### **Risk Management:(For CAIB Examinations)**

A practical guide to the practices and procedures of effectively managing banking risks *Managing Risks in Commercial and Retail Banking* takes an in-depth, logical look at dealing with all aspects of risk management within the banking sector. It presents complex processes in a simplified way by providing real-life situations and examples. The book examines all dimensions of the risks that banks face—both the financial risks—credit, market, and operational—and the non-financial risks—money laundering, information technology, business strategy, legal, and reputational. Focusing on methods and models for identifying, measuring, monitoring, and controlling risks, it provides practical advice backed up by solid theories, without resorting to the use of complicated mathematical and statistical formulas. Author Amalendu Ghosh exposes topics that are usually absent in books on managing banking risk—such as design of control framework, risk management architecture, credit risk rating, risk-based loan pricing, portfolio analysis, business continuity planning, and corporate governance. Author has extensive experience with a variety of major banks and institutions worldwide and brings a fresh

perspective in the wake of the global finance crisis Presents a novel approach using models of the credit rating of different types of borrowers, the methodology for assigning weights for deriving the rating, and the scoring process Covers the essentials of corporate governance and options for credit risk assessment in line with the recommendations made in the New Basel Capital Accord Explains the methodology of risk-based internal audit, including techniques to enable bank branches to switch over from the old transaction-based audit methods With its logical sequence of the aspects of risk management, the book's layout is ideal for presentations, making it a handy tool for risk management training

### **7 Years UPSC IAS/ IPS Mains General Studies Papers 1 - 4 Year-wise Solved (2013 - 2019)**

Recent forms of realism in continental philosophy that are habitually subsumed under the category of "speculative realism," a denomination referring to rather heterogeneous strands of philosophy, bringing together object-oriented ontology (OOO), non-standard philosophy (or non-philosophy), the speculative realist ideas of Quentin Meillassoux and Marxism, have provided grounds for the much needed critique of culturalism in gender theory, and the authority with which post-structuralism has dominated feminist theory for decades. This publication aims to bring forth some of the feminist debates prompted by the so-called "speculative

turn," while demonstrating that there has never been a niche of "speculative realist feminism." Whereas most of the contributions featured in this collection provide a theoretical approach invoking the necessity of foregrounding new forms of realism for a "feminism beyond gender as culture," some of the essays tackle OOO only to invite a feminist critical challenge to its paradigm, while others refer to some extent to non-philosophy or the new materialisms but are not reducible to either of the two. We have invited essays from intellectual milieus outside the Anglo-Saxon academic center, bringing together authors from Serbia, Slovenia, France, Ireland, the UK, and Canada, aiming to promote feminist internationalism (rather than a "generous act of cultural inclusion").
