There are poems of pain, love, sorrow, ambition, race and many other factors that makeup the author's thinking process. "As a writer, one's thoughts and beliefs change overtime, tomorrow the way I see things will change but that's how evolution occurs. Some poems are a documentation of those changes, and as my mindset enhances, so does its thoughts upon which it sits over time."

### **The Blossoming Universe of Violet Diamond**

'Diamonds in the rough are cowboys of vitality who have displayed the inborn chevalier of honor and respect (unwritten code of the West), cowboys who are born with the God-given ability of awareness, positioning, and timing, who have been tried and tested in the fire of time and are ascribed the title of being a hand by other old-time, cowboys. Every diamond in the rough has certain characteristics within his character that set him apart as a cut above the average. Younger cowboys, who have grown up under the influence of older cowboys, are not taught the common sense or good manners. These traits are expected to be lived out in every cowboy.' Just what makes a cowboy A Diamond in the Rough? Lloyd Perry can tell you because he is one. Lloyd has lived life by the code of the Old West and spent his days cowboying around. In this entertaining and meaningful glimpse into the cowboy way of life, Lloyd shares tales of hunting, training dogs, cowboy work, ironic incidents, and lessons that apply to any walk of life. Through it all, glory is given to God for His provision. One of Lloyd's daughters said to him, 'Dad, I've

come to realize I don't know you. None of your family knows you. I don't believe anyone really knows you.' From that, this intimate, inspirational memoir came to be. Sit down for a spell with a strong pot of coffee, for you'll be caught up in these tales from start to finish. You'll love this gem of a book, A Diamond in the Rough.

### **Bible jewels [sermons]. Author's ed**

A "riveting and illuminating" Bill Gates Summer Reading pick about how and why some nations recover from trauma and others don't (Yuval Noah Harari), by the Pulitzer Prize-winning author of the landmark bestseller Guns, Germs, and Steel. In his international bestsellers Guns, Germs and Steel and Collapse, Jared Diamond transformed our understanding of what makes civilizations rise and fall. Now, in his third book in this monumental trilogy, he reveals how successful nations recover from crises while adopting selective changes -- a coping mechanism more commonly associated with individuals recovering from personal crises. Diamond compares how six countries have survived recent upheavals -- ranging from the forced opening of Japan by U.S. Commodore Perry's fleet, to the Soviet Union's attack on Finland, to a murderous coup or countercoup in Chile and Indonesia, to the transformations of Germany and Austria after World War Two. Because Diamond has lived and spoken the language in five of these six countries, he can present gut-wrenching histories experienced firsthand. These nations coped, to varying degrees, through mechanisms such as acknowledgment of responsibility,

painfully honest self-appraisal, and learning from models of other nations. Looking to the future, Diamond examines whether the United States, Japan, and the whole world are successfully coping with the grave crises they currently face. Can we learn from lessons of the past? Adding a psychological dimension to the in-depth history, geography, biology, and anthropology that mark all of Diamond's books, *Upheaval* reveals factors influencing how both whole nations and individual people can respond to big challenges. The result is a book epic in scope, but also his most personal yet.

“One of the funniest—and most subversive—books of the year” (Esquire): Megan Amram, a writer for Parks and Recreation, delivers a politically, scientifically, and anatomically incorrect “textbook” that will have women screaming with laughter, and men dying to know what the noise is about. “Laugh-out-loud funny...an exuberantly scathing takedown of the sexism lurking within the fun, flirty pages of women’s magazines” (The Boston Globe), Science...for Her! showcases Megan

Amram's fiendish wit with a pitch-perfect attack on everything from those insanely perky tips for self-improvement to our bizarre shopaholic dating culture to the socially mandated pursuit of mind-blowing sex to the cringe-worthy secret codes of food and body issues. Part incisive farce, part biting commentary on gender, this "hilarious feminist manifesto for the modern era" (Salon) blends Cosmo and science to highlight absurdities with a machine-gun of laugh-inducing lines that leave nothing and no one unscathed. Subjects include: this Spring's ten most glamorous ways to die; tips for hosting your own big bang; what religion is right for your body type; and the most pressing issue facing women today: kale!!! This "giddily demented" (The Washington Post) satirical gem is "comedy-as-borderline-art" (Flavorwire). "Science...for Her! is a triumph that anybody with a sense of humor will appreciate" (People).

### **Diamond in the Night**

Diamond films grown by activated chemical vapor deposition have superlative thermal, mechanical, optical, and electronic properties combined with a very high degree of chemical inertness to most environments. These properties, together with the ability to fabricate films and shapes of considerable size, promise an exciting new material with many applications. Some applications are on the verge of commercialization but many await a few more technological developments. Diamond-like films are already employed in both commercial and military

applications. The popular press, as well as the scientific and technological and industrial communities, are increasingly interested in the potential for future development of these materials. Although there are many technical papers and review articles published, there is no single comprehensive introduction to these technologies. The Scientific Affairs Division of NATO recognized the need and the future importance of these technologies and authorized an Advanced Study Institute on diamond and diamond-like films. NATO Advanced Study Institutes are high level teaching activities at which a carefully defined subject is presented in a systematic and coherently structured program. The subject is treated in considerable depth by lecturers eminent in their fields and of international standing. The presentations are made to students who are scientists in the field or who possess an advanced general scientific background.

For decades the suburbs have been where art happens despite: despite the conformity, the emptiness, the sameness. Time and again, the story is one of gems formed under pressure and that resentment of the suburbs is the key ingredient for creative transcendence. But what if, contrary to that, the suburb has actually been an incubator for distinctly American art, as positively and as surely as in any other cultural hothouse? The Routledge Companion to Urban Imaginaries delves into examples of urban imaginaries across multiple media and geographies: from new visions of smart, eco, and resilient cities to urban dystopias in popular culture; from architectural renderings of starchitecture and luxury living to performative activism for new spatial justice; and from speculative experiments in urban planning, fiction, and photography to augmented urban realities in crowd-mapping and mobile apps. The volume brings various global perspectives together and into close dialogue to offer a broad, interdisciplinary, and critical overview of the current state of research on urban imaginaries. Questioning the politics of urban imagination, the companion gives particular attention to the role that urban imaginaries play in shaping the future of urban societies, communities, and built environments. Throughout the companion, issues of power, resistance, and uneven geographical development remain central. Adopting a transnational perspective, the volume challenges research on urban imaginaries from the perspective of globalization and postcolonial studies, inviting critical reconsiderations of urbanism in its diverse current forms and definitions. In the process, the companion explores issues of Western-centrism in urban research and design, and accommodates current attempts to radically rethink urban form and experience. This is an essential resource for scholars and graduate researchers in the fields of urban planning and architecture; art, media, and cultural studies; film, visual, and literary studies;

sociology and political science; geography; and anthropology.
