Millard's Review of the Far East

During the nineteenth century, railway lines spread rapidly across Europe, linking the continent in ways unimaginable to previous generations. By the beginning of the twentieth century the great cities of the continent were linked by a complex and extensive rail network. Yet this high-point of interconnectivity, was abruptly cut-off after 1945, as the Cold War built barriers - both physical and ideological - between east and west. In this volume, leading transport history scholars take a fresh look at this situation, and the ramifications it had for Europe. As well as addressing the parallel development of railways either side of the Iron Curtain, the book looks at how transport links have been reconnected and reconfigured in the twenty years since the reunification of Europe. In particular, it focuses upon the former communist countries and how they have responded to the challenges and opportunities railways offer both nationally and internationally. Including contributions from historians, researchers, policy makers, representatives of railway companies and railway museum staff, the essays in this collection touch upon a rich range of subjects. Divided into four sections: 'The Historical Overview', 'Under Russian Protection', 'After the Fall of the Iron Curtain', and 'The Heritage of Railways in Eastern Europe' the volume offers a broadly chronological introduction to the issue, that provides both a snap-shot of current debates and a starting point for further research. It concludes that in an era of increased globalisation and interconnectivity - and despite the rise of air and road transport and virtual methods of communication - railways still have a crucial role to play in the development of a prosperous and connected Europe.

The Railways are the basic infrastructure that helps in the growth and development of the economy of any country. Along with providing better and convenient transportation facilities, Indian Railways is also providing employment opportunities to the youths of our country. The Indian Railways is one of the largest employment providing sectors in India. The Railway Recruitment Board (RRB) is a centralized recruiting agency that recruits railway employees through its various Railway Recruitment Cells (RRCs). The RRB is under the direct control of the Ministry of Railways, Government of India. The Railway Recruitment Board (RRB) has invited online applications from eligible candidates for more than 1 lakh vacancies under Group D posts.
