Holt World History

Published by OpenStax College, U.S. History covers the breadth of the chronological history of the United States and also provides the necessary depth to ensure the course is manageable for instructors and students alike. U.S. History is designed to meet the scope and sequence requirements of most courses. The authors introduce key forces and major developments that together form the American experience, with particular attention paid to considering issues of race, class and gender. The text provides a balanced approach to U.S. history, considering the people, events and ideas that have shaped the United States from both the top down (politics, economics, diplomacy) and bottom up (eyewitness accounts, lived experience).

Tennessee Through Time, The Later Years

As the regional lingua franca, the Uyghur language long underpinned Uyghur national identity in Xinjiang. However, since the 'bilingual education' policy was introduced in 2002, Chinese has been rapidly institutionalised as the sole medium of instruction in the region's institutes of education. As a result, studies of the bilingual and indeed multi-lingual Uyghur urban youth have emerged as a major new research trend. This book explores the relationship between language, education and identity among the urban Uyghurs of contemporary Xinjiang. It considers ways in which Uyghur urban youth identities began to evolve in response to the state imposition of 'bilingual education'. Starting by defining the notion of ethnic identity, the book explores the processes involved in the formation and development of personal and group identities, considers why ethnic boundaries are constructed between groups, and questions how ethnic identity is expressed in social, cultural and religious practice. Against this background, contributors adopt a special focus on the relationship between language use, education and ethnic identity development. As a study of ethnicity in China this book will be of huge interest to students and scholars of Chinese culture and society, Asian ethnicity, cultural anthropology, sociolinguistics and Asian education.

The New York Times bestseller *A Long Walk to Water* begins as two stories, told in alternating sections, about two eleven-year-olds in Sudan, a girl in 2008 and a boy in 1985. The girl, Nya, is fetching water from a pond that is two hours' walk from her home: she makes two trips to the pond every day. The boy, Salva, becomes one of the "lost boys" of Sudan, refugees who cover the African continent on foot as they search for their families and for a safe place to stay. Enduring every hardship from loneliness to attack by armed rebels to contact with killer lions and crocodiles, Salva is a survivor, and his story goes on to intersect with Nya's in an astonishing and moving way.

In this fascinating book, New Yorker business columnist James Surowiecki explores a deceptively simple idea: Large groups of people are smarter than an elite few, no matter how brilliant—better at solving problems, fostering innovation, coming to wise decisions, even predicting the future. With boundless erudition and in delightfully clear prose, Surowiecki ranges across fields as diverse as popular culture, psychology, ant biology, behavioral economics, artificial intelligence, military history, and politics to show how this simple idea offers important lessons
