forfeiture and reissue of shares; Liquidation of companies; Acquisition, merger, amalgamation and reconstruction of companies □ Holding company accounts □ Cost and Management Accounting: Marginal costing and Break-even analysis; Standard costing; Budgetary control; Process costing; Activity Based Costing (ABC); Costing for decision-making; Life cycle costing, Target costing, Kaizen costing and JIT □ Financial Statements Analysis: Ratio analysis; Funds flow Analysis; Cash flow analysis □ Human Resources Accounting; Inflation Accounting; Environmental Accounting □ Indian Accounting Standards and IFRS □ Auditing: Independent financial audit; Vouching; Verification and valuation of assets and liabilities; Audit of financial statements and audit report; Cost audit □ Recent Trends in Auditing: Management audit; Energy audit; Environment audit; Systems audit; Safety audit Unit 3: Business Economics □ Meaning and scope of business economics □ Objectives of business firms □ Demand analysis: Law of demand; Elasticity of demand and its measurement; Relationship between AR and MR □ Consumer behavior: Utility analysis; Indifference curve analysis □ Law of Variable Proportions: Law of Returns to Scale □ Theory of cost: Short-run and long-run cost curves □ Price determination under different market forms: Perfect competition; Monopolistic competition; Oligopoly- Price leadership model; Monopoly; Price discrimination □ Pricing strategies: Price skimming; Price penetration; Peak load pricing Unit 4: Business Finance □ Scope and sources of finance; Lease financing □ Cost of capital and time value of money □ Capital structure □ Capital budgeting decisions: Conventional and scientific

techniques of capital budgeting analysis □ Working capital management; Dividend decision: Theories and policies □ Risk and return analysis; Asset securitization □ International monetary system □ Foreign exchange market; Exchange rate risk and hedging techniques □ International financial markets and instruments: Euro currency; GDRs; ADRs □ International arbitrage; Multinational capital budgeting Unit 5: Business Statistics and Research Methods □ Measures of central tendency □ Measures of dispersion □ Measures of skewness □ Correlation and regression of two variables □ Probability: Approaches to probability; Bayes' theorem □ Probability distributions: Binomial, poisson and normal distributions □ Research: Concept and types; Research designs □ Data: Collection and classification of data □ Sampling and estimation: Concepts; Methods of sampling - probability and non-probability methods; Sampling distribution; Central limit theorem; Standard error; Statistical estimation □ Hypothesis testing: z-test; t-test; ANOVA; Chi-square test; Mann-Whitney test (U-test); Kruskal-Wallis test (H-test); Rank correlation test □ Report writing Unit 6: Business Management and Human Resource Management □ Principles and functions of management □ Organization structure: Formal and informal organizations; Span of control □ Responsibility and authority: Delegation of authority and decentralization □ Motivation and leadership: Concept and theories □ Corporate governance and business ethics □ Human resource management: Concept, role and functions of HRM; Human resource planning; Recruitment and selection; Training and development; Succession planning □ Compensation

management: Job evaluation; Incentives and fringe benefits □ Performance appraisal including 360 degree performance appraisal □ Collective bargaining and workers' participation in management □ Personality: Perception; Attitudes; Emotions; Group dynamics; Power and politics; Conflict and negotiation; Stress management □ Organizational Culture: Organizational development and organizational change

Unit 7: Banking and Financial Institutions □ Overview of Indian financial system □ Types of banks: Commercial banks; Regional Rural Banks (RRBs); Foreign banks; Cooperative banks □ Reserve Bank of India: Functions; Role and monetary policy management □ Banking sector reforms in India: Basel norms; Risk management; NPA management □ Financial markets: Money market; Capital market; Government securities market □ Financial Institutions: Development Finance Institutions (DFIs); Non-Banking Financial Companies (NBFCs); Mutual Funds; Pension Funds □ Financial Regulators in India □ Financial sector reforms including financial inclusion □ Digitisation of banking and other financial services: Internet banking; mobile banking; Digital payments systems □ Insurance: Types of insurance- Life and Non-life insurance; Risk classification and management; Factors limiting the insurability of risk; Re-insurance; Regulatory framework of insurance- IRDA and its role

Unit 8: Marketing Management □ Marketing: Concept and approaches; Marketing channels; Marketing mix; Strategic marketing planning; Market segmentation, targeting and positioning □ Product decisions: Concept; Product line; Product mix decisions; Product life cycle; New product development □ Pricing decisions: Factors affecting price determination;

Pricing policies and strategies □ Promotion decisions: Role of promotion in marketing; Promotion methods - Advertising; Personal selling; Publicity; Sales promotion tools and techniques; Promotion mix □ Distribution decisions: Channels of distribution; Channel management □ Consumer Behaviour; Consumer buying process; factors influencing consumer buying decisions □ Service marketing □ Trends in marketing: Social marketing; Online marketing; Green marketing; Direct marketing; Rural marketing; CRM □ Logistics management Unit 9: Legal Aspects of Business □ Indian Contract Act, 1872: Elements of a valid contract; Capacity of parties; Free consent; Discharge of a contract; Breach of contract and remedies against breach; Quasi contracts; □ Special contracts: Contracts of indemnity and guarantee; contracts of bailment and pledge; Contracts of agency □ Sale of Goods Act, 1930: Sale and agreement to sell; Doctrine of Caveat Emptor; Rights of unpaid seller and rights of buyer □ Negotiable Instruments Act, 1881: Types of negotiable instruments; Negotiation and assignment; Dishonour and discharge of negotiable instruments □ The Companies Act, 2013: Nature and kinds of companies; Company formation; Management, meetings and winding up of a joint stock company □ Limited Liability Partnership: Structure and procedure of formation of LLP in India □ The Competition Act, 2002: Objectives and main provisions □ The Information Technology Act, 2000: Objectives and main provisions; Cyber crimes and penalties □ The RTI Act, 2005: Objectives and main provisions □ Intellectual Property Rights (IPRs) : Patents, trademarks and copyrights; Emerging issues in

intellectual property □ Goods and Services Tax (GST): Objectives and main provisions; Benefits of GST; Implementation mechanism; Working of dual GST Unit 10: Income-tax and Corporate Tax Planning □ Income-tax: Basic concepts; Residential status and tax incidence; Exempted incomes; Agricultural income; Computation of taxable income under various heads; Deductions from Gross total income; Assessment of Individuals; Clubbing of incomes □ International Taxation: Double taxation and its avoidance mechanism; Transfer pricing □ Corporate Tax Planning: Concepts and significance of corporate tax planning; Tax avoidance versus tax evasion; Techniques of corporate tax planning; Tax considerations in specific business situations: Make or buy decisions; Own or lease an asset; Retain; Renewal or replacement of asset; Shut down or continue operations □ Deduction and collection of tax at source; Advance payment of tax; E-filing of income-tax returns

Economics DeMYSTiFieD

Proceedings of the 11th European Conference on Research Methods in Bolton, UK, on 28-29 June 2011

International Handbook on Teaching and Learning Economics

Consumer Credit and the American Economy examines the economics, behavioral science, sociology, history, institutions, law, and regulation of consumer credit in the United States. After discussing

the origins and various kinds of consumer credit available in today's marketplace, this book reviews at some length the long run growth of consumer credit to explore the widely held belief that somehow consumer credit has risen "too fast for too long." It then turns to demand and supply with chapters discussing neoclassical theories of demand, new behavioral economics, and evidence on production costs and why consumer credit might seem expensive compared to some other kinds of credit like government finance. This discussion includes review of the economics of risk management and funding sources, as well discussion of the economic theory of why some people might be limited in their credit search, the phenomenon of credit rationing. This examination includes review of issues of risk management through mathematical methods of borrower screening known as credit scoring and financial market sources of funding for offerings of consumer credit. The book then discusses technological change in credit granting. It examines how modern automated information systems called credit reporting agencies, or more popularly "credit bureaus," reduce the costs of information acquisition and permit greater credit availability at less cost. This discussion is followed by examination of the logical offspring of technology, the ubiquitous credit card that permits consumers access to both payments and credit services worldwide virtually instantly. After a chapter on institutions that have arisen to supply credit to individuals for whom mainstream credit is often unavailable, including "payday loans" and other small dollar sources of loans, discussion turns to legal structure and the regulation of consumer credit.

There are separate chapters on the theories behind the two main thrusts of federal regulation to this point, fairness for all and financial disclosure. Following these chapters, there is another on state regulation that has long focused on marketplace access and pricing. Before a final concluding chapter, another chapter focuses on two noncredit marketplace products that are closely related to credit. The first of them, debt protection including credit insurance and other forms of credit protection, is economically a complement. The second product, consumer leasing, is a substitute for credit use in many situations, especially involving acquisition of automobiles. This chapter is followed by a full review of consumer bankruptcy, what happens in the worst of cases when consumers find themselves unable to repay their loans. Because of the importance of consumer credit in consumers' financial affairs, the intended audience includes anyone interested in these issues, not only specialists who spend much of their time focused on them. For this reason, the authors have carefully avoided academic jargon and the mathematics that is the modern language of economics. It also examines the psychological, sociological, historical, and especially legal traditions that go into fully understanding what has led to the demand for consumer credit and to what the markets and institutions that provide these products have become today.

Handbook of the Economics of International Migration

Contains articles on the economic history of Europe and the US, including "Air Conditioning, Migration and Climate-related Wage and Rent Differentials"; "The Rail-Guided Vehicles Industry in Italy, 1861-1913: the Burden of the Evidence"; "English Banking and Payments before 1826"; and, "The Great Fortunes of the Gilded Age and the Crisis of 1893".

NTSE ULTIMATE Resource Guide for Stage 1 (9 State 2012 Papers + 2 Mock Papers)

The International Handbook on Teaching and Learning Economics is a power packed resource for anyone interested in investing time into the effective improvement of their personal teaching methods, and for those who desire to teach students how to think like an economist. It sets guidelines for the successful integration of economics into a wide variety of traditional and non-traditional settings in college and graduate courses with some attention paid to primary and secondary classrooms. . . The International Handbook on Teaching and Learning Economics is highly recommended for all economics instructors and individuals supporting economic education in courses in and outside of the major. This Handbook provides a multitude of rich resources that make it easy for new and veteran instructors to improve their instruction in ways promising to excite an increasing number of students about learning economics. This Handbook should be on every instructor's desk and referenced regularly. ð Tawni Hunt Ferrarini, The American Economist ð In delightfully readable short chapters by leaders in the sub-fields who are also committed teachers, this encyclopedia of how and what in teaching economics covers everything. There is nothing else like it, and it should be required reading for anyone starting a teaching career ð and for anyone who has been teaching for fewer than 50 years! ð Daniel S. Hamermesh, University of Texas,

Austin, US The International Handbook on Teaching and Learning Economics provides a comprehensive resource for instructors and researchers in economics, both new and experienced. This wide-ranging collection is designed to enhance student learning by helping economic educators learn more about course content, pedagogic techniques, and the scholarship of the teaching enterprise. The internationally renowned contributors present an exhaustive compilation of accessible insights into major research in economic education across a wide range of topic areas including: ¥ Pedagogic practice Đ teaching techniques, technology use, assessment, contextual techniques, and K-12 practices. ¥ Research findings Đ principles courses, measurement, factors influencing student performance, evaluation, and the scholarship of teaching and learning. ¥ Institutional/administrative issues Đ faculty development, the undergraduate and graduate student, and international perspectives. ¥ Teaching enhancement initiatives Đ foundations, organizations, and workshops. Grounded in research, and covering past and present knowledge as well as future challenges, this detailed compendium of economics education will prove an invaluable reference tool for all involved in the teaching of economics: graduate students, new teachers, lecturers, faculty, researchers, chairs, deans and directors.

The Theory of Value and Distribution in Economics

In recent years, the term 'transparency' has emerged as one of the most popular and keenly-touted concepts around. In the economic-political debate, the principle of transparency is often advocated as a prerequisite for accountability, legitimacy, policy efficiency, and good governance, as well as a universal remedy against corruption, corporate and political scandals, financial crises, and a host of other problems. But transparency is more than a mere catch-phrase. Increased transparency is a bearing ideal behind regulatory reform in many areas, including financial reporting and banking regulation. Individual governments as well as multilateral bodies have launched broad-based initiatives to enhance transparency in both economic and other policy domains. Parallel to these developments, the concept of transparency has seeped its way into academic research in a wide range of social science disciplines, including the economic sciences. This increased importance of transparency in economics and business studies has called for a reference work that surveys existing research on transparency and explores its meaning and significance in different areas. The Oxford Handbook of Economic and Institutional Transparency is such a reference. Comprised of authoritative yet accessible contributions by leading scholars, this Handbook addresses questions such as: What is transparency? What is the rationale for transparency? What are the determinants and the effects of transparency? And is transparency always beneficial, or can it also be detrimental (if so, when)? The chapters are presented in three sections that correspond to three broad

themes. The first section addresses transparency in different areas of economic policy. The second section covers institutional transparency and explores the role of transparency in market integration and regulation. Finally, the third section focuses on corporate transparency. Taken together, this volume offers an up-to-date account of existing work on and approaches to transparency in economic research, discusses open questions, and provides guidance for future research, all from a blend of disciplinary perspectives.

IAS Prelims Magic 2013 (Paper 1)

What new theories, evidence, explanations, and policies have shaped our studies of income distribution in the 21st century? Editors Tony Atkinson and Francois Bourguignon assemble the expertise of leading authorities in this survey of substantive issues. In two volumes they address subjects that were not covered in Volume 1 (2000), such as education, health and experimental economics; and subjects that were covered but where there have been substantial new developments, such as the historical study of income inequality and globalization. Some chapters discuss future growth areas, such as inheritance, the links between inequality and macro-economics and finance, and the distributional implications of climate change. They also update empirical advances and major changes in the policy environment. The volumes define and organize key areas of income distribution studies. Contributors focus on identifying newly developing

questions and opportunities for future research The authoritative articles emphasize the ways that income mobility and inequality studies have recently gained greater political significance

UPSC Mains HISTORY (Optional) Question Papers

The winners of the Nobel Prize in Economics upend the most common assumptions about how economics works in this gripping and disruptive portrait of how poor people actually live. Why do the poor borrow to save? Why do they miss out on free life-saving immunizations, but pay for unnecessary drugs? In *Poor Economics*, Abhijit V. Banerjee and Esther Duflo, two award-winning MIT professors, answer these questions based on years of field research from around the world. Called "marvelous, rewarding" by the Wall Street Journal, the book offers a radical rethinking of the economics of poverty and an intimate view of life on 99 cents a day. *Poor Economics* shows that creating a world without poverty begins with understanding the daily decisions facing the poor.

Journal of Agricultural and Applied Economics

This new volume explores two alternative economic theories - the classical theory and the marginalist or neoclassical theory- through a discussion between two eminent economists, Pierangelo Garegnani and Paul Samuelson. The key themes of the volume are the difference in approaches to the explanation of the distribution of income and relative prices, and therefore different approaches to all other economic problems, in particular capital accumulation and economic growth. The book discusses whether there is a 'classical' approach to the theory of value and distribution at the core of economic theory that is fundamentally different from the later marginalist or neoclassical theory. In the volume, the late Pierangelo Garegnani argues for the validity of Piero Sraffa's position on this issue, whilst the late noble laureate Paul Samuelson vehemently contests it. At a time of economic crisis, the future of the discipline is far from certain, and so it is extremely important to bring these debates back into the light, by reproducing

them together for the first time. A comprehensive introduction by Heinz Kurz sets the debate in this context, and provides crucial background to the arguments.

Poor Economics

The examiner-reviewed P5 Revision Kit contains many past exam questions. It also includes an excellent 'Passing P5' section, which provides specific guidance relating to the exam. Areas the examiner favours, such as performance measures are emphasised. Also included are the examiner's own comments on past questions as well as the examiner's own answers at the back of the Kit.

Agricultural Finance Review

Some of the key benefits of studying from Oswaal Question Banks are: • Chapter-wise/ Topic-wise presentation for systematic and methodical study •

Strictly based on the Reduced CBSE Curriculum issued for Academic Year 2020-2021, following the latest NCERT Textbook and Exemplar • Previous Years' Question Papers with Marking Scheme & Toppers' Answers for exam-oriented study • Remembering, Understanding, Application, Analysing & Evaluation and Creation Based Question based on Bloom's Taxonomy for cognitive skills development • Latest Typologies of Questions developed by Oswaal Editorial Board included • Mind Maps in each chapter for making learning simple • 'Most likely Questions' generated by Oswaal Editorial Board with 100+ years of teaching experience • Suggested videos at the end of each chapter for a Hybrid Learning Experience

IMPORTANT FEATURES OF THE BOOK: Self-Study Mode • Chapter wise/Topic wise Previous Years' Board Examination Questions to facilitate focused study • Latest Board solved paper along with Marking Scheme and Handwritten Topper's Answers for practice Exam Preparatory Material • Answers of CBSE Marking Scheme up to March 2019 Exam with detailed explanations to score full marks in exams • Answering Tips & Commonly Made Errors for clearer thinking All-In-One • Revision notes, Mind Maps & Grammar charts facilitate quick revision of chapters • NCERT & Oswaal 150+ concept videos for digital learning

AQA A2 Economics Student Unit Guide New Edition: Unit 3 Business Economics and the Distribution of Income

The economic literature on international migration interests policymakers as well as academics

throughout the social sciences. These volumes, the first of a new subseries in the Handbooks in Economics, describe and analyze scholarship created since the inception of serious attention began in the late 1970s. This literature appears in the general economics journals, in various field journals in economics (especially, but not exclusively, those covering labor market and human resource issues), in interdisciplinary immigration journals, and in papers by economists published in journals associated with history, sociology, political science, demography, and linguistics, among others. Covers a range of topics from labor market outcomes and fiscal consequences to the effects of international migration on the level and distribution of income – and everything in between. Encompasses a wide range of topics related to migration and is multidisciplinary in some aspects, which is crucial on the topic of migration Appeals to a large community of scholars interested in this topic and for whom no overviews or summaries exist
