Bernard Rosner's FUNDAMENTALS OF BIostatISTICS is a practical introduction to the methods, techniques, and computation of statistics with human subjects. It prepares students for their future courses and careers by introducing the statistical methods most often used in medical literature. Rosner minimizes the amount of mathematical formulation (algebra-based) while still giving complete explanations of all the important concepts. As in previous editions, a major strength of this book is that every new concept is developed systematically through completely worked out examples from current medical research problems. Most methods are illustrated with specific instructions as to implementation using software either from SAS, Stata, R, Excel or Minitab. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Pathways of the Pulp

San Francisco's residential real estate is the hottest market for buyers and sellers in the country. If you're planning on entering the market, you may need the advice of real estate agent Malcolm Kaufman (BRE#01310392). For ten years, Kaufman has chronicled the region's real estate market. Through this publication, he has educated buyers on how to save money and sellers on how to maximize their profit. For the first time, these articles are now collected into one book-with sections dedicated to topics like changing neighborhoods, the factors driving San Francisco real estate, and what to keep in mind when buying/selling a home. Pulse of the Market offers an array of valuable information from an insider who knows both ends of the spectrum. So whether you're a buyer or a seller, Kaufman can help you make more informed decisions and negotiate a better deal. Just like his monthly newsletters, Kaufman's book is both concise and entertaining. A San Francisco resident, he knows what makes the area's real estate market tick-bringing his extensive knowledge in this one-of-a-kind guide to the hottest market around.
