(© 2015) The Subcommittee on the Catechism, United States Conference of Catholic Bishops, has found that this catechetical high school text is in conformity with the Catechism of the Catholic Church and fulfills the requirements of Core Course IV of the Doctrinal Elements of a Curriculum Framework for the Development of Catechetical Materials for Young People of High School Age. Students deepen their understanding of Jesus Christ, the fullness of God's Revelation, as they encounter him in the living Body of Christ, the Catholic Church. Jesus and the Church: One, Holy, Catholic, Apostolic supports Course IV of the USCCB curriculum and is the first high school textbook released by Ave Maria Press in its new Encountering Jesus series. As they engage with the content of this text, students will recognize Christ present and active in their lives through the visible and vibrant mission of Church, defined by her four characteristics--one, holy, catholic, and apostolic. While Jesus and the Church places the foundations of the Church in their historical and scriptural context, the textbook goes further by guiding students to recognize the sacred nature of the Church and engaging them to more actively participate in the living Body of Christ and serve as witnesses to the sacred Gospel in the world today. Simply put, the goal of the book--as in the Encountering Jesus series as a whole--is to change the lives of students by making real-life connections between what they are learning about the Church and how they encounter Jesus in the contemporary world.

When Julie Miller began writing her successful developmental math series, one of her primary goals was to bridge the gap between preparatory courses and college algebra. For thousands of students, the Miller/ONeill/Hyde (or MOH) series has provided a solid foundation in developmental mathematics. With the Miller College Algebra series, Julie has carried forward

her clear, concise writing style; highly effective pedagogical features; and complete author-created technological package to students in this course area. The main objectives of the college algebra series are three-fold: -Provide students with a clear and logical presentation of the basic concepts that will prepare them for continued study in mathematics. -Help students develop logical thinking and problem-solving skills that will benefit them in all aspects of life. -Motivate students by demonstrating the significance of mathematics in their lives through practical applications.

### **Glencoe Algebra 1**

The first full-length study of one of the territorial rain cults; and an endeavour to preserve knowledge about a rapidly changing complex system of traditional beliefs, rituals, and practices, under the influence of Christianity, Islam, and western education. Within this cult, a person who is possessed by the spirit of the ancestors is commonly known as Bimbi: the seer, a charismatic and moral leader, to whom the community ascribes a prophetic role. As a religious system, the Bimbi cult has an intricate system of agricultural rituals such as rainmaking ceremonies, a distinctive unwritten theology, elaborate liturgical observances and an organised, inherited priesthood. Studying the Bimbi cult from a multi-disciplinary perspective, the author illustrated how traditional beliefs and practices still have a grip on people in the countryside, who live in an agricultural subsistence economy, and at the mercy of ecological forces. He contends that these forces will continue to shape their understanding of God, themselves and the world around them for many years to come, unless these people change from an agricultural to an industrial society.
