, the author, an engineer, has talked to all surviving Coventry Climax personnel who were involved with the racing engines. The author was given full

access to all of Walter Hassan's papers, photographs and engine drawings. After 30 months of original research and writing, this book describes exactly how these famous engines developed from industrial fire pumps to the Hillman Imp, from Le Mans winning Lotus Elites to Formula One winners driven by Stirling Moss and Jack Brabham, right through to the company's takeover by Jaguar in 1963. Viewed through the eyes of an engineer, and the detailed recollections of those who were there, this is a fascinating account of the trials and tribulations of leading edge race engine design from 1952 to 1966.

Auto Repair For Dummies, 2nd Edition (9781119543619) was previously published as Auto Repair For Dummies, 2nd Edition (9780764599026). While this version features a new Dummies cover and design, the content is the same as the prior release and should not be considered a new or updated product. The top-selling auto repair guide--400,000 copies sold--now extensively reorganized and updated Forty-eight percent of U.S. households perform at least some automobile maintenance on their own, with women now accounting for one third of this \$34 billion automotive do-it-yourself market. For new or would-be do-it-yourself mechanics, this illustrated how-to guide has long been a must and now it's even better. A complete reorganization now puts relevant repair and maintenance information directly after each automotive system overview, making it much easier to find hands-on fix-it instructions. Author Deanna Sclar has updated systems and repair information throughout, eliminating discussions of carburetors and adding coverage of hybrid and alternative fuel vehicles. She's also revised schedules for tune-ups and oil changes, included driving tips that can save on maintenance and repair costs, and added new advice on troubleshooting problems and determining when to call in a professional mechanic. For anyone who wants to save money on car repairs and maintenance, this book is the place to start. Deanna Sclar (Long Beach, CA), an acclaimed auto repair expert and consumer advocate, has contributed to the Los Angeles Times and has been interviewed on the Today show, NBC Nightly News, and other television programs.

With vivid photography and insightful commentary, this travel pictorial shines a light on the Buddhist art and architecture of Borobudur. The glorious ninth-century Buddhist stupa of Borobudur—the largest Buddhist monument in the world—stands in the midst of the lush Kedu Plain of Central Java in Indonesia, where it is visited annually by over a million people. Borobudur contains more than a thousand exquisitely carved relief panels extending along its many terraces for a total distance of more than a kilometer. These are arranged so as to take the visitor on a spiritual journey to enlightenment, and one ascends the monument past scenes depicting the world of desire, the life story of Buddha, and the heroic deeds of other enlightened beings—finally arriving at the great circular terraces at the top of the structure that symbolizes the formless world of pure knowledge and

perfection.

Glutton, demon of destruction, symbol of slaughter, mightiest of wilderness villains... The wolverine comes marked with a reputation based on myth and fancy. Yet this enigmatic animal is more complex than the legends that surround it. With a shrinking wilderness and global warming, the future of the wolverine is uncertain. The Wolverine Way reveals the natural history of this species and the forces that threaten its future, engagingly told by Douglas Chadwick, who volunteered with the Glacier Wolverine Project. This five-year study in Glacier National Park - which involved dealing with blizzards, grizzlies, sheer mountain walls, and other daily challenges to survival - uncovered key missing information about the wolverine's habitat, social structure and reproduction habits. Wolverines, according to Chadwick, are the land equivalent of polar bears in regard to the impacts of global warming. The plight of wolverines adds to the call for wildlife corridors that connect existing habitat that is proposed by the Freedom to Roam coalition.

Diagnostics, or fault finding, is a fundamental part of an automotive technician's work, and as automotive systems become increasingly complex there is a greater

need for good diagnostic skills. Advanced Automotive Fault Diagnosis is the only book to treat automotive diagnostics as a science rather than a check-list procedure. Each chapter includes basic principles and examples of a vehicle system followed by the appropriate diagnostic techniques, complete with useful diagrams, flow charts, case studies and self-assessment questions. The book will help new students develop diagnostic skills and help experienced technicians improve even further. This new edition is fully updated to the latest technological developments. Two new chapters have been added – On-board diagnostics and Oscilloscope diagnostics – and the coverage has been matched to the latest curricula of motor vehicle qualifications, including: IMI and C&G Technical Certificates and NVQs; Level 4 diagnostic units; BTEC National and Higher National qualifications from Edexcel; International Motor Vehicle qualifications such as C&G 3905; and ASE certification in the USA.

In this new view of the Citroen story, automotive/aviation writer and design specialist Lance Cole investigates not just the details of the cars of Citroen, but the aeronautical and cultural origins that lay behind Citroen's form and function. The book digs deep into the ethos of Automobiles Citroen to create a narrative on one of the greatest car manufacturers in history. Using interviews, translations, archive documents and specially-commissioned photographs, the Citroen journey is cast in a fresh perspective. It explains in detail the influences upon Citroen design: Voisin, Lefebvre, Bertoni, Boulanger, Mages, Opron and recent Citroen designers such as Coco, Blakeslee and Soubirou. As well as all the men of the great period of 1920s-1970s expansion, it also cites less well-known names of Citroen's French engineering, design, and influence such as Cayla, Gerin, Giret, Harmand, Dargent and others, to give a full picture of Citroen heritage. The book provides in-depth analysis of all major Citroen models with an engineering and design focus and profiles key individuals and cars up to the present day and Citroen's 'DS'-branded resurgence. It features many newly commissioned photographs, rare archive drawings and interviews with Citroen owners. Researched amongst leading Citroen experts and restorers, Lance Cole provides a fresh perspective on the Citroen car manufacturer, its design language and the legacy of its extraordinary engineering which will be of great interest to all Citroen and motoring enthusiasts. Superbly illustrated with 329 colour photographs, many newly commissioned along with rare archive drawings.

"Who Is God?" is a Bible Lesson Series that attempts to help the reader understand the character of God. Many people go through life knowing about God, but not fully knowing and understanding His true character. In these lessons, you will learn some of the names of God as they describe who God is and what He means in our lives.

Dark Halo

In a town besieged by shadowy, demonic forces, a father races against time to save his family. Thirty-five-year old Landon Paddock has deserted his wife and daughter, abandoned his business, and secluded himself in his late parent's southern Indiana ranch. But he's barely lapsed into a drunken coma when a mysterious, winged stranger appears during a violent lightning storm, chasing him out into the maddening night with his estranged 15-year old daughter. As layer after layer of reality is dissolved by a series of violent encounters, the only way to survive might be for Landon to band together with the family he destroyed to make one last stand against a sinister army of unthinkable magnitude. Hope, family and redemption lay in the outcome.

Rudolf Koch

When Andy Grant's eyes blinked open from a 10-day coma in February 2009 he was alone in a hospital bed in Birmingham. He had a broken sternum, a broken leg, a broken elbow and shrapnel lodged in both forearms. He had a severed femoral artery, nerve damage to his hands and feet as well as deep gaping wounds in both

of his cheeks. He had been blown up during a routine foot patrol in Afghanistan. Within days of coming to his senses, a doctor told Andy that because of the blast he would no longer be able to have children. You'll Never Walk is his story. The tale of a Scouser who had to cope with losing his mum at the tender age of 12. The story of how a dream career in the Royal Marines descended into nightmare at the hands of the Taliban. The painstaking account of how he grew back six centimetres of shattered bone in his leg and learned to walk again. However, Andy wanted to run and push himself to the very edge of his limits and so he made a colossal decision. Against doctor's advice and pleas from his father, he chose to have his leg amputated. The operation was a success, although there was a minor twist. Where once Andy's treasured Liverpool FC tattoo had carried the message 'You'll Never Walk Alone', surgery to create a stump removed a key word from the slogan. The scars of his amputation had been decorated with an ominous new motto, which read 'You'll Never Walk' Andy would walk again - he would do much more than that. Armed with a running blade he learned to run and play football, scaled mountains in South America and Italy and claimed two gold medals at Prince Harry's Invictus Games. Through public speaking he brought hope to people right across the country. In 2016, he set his sights on a 10k below-the-knee-amputee world-record and completed the run in an unprecedented 37 minutes 17 seconds. And, most precious of all, after every obstacle placed in his path, Andy became a father to a little girl.

The Invention of the Automobile - (Karl Benz and Gottlieb Daimler)

When the name Captain Marvel comes up most think of a boy saying a magic word or an alien who came from another planet. How many think of a robot whose arms and legs fly off when he says the word split? Well that one did exist from 1966-1967. This book collects those stories in one volume.

Split!

Citroen stunned the automotive world when the DS series was introduced in 1955. Daringly futuristic and amazingly sophisticated mechanically, it made most cars on the road at the time obsolete. John Pressnell recounts the full story of the design, development, and production of these unique cars, and offers specifications plus a wide selection of archive and contemporary photos.

“ My excuse for writing this book is a desire to ventilate certain facts in relation to the early work of Karl Benz and Gottlieb Daimler of which the public is largely ignorant. Among those who have taken the trouble to investigate the early days of the motor movement, there is a certain amount of controversy as to who invented the motor vehicle, although this question has not, at the moment, extended to the general public. Inevitably it will do so, if the prevailing interest increases, in which event, it is hoped that this book will prove useful, for all the dates and facts, etc., have been fully authenticated. There are, however, several to whom I must express my sincere gratitude for the assistance they have given me. Herr Rudolf Caracciola, the winner, during the 1935 season of motor racing, of the Grand Prix of France, Belgium, Switzerland, Spain, and Tripoli, to say nothing of other triumphs, and therefore the Champion of Europe, has most kindly written a preface after reading through the manuscript. The Daimler-Benz Aktiengesellschaft of Germany has been indefatigable in providing me with material in regard to certain facts connected with the early experiments of both Benz and Daimler. Mr. Frederick R. Simms, too, has spared no effort to help me with some of the inner details of Daimler’s engineering career.” (ST. John C. Nixon - September, 1936)
