The Object Relation

The author's writings, and especially the seminars for which he has become famous, have provoked intense controversies in French analytic circles, requiring as they do a radical reappraisal of the legacy bequeathed by Freud. This volume is based on a year's seminar, which is of particular importance because he was addressing a larger, less specialist audience than ever before, amongst whom he could not assume familiarity with his work. For his listeners then, and for his readers now, he wanted "to introduce a certain coherence into the major concepts on which psycho-analysis is based", namely the unconscious, repetition, the transference and the drive. In re-defining these four concepts he explores the question that, as he puts it, moves from "Is psycho-analysis a science?" to "What is a science that includes psycho-analysis?"

Easy Lessons in Psychoanalysis

The need for a concise, comprehensive guide to the main principles and practice of psychoanalysis and psychoanalytic psychotherapy has become pressing as the psychoanalytic movement has expanded and diversified. An introductory text suitable for a wide range of courses, this lively, widely referenced account presents the core features of contemporary psychoanalytic theory and practice in an easily assimilated, but thought-provoking manner. Illustrated throughout with clinical examples, it provides an up-to-date source of reference for a wider range of mental health professionals as well as

those training in psychoanalysis, psychotherapy or counselling.

Psychoanalytic Explorations in Music

A concise survey of the culture and civilization of mankind, *The Lessons of History* is the result of a lifetime of research from Pulitzer Prize-winning historians Will and Ariel Durant. With their accessible compendium of philosophy and social progress, the Durants take us on a journey through history, exploring the possibilities and limitations of humanity over time. Juxtaposing the great lives, ideas, and accomplishments with cycles of war and conquest, the Durants reveal the towering themes of history and give meaning to our own.

Dead Subjects

The Business of Being Made is the first book to critically analyze assisted reproductive technologies (ARTs) from a transdisciplinary perspective integrating psychoanalytic and cultural theories. It is a ground-breaking collection exploring ARTs through diverse methods including interview research, clinical case studies, psychoanalytic based ethnography, and memoir. Gathering clinicians and researchers who specialize in this area, this book engages current research in psychoanalysis, sociology, anthropology, philosophy and debates in feminist, queer and cultural theory about affect, temporality, and bodies. With psychoanalysis as its fulcrum, *The Business of Being Made* explores the social constructions and personal experiences of ARTs. Katie Gentile frames the cultural context, exploring the ways ARTs have become a complex form of playing with time, attempting to manufacture a hopeful future in the midst of growing global uncertainty. The contributors then present a range of varied experiences related to ARTs, including: Interviews with women and men undergoing ARTs; A psychoanalytic memoir of male infertility; Clinical research and work with transgender, gay and lesbian patients creating new Oedipal constellations, the experiences of LBGTO people within the medical system and the variety of families that emerge; Research on the experiences of egg donors (now central to the business of ARTs) and a corresponding clinical case study of successful egg donation; The experiences of ongoing failure which is the often unacknowledged for

ART procedures; How and when people choose to stop using ARTs; A psychoanalytic ethnography of a neonatal intensive care unit populated in part with the babies created through these technologies and their parents, haggard and in shock after years of failed attempts. Full of original material, *The Business of Being Made* conveys the ambivalence of these technologies without simplifying their complicated consequences for the bodies of individuals, the family, cultures, and our planet. This book will be relevant to clinicians, medical and psychological personnel working in assisted reproductive technologies and infertility, as well as academics working in the fields of sociology, literature, queer and feminist theories and at the intersections of cultural, critical and psychoanalytic theories.

Decolonial Psychoanalysis

A much-praised memoir of living and surviving mental illness as well as "a stereotype-shattering look at a tenacious woman whose brain is her best friend and her worst enemy" (Time). Elyn R. Saks is an esteemed professor, lawyer, and psychiatrist and is the Orrin B. Evans Professor of Law, Psychology, Psychiatry, and the Behavioral Sciences at the University of Southern California Law School, yet she has suffered from schizophrenia for most of her life, and still has ongoing major episodes of the illness. *The Center Cannot Hold* is the eloquent, moving story of Elyn's life, from the first time that she heard voices speaking to her as a young teenager, to attempted suicides in college, through learning to live on her own as an adult in an often terrifying world. Saks discusses frankly the paranoia, the inability to tell imaginary fears from real ones, the voices in her head telling her to kill herself (and to harm others), as well as the incredibly difficult obstacles she overcame to become a highly respected professional. This beautifully written memoir is destined to become a classic in its genre.

Pouvoirs de L'horreur (English)

This anthology of psychoanalytic studies of music ranges from considerations of the function of music in the mental life of composer and listener alike--including the very enjoyment of music--to those of form and content. The relationship of music and affect is treated, musical creativity and inspiration are explored, and developmental aspects of musical ability are considered. There are also a number of psychoanalytic studies of individual composers, including Beethoven, Brahms, Ives, Mahler, Mozart, Rossini, Schumann, and Wagner. Understanding and Treating Patients in Clinical Psychoanalysis

With a series of exceptional new translations of texts by Jacques Lacan and Jacques-Alain Miller, *The Lacanian Review #6 – Urgent!* takes you into the space of the real unconscious and the last teachings of Lacan, reinterpreted to approach the

urgency of our contemporary moment. The Lacanian Review#6 – URGENT! There is not a moment to lose. The acceleration of culture and the vertiginous pressure of the drive seem to collapse the instant to see, the time to understand and the moment to conclude. The urgent subject of the now cannot catch up to rapid cycles of political upheaval and social media streams turned into torrents of data. Production overflows consumption in a tidal wave of imaginary cacophony. How does psychoanalysis today respond to urgent times? For its 6th issue, The Lacanian Review tasks the signifier, Urgent!, to orient the work of the New Lacanian School (NLS) in examining the urgent cases that occupy our clinic. Tracing the edge of the latest Lacan, Bernard Seynhaeve (President of the NLS) curated a series of newly established texts by Jacques Lacan and Jacques-Alain Miller, translated by Russell Grigg, appearing in the first ever bilingual featured section of TLR. Four lessons from the seminars of Jacques-Alain Miller frame this issue. The Lacanian Review #6 draws heavily from the work of the current Analysts of the School to explore four new fundamental concepts of psychoanalysis: Pass, Real Unconscious, Urgent Cases, and Satisfaction. Interviews with Angelina Harari (President of the WAP), Ricardo Seldes (Director of Pausa), and Lee Edelman (Professor of English Literature at Tufts University) elaborate fundamental concepts across the work of the School One, the clinic of applied analysis, and literary theory in dialogue with psychoanalysis. A groundbreaking orientation text by Éric Laurent from the 2018 Congress of the World Association of Psychoanalysis (WAP) will be published for the first time in English, along with clinical cases exploring transference and psychosis. And finally, approaching the problem of temporality in psychoanalysis, this issue spans Freudian time-management to the logic of the cut in the Lacanian Orientation. Make haste and subscribe to The Lacanian Review - It's urgent! The Lacanian Review is the journal of New Lacanian School (NLS) and the World Association of Psychoanalysis (WAP) About The Lacanian Review The Lacanian Review, the English language journal of the New Lacanian School (NLS) and the World Association of Psychoanalysis (WAP), publishes newly established texts by Jacques Lacan, Jacques-Alain Miller, and prominent international figures of the Lacanian Orientation. Dream Psychology

The emerging field of psychoanalytic political theory has now reached a stage in its development and rapid evolution that

deserves to be registered, systematically defined, and critically evaluated. This handbook provides the first reference volume which showcases the current state of psychoanalytic political theory, maps the genealogy of its development, identifies its conceptual and methodological resources, and highlights its analytical innovations as well as its critical promise. The handbook consists of 35 chapters, offering original, comprehensive, and critical reviews of this field of study. The chapters are divided into five thematic sections: • The figures section discusses the work of major psychoanalytic theorists who have considerably influenced the development of psychoanalytic political theory. • The traditions section genealogically recounts and critically reassesses the many attempts throughout the 20th century of experimenting with the articulation between psychoanalysis and political theory in a consistent way. • The concepts section asks what are the concepts that psychoanalysis offers for appropriation by political theory. • The themes section presents concrete examples of how psychoanalytic political theory can be productively applied in the analysis of racism, gender, nationalism, consumerism, and so on. • The challenges/controversies section captures how psychoanalytic political theory can lead the way towards theoretical and analytical innovation in many disciplinary fields that deal with cutting-edge issues. The Routledge Handbook of Psychoanalytic Political Theory will serve as a scholarly reference volume for all students and researchers studying political theory, psychoanalysis, and the history of ideas.

The Psychoanalytic Review

Anna Freud was the sixth and last child of Sigmund Freud and Martha Bernays. Born in Vienna, she followed the path of her father and contributed to the newly born field of psychoanalysis. She is considered to be one of the founders of psychoanalytic child psychology. 'Psychoanalysis For Teachers And Parents' is written in a clear understandable fashion. The book outlines the basic findings of psychoanalysis and their implications for the understanding, care, and education of young children. Titles of the lectures are Infantile Amnesia and the Oedipus Complex; The Infantile Instinct-Life; The Latency Period; and The Relation Between Psychoanalysis and Pedagogy.

Freud and Yoga

Psychoanalytic Approaches to Problems in Living examines how psychoanalysts can draw on their training, reading, and clinical experience to help their patients address some of the recurrent challenges of everyday life. Sandra Buechler offers

clinicians poetic, psychoanalytic, and experiential approaches to problems, drawing on her personal and clinical experience, as well as ideas from her reading, to confront challenges familiar to us all. Buechler addresses issues including difficulties of mourning, aging, living with uncertainty, finding meaningful work, transcending pride, bearing helplessness, and forgiving life's hardships. For those contemplating a clinical career, and those in its beginning stages, she suggests ways to prepare to face these quandaries in treatment sessions. More experienced practitioners will find echoes of themes that have run through their own clinical and personal life experiences. The chapters demonstrate that insights from a poem can often guide the clinician as well as concepts garnered from psychoanalytic theory and other sources. Buechler puts her questions to T. S. Eliot, Rainer Maria Rilke, Elizabeth Bishop, W. S. Merwin, Stanley Kunitz and many other poets and fiction writers. She "asks" Sharon Olds how to meet emergencies, Erich Fromm how to live vigorously, and Edith Wharton how to age gracefully, and brings their insights to bear as she addresses challenges that make frequent appearances in clinical sessions, and other walks of life. With a final section designed to improve training in the light of her practical findings, *Psychoanalytic Approaches to Problems in Living* is an essential book for all practicing psychoanalysts and psychoanalytic psychotherapists.

Four Lessons of Psychoanalysis

"A dialogue between a master of yoga and a psychoanalyst about philosophies of mind"--

Psychoanalysis, Culture & Society

This book is a unique compilation of essays about the genocidal persecution fuelling the Nazi regime in World War II. Written by world-renowned experts in the field, it confronts a vitally important and exceedingly difficult topic with sensitivity, courage, and wisdom, furthering our understanding of the Holocaust/Shoah psychoanalytically, historically, and through the arts. Authors from four continents offer their perspectives, clinical experiences, findings, and personal narratives on such subjects as resilience, remembrance, giving testimony, aging, and mourning. There is an emphasis on the intergenerational transmission of trauma of both the victims and the perpetrators, with chapters looking at the question of "evil", comparative studies, prevention, and the misuse of the Holocaust. Those chapters relating to therapy address the specific issues of the survivors, including the second and third generation, through psychoanalysis as well as other modalities, whilst the section on creativity and the arts looks at film, theater, poetry, opera, and writing. The aftermath of the Holocaust demanded that psychoanalysis re-examine the importance of psychic trauma; those who first studied this darkest chapter in human history successfully challenged the long-held assumption that psychological reality was essentially the only reality to be considered. As a result, contemporary thought about trauma, dissociation, self psychology, and relational psychology were greatly influenced by these pioneers, whose ideas have evolved since then. This long-awaited

text is the definitive update and elaboration of their original contributions.

A People's History of Psychoanalysis

This book explores the phases of Jacques Lacan's career and examines the past, present, and future of psychoanalysis.

The Center Cannot Hold

Though it has now fallen out of favor among many practitioners and scholars, Freud's concept of psychoanalysis -- an approach that focuses primarily on adverse events in early childhood and irrational drives that are overcome via extended talk therapy -- was and continues to be enormously influential, not only in the realm of psychology, but also in the larger culture. This volume offers a comprehensive overview of psychoanalysis from the point of view of the field's creator.

On Dangerous Ground

Understanding and Treating Patients in Clinical Psychoanalysis: Lessons from Literature describes the problematic ways people learn to cope with life's fundamental challenges, such as maintaining self-esteem, bearing loss, and growing old. People tend to deal with the challenges of being human in characteristic, repetitive ways. Descriptions of these patterns in diagnostic terms can be at best dry, and at worst confusing, especially for those starting training in any of the clinical

disciplines. To try to appeal to a wider audience, this book illustrates each coping pattern using vivid, compelling fiction whose characters express their dilemmas in easily accessible, evocative language. Sandra Buechler uses these examples to show some of the ways we complicate our lives and, through reimagining different scenarios for these characters, she illustrates how clients can achieve greater emotional health and live their lives more productively. Drawing on the work of Dostoevsky, Tolstoy, Munro, Mann, James, O'Connor, Chopin, McCullers, Carver, and the many other authors represented here, Buechler shows how their keen observational short fiction portrays self-hurtful styles of living. She explores how human beings cope using schizoid, paranoid, grandiose, hysteric, obsessive, and other defensive styles. Each is costly, in many senses, and each limits the possibility for happiness and fulfillment. *Understanding and Treating Patients in Clinical Psychoanalysis* offers insights into what living with and working with problematic behaviors really means through a series of examples of the major personality disorders as portrayed in literature. Through these fictitious examples, clinicians and trainees, and undergraduate and graduate students can gain a greater understanding of how someone becomes paranoid, schizoid, narcissistic, obsessive, or depressive, and how that affects them, and those around them, including the mental health professionals who work with them.

Radical Philosophy

2015 Gradiva Award Winner *Clinical Implications of the Psychoanalyst's Life Experience* explores how leaders in the fields of psychoanalysis and psychotherapy address the phenomena of the psychoanalyst's personal life and psychology. In this edited book, each author describes pivotal childhood and adult life events and crises that have contributed to personality formation, personal and professional functioning, choices of theoretical positions, and clinical technique. By expanding psychoanalytic study beyond clinical theory and technique to include a more careful examination of the psychoanalyst's life events and other subjective phenomena, readers will have an opportunity to focus on specific ways in which these events and crises affect the tenor of the therapist's presence in the consulting room, and how these occurrences affect clinical choices. Chapters cover a broad range of topics including illness, adoption, sexual identity and experience, trauma, surviving the death of one's own analyst, working during 9/11, cross cultural issues, growing up in a communist household, and other family dynamics. Throughout, Steven Kuchuck (ed) shows how contemporary psychoanalysis teaches that it is only by acknowledging the therapist's life experience and resulting psychological makeup that analysts can be most effective in helping their patients. However, to date, few articles and fewer books have been entirely devoted to this topic. *Clinical Implications of the Psychoanalyst's Life Experience* forges new ground in exploring these under-researched areas. It will be essential reading for practicing psychoanalysts, psychotherapists, psychologists, social workers, those working in other mental health fields and graduate students alike.

Psychoanalytic Approaches to Problems in Living

Jacques Lacan's thinking revolutionised the theory and practice of psychoanalysis and had a major impact in fields as diverse as film studies, literary criticism, feminist theory and philosophy. Yet his writings are notorious for their complexity and idiosyncratic style. Emphasising the clinical basis of Lacan's work, *An Introductory Dictionary of Lacanian Psychoanalysis* is an ideal companion to his ideas for readers in every discipline where his influence is felt. The Dictionary features: * over 200 entries, explaining Lacan's own terminology and his use of common psychoanalytic expressions * details of the historical and institutional context of Lacan's work * reference to the origins of major concepts in the work of Freud, Saussure, Hegel and other key thinkers * a chronology of Lacan's life and works.

The Psychoanalytic Study of the Child

In this delightfully readable and clearly written volume, the world renowned psychoanalyst Moustafa Safouan considers the works of Freud and Lacan. When Safouan met Lacan in 1949, he was all but ready to abandon the field due to the many contradictions and obscurities he found in Freud. Yet thanks to Lacan's early presentation of the father as real, imaginary, and symbolic, Safouan stayed on, working with Lacan until Lacan's death in 1981. One can track the evolution of Safouan's teaching through his participation in Lacan's published seminars and his early contributions. Safouan wrote this book in English, starting with a transcript from a series of lectures he delivered to the Lacanian School of Psychoanalysis in San Francisco, in March of 2001. Safouan clears up many of Lacan's own obscurities, although he is quick to point out that there are no contradictions in Lacan. Readers will find the cause of desire, both through the signifier and through the 'normative' (rather than normal) development of the child. Safouan explains the three forms of lack, the root of subjectivity, the desire of the analyst, the Other as different from the other, the object cause of desire, transference, countertransference and lateral transference, and the analytic act in a narrative that brings these and other concepts together, in a 'dictionary' that could never be divided by terms.

Studying Lacan's Seminars IV and V

In this provocative and necessary book, Robert K. Beshara uses psychoanalytic discursive analysis to explore the possibility of a genuinely anti-colonial critical psychology. Drawing on postcolonial and decolonial approaches to Islamophobia, this book enhances understandings of Critical Border Thinking and Lacanian Discourse Analysis, alongside other theoretic-methodological approaches. Using a critical decolonial psychology approach to conceptualize everyday Islamophobia, the author examines theoretical resources situated within the discursive turn, such as decoloniality/transmodernity, and carries out an archeology of (counter)terrorism, a genealogy of the conceptual Muslim, and a Žižekian ideology critique. Conceiving of Decolonial Psychoanalysis as one theoretical resource for Critical Islamophobia Studies (CIS), the author also applies Lacanian Discourse Analysis to extracts from interviews conducted with US Muslims to theorize their ethico-political

subjectivity and considers a politics of resistance, adversarial aesthetics, and ethics of liberation. Essential to any attempt to come to terms with the legacy of racism in psychology, and the only critical psychological study on Islamophobia in the United States, this is a fascinating read for anyone interested in a critical approach to Islamophobia.

"L'Objet Brûlant"

This is the first collection of essays to offer a comprehensive analysis of, and reflection on, the major themes emergent in Jacques Lacan's seminars of 1955-56 and 1956-57: Seminar IV - the object relation, and Seminar V - formations of the unconscious. Assessing the value of a clinical approach orientated around the question of the object lack in the contemporary clinic, the book comprises 16 chapters which follow the development of a range of concepts elaborated by Lacan in these seminars, including sustained engagement with his critique of object relations theory. It considers the effectiveness of these early ideas in clinical practice in relation to hysteria, phobia, fetishism, obsessional neurosis, and of the so-called "Borderline" case. Lacan's early concepts are also subjected to critique for engagement with Queer theory, and research in asexuality or the operation(s) of the signifier Phallus. The chapters build to provide an invaluable resource to interpret and evaluate Lacan's early teaching, and to find in his early concepts a fresh utility and scope for both clinical work and psychoanalytic research and enquiry. The book will be of great interest to Lacanian scholars and students, as well as psychoanalytic therapists, and analysts interested in Lacan's early work.

The Lacanian Review - tome 6 Urgent !

'The unfulfilled and unsatisfied mother around whom the child ascends the upward slope of his narcissism is someone real. She is right there, and like all other unfulfilled creatures, she is in search of what she can devour, quaerens quem devoret. What the child once found as a means of quashing the symbolic unfulfilment is what he may possibly find across from him again as a wide-open maw To be devoured is a grave danger that our fantasies reveal to us. We find it at the origin, and we find it again at this turn in the path where it yields us the essential form in which phobia presents. We find it again when we look at the fears of Little Hans With the support of what I have shown you today, you will better see the relationships between phobia and perversion I will go so far as to say that you will interpret the case better than did Freud himself.'

Extract from Chapter XI 'It's no accident that what has been perceived but dimly, yet perceived nevertheless, is that castration bears just as much relation to the mother as to the father. We can see in the description of the primordial situation how maternal castration implies for the child the possibility of devoration and biting. In relation to this anteriority of maternal castration, paternal castration is a substitute.' Extract from Chapter XXI '[In the case of little Hans] the initial transformation, which will prove decisive, [is] the transformation of the biting into the unscrewing of the bathtub, which is something utterly different, in particular for the relationship between the protagonists. Voraciously to bite the mother, as an

act or an apprehension of her altogether natural signification, indeed to dread in return the notorious biting that is incarnated by the horse, is something quite different from unscrewing, from ousting, the mother, and mobilising her in this business, bringing her into the system as a whole, for this first time as a mobile element and, by like token, an element that is equivalent to all the rest.' Extract from Chapter XXIII

The Lessons of History

Psychoanalysis For Teachers And Parents

This collection is the first extended interrogation in any language of Jacques Lacan's Seminar XVII. Originally delivered just after the Paris uprisings of May 1968, Seminar XVII marked a turning point in Lacan's thought; it was both a step forward in the psychoanalytic debates and an important contribution to social and political issues. Collecting important analyses by many of the major Lacanian theorists and practitioners, this anthology is at once an introduction, critique, and extension of Lacan's influential ideas. The contributors examine Lacan's theory of the four discourses, his critique of the Oedipus complex and the superego, the role of primal affects in political life, and his prophetic grasp of twenty-first-century developments. They take up these issues in detail, illuminating the Lacanian concepts with in-depth discussions of shame and guilt, literature and intimacy, femininity, perversion, authority and revolt, and the discourse of marketing and political rhetoric. Topics of more specific psychoanalytic interest include the role of objet a, philosophy and psychoanalysis, the status of knowledge, and the relation between psychoanalytic practices and the modern university. The Brain That Changes Itself

Thanks to Safouan, we rediscover the link between Lacan's concept of Jouissance and Freud's death drive, between the

signifier and Freud's unconscious, and between Freud's concept of transference and Lacan's controversial views on the end of analysis. Neither a follower nor a detractor, Safouan is a "Lacanian" who knows how to keep his distance.

The Handbook of Psychoanalytic Holocaust Studies

In the final years of the 19th century, Sigmund Freud began to construct evidence for the workings of an “unconscious.” On *Dangerous Ground* offers an innovative assessment of the complex role that his encounters with visual cultures—architecture, objects from earlier cultural epochs (“antiquities”), paintings, and illustrated books—played in that process. Diane O'Donoghue introduces, often using unpublished archival sources, the ways in which material phenomena profoundly informed Freud's decisions about what would, and would not, constitute the workings of an inner life. By returning to view content that Freud treated as forgettable, as distinct from repressed, O'Donoghue shows us a realm of experiences that Freud wished to remove from psychological meaning. These erasures form an amnesic core within Freud's psychoanalytic project, an absence that includes difficult aspects of his life narrative, beginning with the dislocations of his early childhood that he declared “not worth remembering.” What is made visible here is far from the inconsequential surface of experience; rather, we are shown a dangerous ground that exceeds the limits of what Freud wished to include within his early model of mind. In Freud's relation to visual cultures we find clues to what he attempted, in crafting his unconscious, to remove from sight.

About this Book "A major and long overdue addition to the America/English psychoanalytic literature. . . . All major concepts—among them the mirror stage, the Name-of-the-Father, metaphor and metonymy, the phallus, the foreclosure of the subject—are developed in depth." -Nicholas Kouretzas, Harvard Medical School

After Lacan

This book explores family interaction and family psychoanalysis from varying standpoints used around the world. It illustrates these with extensive clinical cases discussed from varying perspectives. The book is the first in a series of volumes from the International Psychoanalytical Association's Working Group on Family and Couple Psychoanalysis, drawn from its ongoing research into comparative theories and methods of working analytically with families and couples, and with varying types of family structure. It also applies lessons from family psychoanalysis to analytic theory and to the practice of individual psychoanalysis.

Clinical Implications of the Psychoanalyst's Life Experience

As inequality widens in all sectors of contemporary society, we must ask: is psychoanalysis too white and well-to-do to be relevant to social, economic, and racial justice struggles? Are its ideas and practices too alien for people of color? Can it help us understand why systems of oppression are so stable and how oppression becomes internalized? In *A People's History of Psychoanalysis: From Freud to Liberation Psychology*, Daniel José Gaztambide reviews the oft-forgotten history of social justice in psychoanalysis. Starting with the work of Sigmund Freud and the first generation of left-leaning psychoanalysts, Gaztambide traces a series of interrelated psychoanalytic ideas and social justice movements that culminated in the work of Frantz Fanon, Paulo Freire, and Ignacio Martín-Baró. Through this intellectual genealogy, Gaztambide presents a psychoanalytically informed theory of race, class, and internalized oppression that resulted from the intertwined efforts of psychoanalysts and racial justice advocates over the course of generations and gave rise to liberation psychology. This book is recommended for students and scholars engaged in political activism, critical pedagogy, and clinical work.

Introduction to Psychoanalysis

What is neuroplasticity? Is it possible to change your brain? Norman Doidge's inspiring guide to the new brain science explains all of this and more. An astonishing new science called neuroplasticity is overthrowing the centuries-old notion that the human brain is immutable, and proving that it is, in fact, possible to change your brain. Psychoanalyst, Norman Doidge, M.D., traveled the country to meet both the brilliant scientists championing neuroplasticity, its healing powers, and the people whose lives they've transformed—people whose mental limitations, brain damage or brain trauma were seen as unalterable. We see a woman born with half a brain that rewired itself to work as a whole, blind people who learn to see, learning disorders cured, IQs raised, aging brains rejuvenated, stroke patients learning to speak, children with cerebral palsy learning to move with more grace, depression and anxiety disorders successfully treated, and lifelong character traits changed. Using these marvelous stories to probe mysteries of the body, emotion, love, sex, culture, and education, Dr. Doidge has written an immensely moving, inspiring book that will permanently alter the way we look at our brains, human nature, and human potential. From the Trade Paperback edition.
