Love Conquer

Submissive women have needs just like anybody else. But how can a woman get her needs met when she's relinquished her power to her dominant partner? With warmth, wisdom and a down-to-earth approach, experienced submissive Kacie Cunningham analyzes the realities of the dominant-submissive lifestyle and suggests ways in which both partners can experience the greatest possible growth and pleasure. At the heart of the book is an emotion Kacie has dubbed "Conquer Me" -- which she defines as "the submissive's internal demand for a show of strength." Without a clear understanding of "conquer me," both submissive and dominant may find themselves at odds -- either fighting unhappily, or watching the passion ebb from their relationship. This book explains this unique need and how to get it met -- essential knowledge for any submissive or couple who wants to get the most out of their D/s lifestyle.

John Eldredge revises and updates his best-selling, renowned Christian classic. God designed men to be dangerous, says John Eldredge. Simply look at the dreams and desires written in the heart of every boy: To be a hero, to be a warrior, to live a life of adventure and risk. Sadly, most men abandon those dreams and desires--aided by a Christianity that feels like nothing more than pressure to be a "nice guy." It is no wonder that many men avoid church, and those who go are often passive and bored to death. In this provocative book, Eldredge gives women a look inside the true heart of a man and gives men permission to be what God designed them to be--dangerous, passionate, alive, and free.

Embrace and Conquer

The best-selling author of From Panic to Power offers a positive action plan for alleviating stress and anxiety in every facet of one's life--from money to health to relationships.

Michigan Farmer

As author Ralph Masengill Jr. observes, death and taxes aren't the only things certain in life. Change is a given too. Understanding and managing change can help you succeed both at work and in your personal life. People who know how to deal with change are happier and less stressed out, and they make better decisions. On the job, adjusting your own attitude about change can influence others in major ways and redirect the course of your organization. And, as Masengill explains, you need to recognize which coworkers embrace change, are neutral about change, and resist change when you are trying to make improvements at work. Masengill doesn't just impart the secrets of social engineering but also includes important advice about identifying your own attitudes toward change. This can help you cancel out fears and negative thoughts. Learning to accept change can be difficult, but understanding why it's important is simple, thanks to the humorous stories and easy-to-understand charts and graphs in *Conquer Change and Win*. With motivation and perseverance, you can find the courage to dream big and adopt the best mind-set for success at home and in the boardroom!

Conquer Fear!

"Of all people who might have solved the problem of human flight, few would have suspected Count Ferdinand von Zeppelin, a fusty, old-school member of the Wurrtemberg nobility, recently ousted from the German military and convinced that a flying machine will be his ticket back to military glory. Instead, by the dawn of the twentieth century, he creates something much bigger: a system of flight that embodies the cutting edge of multiple sciences and a business that would last for decades and make his name synonomous with airships. Not even the Wright brothers, who were creating their competing technology at nearly the same moment, managed such close association. Zeppelin, aging, leaves his company in the hands of Hugo Eckener, his partner and publicity expert, who has a vision of the airship connecting people all over the world. He guides the Zeppelin Company, always on the brink of collapse, through the first world war and some some of Germany's most difficult years, as he tries to establish the first airline route across the Atlantic. But, just as Zeppelin had a rival for the best flight technology in the Wright Bros., Eckener meets his match in Pan American's Juan Trippe in the race to secure a financially sustainable and popular airline business. Both Eckener and Trippe dream of establishing service between London and New York, a valuable, but surprisingly difficult route that sends them both first around the globe to perfect their machines and solidify their businesses. Only with the Hindenburg disaster in Lakehurst, New Jersey, and the distant rumblings of another world war, does the race come to an end. The airplane has won. Twilight of the Gods is an epic history of the founding of the aviation age. From invention to competition, the battle to dominate the skies is the story of how the modern world was made"--

Charlamagne Tha God, New York Times bestselling author of Black Privilege and always provocative cohost of Power 105.1's The Breakfast Club, reveals his blueprint for breaking free from your fears and anxieties. Being "shook" is more than a rap lyric for Charlamagne, it's his mission to overcome. While it may seem like he's ahead of the game, he is actually plagued by anxieties, such as the fear of losing his roots, the fear of being a bad dad, and the fear of being a terrible husband. In the national bestseller Shook One, Charlamagne chronicles his journey to beat those fears and shows a path that you too can take to overcome the anxieties that may be holding you back. Ironically, Charlamagne's fear of failure—of falling into the life of stagnation or crime that caught up so many of his friends and family in his hometown of Moncks Corner—has been the fuel that has propelled him to success. However, even after achieving national prominence as a radio personality, Charlamagne still found himself paralyzed by anxiety and distrust. Here, in Shook One, he is working through these problems—many of which he traces back to cultural PTSD—with help from mentors, friends, and therapy. Being anxious doesn't serve the same purpose anymore. Through therapy, he's figuring out how to get over the irrational fears that won't take him anywhere positive. Charlamagne hopes Shook One can be a call to action: Getting help is your right. His second book "cements the radio personality's stance in making sure he's on the right side of history when it comes to society's growing focus on mental health, while helping remove the negative stigma" (Billboard).

An explosive exposé of one of the biggest and most secretive companies in the world, Samsung, as the Korean juggernaut battles Apple and Sony to dominate the world of technology. Based on years of reporting on Samsung for *The Economist*, *The Wall Street Journal*, and *Time*, from his base in South Korea, and his countless

sources inside and outside the company, Geoffrey Cain offers a penetrating look behind the curtains of the biggest company nobody in America knows. Seen for decades in tech circles as a fast follower rather than an innovation leader, Samsung today has grown to become a market leader in the United States and around the globe. They have captured one quarter of the smartphone market and have been pushing the envelope on every front. Forty years ago, Samsung was a rickety Korean agricultural conglomerate that produced sugar, paper, and fertilizer, located in a backward country with a third-world economy. With the rise of the PC revolution, though, Chairman Lee Byung-chul began a bold experiment: to make Samsung a major supplier of computer chips. The multimillion-dollar plan was incredibly risky. But Lee, wowed by a young Steve Jobs, who sat down with the chairman to offer his advice, became obsessed with creating a tech empire. And in *Samsung Rising*, we follow Samsung behind the scenes as the company fights its way to the top of tech. It is one of Apple's chief suppliers of technology critical to the iPhone, and its own Galaxy phone outsells the iPhone. Today, Samsung employs over 300,000 people (compared to Apple's 80,000 and Google's 48,000). The company's revenues have grown more than forty times from that of 1987 and make up more than 20 percent of South Korea's exports. Yet their disastrous recall of the Galaxy Note 7, with numerous reports of phones spontaneously bursting into flames, reveals the dangers of the company's headlong attempt to overtake Apple at any cost. A sweeping insider account, *Samsung Rising* shows how a determined and fearless Asian competitor has become a force to be reckoned with.

The 48 Laws of Power

Most of us believe that we will finally feel satisfied and content with our lives when we get the good news we have been waiting for, find a healthy relationship, or achieve one of our personal goals. However, this rarely happens. Good fortune is often followed by negative emotions that overtake us and result in destructive behaviors. "I don't deserve this," "this is too good to be true," or any number of harmful thought patterns prevent us from experiencing the joy and satisfaction we have earned. Sound familiar? This is what New York Times bestselling author Gay Hendricks calls the Upper Limit Problem, a negative emotional reaction that occurs when anything positive enters our lives. The Upper Limit Problem not only prevents happiness, but it actually stops us from achieving our goals. It is the ultimate life roadblock. In *The Big Leap*, Hendricks reveals a simple yet comprehensive program for overcoming this barrier to happiness and fulfillment, presented in a way that engages both the mind and heart. Working closely with more than one thousand extraordinary achievers in business and the arts—from rock stars to Fortune 500 executives—whose stories are featured in these pages, the book describes the four hidden fears that are at the root of the Upper Limit Problem. *The Big Leap* delivers a proven method for first identifying which of these four fears prevents us from reaching our personal upper limit, and then breaking through that limitation to achieve what Hendricks refers to as our Zone of Genius. Hendricks provides a clear path for achieving our true potential and attaining not only financial success but also success in love and life.

CONQUER RADIO FREQUENCY

Over the years, we have partnered with some of the most radical, outrageous, experimental people in the world, and we've witnessed first hand the power of thinking wrong. We've seen seemingly crazy ideas yield incredible results, and we have endeavored to study and understand the secrets and actions of those who successfully operate outside the predictable expectations of business and of culture. We began to see a connection in how these people behave and make decisions, in how they communicate their work, and in whom they deflect from the status quo. Our gut told us something was going on here. Wrong Thinkers were able to overcome obstacles both in themselves and in the culture at large to achieve exceptional results. We have since identified important moments when, for the rest of us, the flame of possibility gets extinguished. We have developed six Think Wrong Practices that simultaneously advance compelling solutions while defending them from attacks by well-meaning Right Thinkers. We also see that conviction, determination, and persistence alone are not enough to escape the status quo, or those hell-bent to protect it. Thinking right already has its language and its tools; it's already got its best practices, defenses, and case studies. In the think-right world of brainstorming, focus groups, marketing surveys, number crunching, bottom -lines, and ROI-focused agendas, it's hard to defend something nebulous and new. Wrong thinkers need their own language, frameworks, tools, and techniques to counter the existing norms. This book is our attempt to arm you--and people everywhere--so you may conceive the inconceivable and bring along others to help implement your status-quo-busting solutions. In the coming chapters, you'll learn about the six Think Wrong Practices that we have developed over the past two decades. These practices are particularly effective at key moments when right thinking tries to stop you.

Conquer the Crash

Today's financial and economic tribulations were a long time in the making. Many people ask, "Why didn't someone see it coming?" A New York Times bestselling book did see it coming. Over 100,000 people read it in time to protect their wealth. The book foresaw and explained the collapse in home prices, plunge in stocks, subprime debacle, liquidity crisis, the demise of Fannie and Freddie, the Federal Reserve's failure to turn the trend, and lots more. The book was Robert Prechter's Conquer the Crash, published in early 2002, when the Dow was above 10,000 and the financial world was partying around-the-clock. Fast forward to today: the average U.S. homeowner has suffered a decline of 30% to 40% in property value. Stocks and commodities had their biggest fall since 1929-1932. Fannie Mae is a zombie corporation under the government's protection. The Fed has pushed every button at its disposal (and then some), to no avail. If Prechter thought a whole new book would help, he'd have written one. But Conquer the Crash is a book-length forecast that's still coming true -- only some of the future has caught up with the specific predictions he published back then. There is much more to come. That means more danger, but also great opportunity. Conquer the Crash, 2nd edition offers you 188 new pages of vital information (480 pages total) plus all the original forecasts and recommendations that make the book more compelling and relevant than the day it published. In every disaster, only a very few people prepare themselves beforehand. Think about investor enthusiasm in 2005-2008, and you'll

realize it's true. Even fewer people will be ready for the soon-approaching, next leg down of the unfolding depression. In this 2nd edition, Prechter gives a warning he's never had to include in 30 years of publishing -- namely, that the doors to financial safety are closing all over the world. In other words, prudent people need to act while they can. Conquer the Crash, 2nd Edition readers will receive exclusive online access to the Conquer the Crash Readers Page, where Prechter continually updates the book's recommended services and institutions.

Conquer Me

It was August 25, 2006, my first on-camera studio open for the CBS News broadcast 60 Minutes. Executive Producer Jeff Fager poked his head in the dressing room." Good luck, Brotha! You've come a long way to get here. You've earned it." If only he knew. My mind flashed back to elementary school, when a therapist had informed my mother, "I'm sorry, Mrs. Pitts, your son cannot read." In Step Out on Nothing, Byron Pitts chronicles his astonishing story of overcoming a childhood filled with obstacles to achieve enormous success in life. Throughout Byron's difficult youth—his parents separated when he was twelve and his mother worked two jobs to make ends meet—he suffered from a debilitating stutter. But Byron was keeping an even more embarrassing secret: He was also functionally illiterate. For a kid from inner-city Baltimore, it was a recipe for failure. Pitts turned struggle into strength and overcame both of his impediments. Along the way, a few key people "stepped out on nothing" to make a difference for him—from his mother, who worked tirelessly to raise her kids right and delivered ample amounts of tough love, to his college roommate, who helped Byron practice his vocabulary and speech. Pitts even learns from those who didn't believe in him, like the college professor who labeled him a failure and told him to drop out of college. Through it all, he persevered, following his steadfast passion. After fifteen years in local television, he landed a job as a correspondent for CBS News in 1998, and went on to become an Emmy Award-winning journalist and a contributing correspondent for 60 Minutes. Not bad for a kid who couldn't read. From a challenged youth to a reporting career that has covered 9/11 and Iraq, Pitts's triumphant and uplifting story will resonate with anyone who has felt like giving up in the face of seemingly insurmountable hardships.

Wild at Heart

In this instant New York Times bestseller, Angela Duckworth shows anyone striving to succeed that the secret to outstanding achievement is not talent, but a special blend of passion and persistence she calls "grit." "Inspiration for non-genius everywhere" (People). The daughter of a scientist who frequently noted her lack of "genius," Angela Duckworth is now a celebrated researcher and professor. It was her early eye-opening stints in teaching, business consulting, and neuroscience that led to her hypothesis about what really drives success: not genius, but a unique combination of passion and long-term perseverance. In Grit, she takes us into the field to visit cadets struggling through their first days at West Point, teachers working in some of the toughest schools, and young finalists in the National Spelling Bee. She also mines fascinating insights from history and shows what can be gleaned from modern experiments in peak performance. Finally, she shares what she's learned from interviewing dozens of high achievers—from JP

Morgan CEO Jamie Dimon to New Yorker cartoon editor Bob Mankoff to Seattle Seahawks Coach Pete Carroll. “Duckworth’s ideas about the cultivation of tenacity have clearly changed some lives for the better” (The New York Times Book Review). Among Grit’s most valuable insights: any effort you make ultimately counts twice toward your goal; grit can be learned, regardless of IQ or circumstances; when it comes to child-rearing, neither a warm embrace nor high standards will work by themselves; how to trigger lifelong interest; the magic of the Hard Thing Rule; and so much more. Winningly personal, insightful, and even life-changing, Grit is a book about what goes through your head when you fall down, and how that—not talent or luck—makes all the difference. This is “a fascinating tour of the psychological research on success” (The Wall Street Journal).

Conquer the Night

Amoral, cunning, ruthless, and instructive, this multi-million-copy New York Times bestseller is the definitive manual for anyone interested in gaining, observing, or defending against ultimate control – from the author of *The Laws of Human Nature*. In the book that *People* magazine proclaimed “beguiling” and “fascinating,” Robert Greene and Joost Elffers have distilled three thousand years of the history of power into 48 essential laws by drawing from the philosophies of Machiavelli, Sun Tzu, and Carl Von Clausewitz and also from the lives of figures ranging from Henry Kissinger to P.T. Barnum. Some laws teach the need for prudence (“Law 1: Never Outshine the Master”), others teach the value of confidence (“Law 28: Enter Action with Boldness”), and many recommend absolute self-preservation (“Law 15: Crush Your Enemy Totally”). Every law, though, has one thing in common: an interest in total domination. In a bold and arresting two-color package, *The 48 Laws of Power* is ideal whether your aim is conquest, self-defense, or simply to understand the rules of the game.

The Man in the High Castle

Beginning with the destruction of Jerusalem and continuing through the persecutions of Christians in the Roman Empire, the apostasy of the Dark Ages, the shining light of the Reformation, and the worldwide religious awakening of the nineteenth century, this volume traces the conflict into the future, to the Second Coming of Jesus and the glories of the earth made new. In this concluding volume, the author powerfully points out the principles involved in the impending conflict and how each person can stand firmly for God and His truth.
