Learn new approaches to teaching history in middle school so students are more engaged in the big ideas and eager to examine the world around them. Co-published by Routledge and MiddleWeb, this practical guide will help you consider the unique needs of middle schoolers, who are in the midst of many social and emotional changes and need to see why the study of history matters to their own lives. Author Jody Passanisi shares helpful strategies and activities to make your social studies class a place where students can relate to the material, connect past history to present events, collaborate with others, think critically about important issues, and take ownership of their learning. Topics include: Reading and analyzing primary and secondary sources for deeper comprehension of historical issues Developing a written argument and defending it with supporting details and cited sources Examining the social context of a historical event and tracing the historical underpinnings of present day issues Using field trips, games, and Project Based Learning to make learning history a fun and interactive experience Assessing your students' progress using self-reflection, projects, essays, and presentations The

appendices offer resources for each of the topics covered in the book as well as reproducible Blackline Masters of the charts and diagrams, which can be photocopied or downloaded from our website (http://www.routledge.com/products/9781138639713) for classroom use.

The Literary Digest

The present study aims at examining the portrayal of women in Charlotte Bronte's Shirley. The study is divided into four chapters in addition to a conclusion. Chapter One: casts light on Charlotte Bronte as one of the most prominent female novelists in the nineteenth century. It also traces Charlotte Bronte as a subjective novelist who is concerned to convey a subjective impression. Chapter Two: provides a historical and critical background of her age in which she matured and originated the main literary tendencies which affected and swayed her and decided the expression and manner of her writings. Chapter Three: traces Charlotte Bronte's Contribution, Reputation and Influence. Moreover, Charlotte Bronte's writing is a powerful agent in her effect. Chapter Four : is devoted to the portrayal of women in Charlotte Bronte's Shirley, in which Charlotte Bronte sets up moral, spiritual and social problems such as the position of women, but evades a solution to the complications by dropping the problem and substituting the conventional solution of marriage.

The Sound of Applause

Why have certain kinds of documentary and non-narrative films emerged as the most interesting, exciting, and provocative movies made in the last twenty years?

Ranging from the films of Ross McElwee (Bright Leaves) and Agn?s Varda (The Gleaners and I) to those of Abbas Kiarostami (Close Up) and Ari Folman (Waltz with Bashir), such films have intrigued viewers who at the same time have struggled to categorize them. Sometimes described as personal documentaries or diary films, these eclectic works are, rather, best understood as cinematic variations on the essay. So argues Tim Corrigan in this stimulating and necessary new book. Since Michel de Montaigne, essays have been seen as a lively literary category, and yet--despite the work of pioneers like Chris Marker--seldom discussed as a cinematic tradition. The Essay Film, offering a thoughtful account of the long rapport between literature and film as well as novel interpretations and theoretical models, provides the ideas that will change this.

Microsoft Expression Blend Unleashed is about learning a new tool for designers, but also learning a new mindset for developers. Expression Blend enables the delivery of rich interactive applications, for the web as well as the desktop, allowing you to take graphical assets and blend them with functional .NET code through the power of XAML and the WPF platform. Microsoft Expression Blend Unleashed also features a C# Primer, introducing designers to the .NET Framework. .NET allows the reader to extend the functionality of many of the WPF elements used in Expression Blend. The most important concept for the reader to grasp is that Blend and Visual Studio together are about facilitating the kind of user experience everyone wants from the applications they use. This book will give you the skill set whether you are a designer or developer; from there, you just need to use a little imagination. Detailed information on how to… Design and develop WPF applications Use Blend's animation workflows Design and implement WPF template types Create and manage Resource Dictionaries Master WPF Style templates Handle control events Understand advanced control properties in XAML/Blend/C# Create customized controls through inheritance Understand the

fundamentals of XAML-based design and development Implement effective XML, CLR Data binding, and XAML template binding Extend XAML functionality with C# code Implement video and audio in your applications Use Blend as part of your designer/developer workflow

A theory for psychologists on the role of memory in personality psychology. In The Remembered Self, Jefferson A. Singer and Peter Salovey persuasively argue that memories are an important window into one's life story, revealing characteristic moods, motives, and thinking patterns. Through experimental evidence, clinical case material, and examples from literature, the authors offer a fresh perspective on the role of memory in personality and clinical psychology. Unlike the conventional psychoanalytic approach to memory, which concentrates on what is forgotten, Singer and Salovey treat memory in a new and different way with an emphasis on what is remembered. Theirs is a bold new theory of memory and self that is both comprehensive and accessible.

for Contemporary Economics. The lesson-plan format is incorporated right in the margins, providing the tools you need to lead students from learning to applying to owning the economic material. All solutions are included in the margins, as well as additional ideas, background, and projects for different learning styles and ability levels. Unit Overviews contain pacing guides and identify coverage of NCEE standards in the upcoming chapters.

Human-Experiential Design of Presence in Everyday Blended Reality

"A fascinating account of the gathering and dissemination of news from the end of the Middle Ages to the French Revolution" and the rise of the newspaper (Glenn Altschuler, The Huffington Post). Long before the invention of printing, let alone the daily newspaper, people wanted to stay informed. In the pre-industrial era, news was mostly shared through gossip, sermons, and proclamations. The age of print brought pamphlets, ballads, and the first news-sheets. In this groundbreaking history, renowned historian Andrew Pettegree tracks the evolution of news in ten countries over the course of four centuries, examining the impact of news media on contemporary events and the lives of an ever-more-informed public. The Invention of News sheds light on who controlled the news and who reported it; the use of news as a tool of political protest and religious reform; issues of privacy and

titillation; the persistent need for news to be current and for journalists to be trustworthy; and people's changing sense of themselves and their communities as they experienced newly opened windows on the world. "This expansive view of news and how it reached people will be fascinating to readers interested in communication and cultural history." —Library Journal (starred review)

Filling the gap for a reference dedicated to the characterization of polymer blends and their micro and nano morphologies, this book provides comprehensive, systematic coverage in a one-stop, two-volume resource for all those working in the field. Leading researchers from industry and academia, as well as from government and private research institutions around the world summarize recent

technical advances in chapters devoted to their individual contributions. In so doing, they examine a wide range of modern characterization techniques, from microscopy and spectroscopy to diffraction, thermal analysis, rheology, mechanical measurements and chromatography. These methods are compared with each other to assist in determining the best solution for both fundamental and applied problems, paying attention to the characterization of nanoscale miscibility and interfaces, both in blends involving copolymers and in immiscible blends. The thermodynamics, miscibility, phase separation, morphology and interfaces in polymer blends are also discussed in light of new insights involving the nanoscopic scale. Finally, the authors detail the processing-morphology-property relationships of polymer blends, as well as the influence of processing on the generation of micro and nano morphologies, and the dependence of these morphologies on the properties of blends. Hot topics such as compatibilization through nanoparticles, miscibility of new biopolymers and nanoscale investigations of interfaces in blends are also addressed. With its application-oriented approach, handpicked selection of topics and expert contributors, this is an outstanding survey for anyone involved in the field of polymer blends for advanced technologies.

This book explores how our lives and social interactions have become split between two intertwined, but not integrated, realities: the physical and the digital. Our sense of presence in the here and now has become fragmented, and yet earlier design approaches reinforced the problem, rather than leading to improvements. The authors address these issues by laying out a new human computer interaction (HCI) design approach – human-experiential design – rooted in a return to first principles of how people understand the world, both consciously and unconsciously. The application of this approach to the design of blended reality spaces is described in detail. Examples and scenarios of designing them to overcome the problems inherent in a variety of mixed reality settings are provided. Human-Experiential Design of Presence in Everyday Blended Reality will appeal to undergraduate and graduate students and researchers in interaction design, psychology, HCI and computer application studies, as well as practicing interaction designers and computer professionals. It will also be of interest to communication, media and urban design students, and to all readers with an interest in the technology-mediated future.

Current Trends in Greek Linguistics is a collection of fifteen papers written by junior researchers of Greek linguistics, aiming to highlight the ongoing linguistic research on Greek. The collected papers present original research from a fresh perspective, and bring to the fore aspects of the Greek language that have not been extensively examined so far. The authors provide a concise overview of their field and address problems in a variety of theoretical frameworks, including cognitive linguistics, formal linguistics, corpus linguistics, variational sociolinguistics and critical discourse analysis. The volume comprises four sections: Aspects of Meaning, Textual and Sociolinguistic Approaches, Phonetics and Phonology, and Clinical Linguistics and Language Teaching. The first section includes chapters exploring

lexical temporal expressions, the conceptualisation of time and the semantic properties of the subjunctive mood. The second section discusses issues relating to adjective evaluation, strategies of verbal humour, the role of social variables, media and political discourse. The section on phonetics and phonology includes three experimental studies that explore segmental and supra-segmental phenomena. The last section of the volume combines papers from two different fields, dealing with aphasic speech and the teaching of idioms. This collection of papers will appeal to researchers, students of linguistics and educators who are interested in Greek and/or the implications of its study for other languages and linguistic theory.

Affective Publics

Over the past few decades, we have witnessed the growth of movements using digital means to connect with broader interest groups and express their points of view. These movements emerge out of distinct contexts and yield different outcomes, but tend to share one thing in common: online and offline solidarity shaped around the public display of emotion. Social media facilitate feelings of

engagement, in ways that frequently make people feel re-energized about politics. In doing so, media do not make or break revolutions but they do lend emerging, storytelling publics their own means for feeling their way into events, frequently by making those involved a part of the developing story. Technologies network us but it is our stories that connect us to each other, making us feel close to some and distancing us from others. Affective Publics explores how storytelling practices facilitate engagement among movements tuning into a current issue or event by employing three case studies: Arab Spring movements, various iterations of Occupy, and everyday casual political expressions as traced through the archives of trending topics on Twitter. It traces how affective publics materialize and disband around connective conduits of sentiment every day and find their voice through the soft structures of feeling sustained by societies. Using original quantitative and qualitative data, Affective Publics demonstrates, in this groundbreaking analysis, that it is through these soft structures that affective publics connect, disrupt, and feel their way into everyday politics.

Standard literary criticism tends to either ignore or downplay the unorthodox tradition of black experimental writing that emerged in the wake of protests against colonization and Jim Crow–era segregation. Histories of African American literature likewise have a hard time accounting for the distinctiveness of experimental writing, which is part of a general shift in emphasis among black writers away from appeals for social recognition or raising consciousness. In Freedom Time, Anthony Reed offers a theoretical reading of "black experimental

writing" that presents the term both as a profound literary development and as a concept for analyzing how writing challenges us to rethink the relationships between race and literary techniques. Through extended analyses of works by African American and Afro-Caribbean writersâ€"including N. H. Pritchard, Suzan-Lori Parks, NourbeSe Philip, Kamau Brathwaite, Claudia Rankine, Douglas Kearney, Harryette Mullen, and Nathaniel Mackeyâ€"Reed develops a new sense of the literary politics of formally innovative writing and the connections between literature and politics since the 1960s. Freedom Time reclaims the power of experimental black voices by arguing that readers and critics must see them as more than a mere reflection of the politics of social protest and identity formation. With an approach informed by literary, cultural, African American, and feminist studies, Reed shows how reworking literary materials and conventions liberates writers to push the limits of representation and expression.

This comprehensive resource highlights the most recent practices and trends in blended learning from a global perspective and provides targeted information for specific blended learning situations. You'll find examples of learning options that combine face-to-face instruction with online learning in the workplace, more formal

academic settings, and the military. Across these environments, the book focuses on real-world practices and includes contributors from a broad range of fields including trainers, consultants, professors, university presidents, distance-learning center directors, learning strategists and evangelists, general managers of learning, CEOs, chancellors, deans, and directors of global talent and organizational development. This diversity and breadth will help you understand the wide range of possibilities available when designing blended learning environments. Order your copy today!
