## Modern Music and Musicians

Current teaching, learning and assessment practices can lead students to believe that courses within a programme are self-sufficient and separate. Integrative Learning explores this issue, and considers how intentional learning helps students become integrative thinkers who can see connections in seemingly disparate information, and draw on a wide range of knowledge to make decisions. Written by international contributors who engaged reflectively with their teaching and their students' learning, the book seeks to develop a shared language of integrative learning, encouraging students to adapt skills learned in one situation to problems encountered in another, and make autonomous connections across courses, between experiences, and throughout their lives. More informed teachers can help students develop the necessary attributes for intentional learning, which include having a sense of purpose, fitting fragmentary information into a 'learning framework', understanding something of their own learning processes, asking probing questions, reflecting on their own choices, and knowing when to ask for help. Integrative Learning draws on international research and vast studies to provide the reader with the resources to ensure access to a unified learning experience. The book discusses conceptual and technical tools necessary for facilitating integrative learning across a range of disciplines as well as providing learning pedagogies and considers integrative learning in the context of the

relevance of higher education in the complexity and uncertainty of the 21st century. It will appeal to academics and researchers in the field of higher education, as well as those generating higher education curriculums.

Focusing on operatic criticism, this work is of interest to students and lovers of opera.

### **Integrative Learning**

This is a book that looks at how drama has its basis in good early years practice. Most early years practitioners are doing some drama and are edging towards more structured work - this text will help them go further by building their own skills. Using tried and tested example dramas based on traditional stories, the authors show how clearly dramas are constructed. They move from the simple use of TiR (Teacher in Role) to more complex, full dramas, using traditional stories including Little Bo Peep, Cinderella, Sleeping Beauty, Humpty Dumpty, The Pied Piper, The Billy Goats Gruff and Hansel and Gretel. Drama in the early years covers a number of key areas where drama is of particular importance for this age group including: \* drama in the National Curriculum \* how drama can help your teaching of the Literacy Hour \* personal and social education and citizenship \* drama and special needs \* assessment \* recording and progression \* developing a school policy for drama.

### **The Screenwriter's Workbook**

Emphasises two lines of training. First, the recognition, planning, and communication of evocative stage imagery. Second, the development of the pantomimic and vocal instruments for the communication of this image to the audience. Considerable space is given to the building of a dramatic role.

First Steps in Science has been written especially for Foundation Stage/P1 children and provides a full year's worth of planning and resources for you to incorporate Science into the classroom, offering a coordinated starting point for other areas of learning. This Teacher's Resource Book contains 36 activity plans, organized into 6 units. Units are based on particular areas of Science and cross-referenced with other areas of learning for an integrated approach. Tried and tested activity plans incorporate role play and other play opportunities. Materials relate to the Early Learning Goals and their Stepping Stones to ensure continuity and progression in children's learning.

### **The Second Mystery Drama**

This is a guide to the training opportunities and choices available to aspiring actors. Beginning with early preparations, from singing to speech, dance, sport and general education, the author goes on to discuss A Level theatre studies, stage schools and BTEC courses. He continues with a discussion on the advisability of going to drama school, and explains how to prepare for an interview, select an audition speech, and gives reasons why an applicant may not be accepted. Detailed outlines of full-time NCDT-approved courses are given, as well as details of some part-time courses. There is advice on what to expect from drama school. Prunella Scales, the actress, has contributed a chapter on the minimum requirements expected of an actor who has completed drama training, and there is a forward by Dame Judi Dench.

Dramatic Interactions in Education draws together contemporary sociocultural research across drama and educational contents to draw out implications for researchers and practitioners both within and outside the field. Drama is a field for which human interactions, experience, emotional expression, and attitude are central, with those in non-arts fields discovering that understandings emerging from drama education can provide models and means for examining the affective and relational domains which are essential for understanding learning processes. In addition to this, those in the realm of drama education and applied theatre are realising that sociocultural and historical-cultural approaches can usefully inform their research and practice. Leading international theorists and researchers from across the UK, Europe, USA and Australia combine theoretical discussions, research methodologies, accounts of research and applications in classroom and

learning contexts, as they explore concepts from Vygotsky's foundational work and interrogate key concepts such as perezhivanie (or the emotional, lived experience), development of self, zone of proximal development.

### **The Drama Magazine**

The "tragedy of the commons" is a central concept in human ecology and the study of the environment. It has had tremendous value for stimulating research, but it only describes the reality of human-environment interactions in special situations. Research over the past thirty years has helped clarify how human motivations, rules governing access to resources, the structure of social organizations, and the resource systems themselves interact to determine whether or not the many dramas of the commons end happily. In this book, leaders in the field review the evidence from several disciplines and many lines of research and present a state-of-the-art assessment. They summarize lessons learned and identify the major challenges facing any system of governance for resource management. They also highlight the major challenges for the next decade: making knowledge development more systematic; understanding institutions dynamically; considering a broader range of resources (such as global and technological commons); and taking into account the effects of social and historical context. This book will be a valuable and accessible introduction to the field for students and a resource for advanced researchers.

The most successful teachers are continually looking for ways to improve their teaching skills. Whether you're a new- or experienced teacher, you'll find ideas here on how to make the Bible come alive to your students! This book will be a valuable resource for those who want to increase their effectiveness in the classroom, children's church, or outreach ministry. It's for children's leaders, volunteers, and anyone interested in learning more about how children learn-and helping them grow in their faith. Some of the most frequently discussed issues in children's ministry are addressed, including methodology, discipline and classroom management, nursery concerns, organization, memorizing Scripture, and leading children to a personal faith in Christ. Here you'll find both new and tested methods that inspire and motivate children to learn! But this book is also very practical, easy to read, and filled with creative ideas! An emphasis is placed on

understanding children, and ways that teachers can help meet their physical, emotional, and spiritual needs in caring ways. Topics discussed in this guide for teachers include: Keys to successful teaching Ways to "connect" with your students How to improve your storytelling skills How to use "discovery learning centers" Bible learning activities for pre-K through elementary Verda Rubottom is a licensed children's minister and holds a Masters degree in education. She currently serves on the faculty of Children's Ministry University Online, and has served as a national children's ministries consultant for the Assemblies of God. She was the Children's Ministries Director at People's Church in Salem, Oregon for seven years, and has taught child development and children's ministries at the college level. Verda shares insights gleaned from years of "hands on" experience in children's ministry. She and her husband, Roger, have four children and nine grandchildren.

### **Gerhard Hauptmann and the Naturalist Drama**

What was German Naturalism? What were its achievements? How does it compare with its counterparts in other European countries? These are some of the difficult questions addressed by John Osborne in Gerhart Hauptmann and the Naturalist Drama, a revised and updated version of his The Naturalist Drama in Germany, now widely acknowledged as the standard introduction to the subject. The debates to which he contributed, and in some cases initiated, on Naturalism in the German theatre, Naturalist theory in Germany, and the development of the Naturalist movement to the contemporary Social Democrat movement, have remained central issues. This revised edition preserves the structure and approach of the original, including its emphasis on the early dramas of Hauptmann, while taking full account of subsequent scholarship which provides the context in which this Naturalist playwright's work can be placed.
