This book presents a historical development of the integration theories of Riemann, Lebesgue, Henstock–Kurzweil, and McShane, showing how new theories of integration were developed to solve problems that earlier theories could not handle. It develops the basic properties of each integral in detail and provides comparisons of the different integrals. The chapters covering each integral are essentially independent and can be used separately in teaching a portion of an introductory course on real analysis. There is a sufficient supply of exercises to make the book useful as a textbook.

Collected here for the first time, this series of lectures delivered by Lonergan at Boston College in 1957 illustrates a pivotal time in Lonergan's intellectual history, marking both the transition from the faculty psychology still present in his work Insight to intentionality analysis and his initial differentiation of the existential level of consciousness. The lectures on logic deal with the general character of mathematical logic and its relation to truth, Scholasticism, and Aristotelian logic. Continuing Lonergan's long-standing interest in the foundations of thought, the lectures on existentialism offer a penetrating account of Husserl and his influence. They also deal with Jaspers, Heidegger, Sartre, and Marcel. They offer reflections on such topics as being oneself, dread, horizon, and the existential gap. Perhaps more dramatically than in any other work these papers reveal Lonergan's dual commitment to the rigor of scientific analysis (in the field of mathematical logic) and to the sensitivity of continental philosophies to existential issues.

Former army sharpshooter Jake Coleman has nothing more in mind than a little relief from a hot, Texas-summer night when he jumps on his bike and heads to a biker bar in search of a cold beer. But when he encounters a three-against-one fight right outside the bar door, he steps in to improve the odds for an outnumbered stranger. What Jake doesn't know is that the man he's just helped is none other than Diego Santiago, vice-president of the Houston based, Los Patrons Motorcycle Club. An impressed and grateful Santiago befriends Jake and mentors him as he works to meet the requirements of a prospective member of Los Patrons. Jake finally accepted as a "full patch member," finds something he's been searching for all his life; brotherhood. As he embarks on the life of a Los Patrons brother, Jake falls in love with an intoxicating woman, and rapidly rises up the club's ranks, discovering something chilling about himself...that no act is too grim or violent for him to perform, if it's in service of those he has come to call his brothers. *God Forgives - Patrons Repay* Written with a knife-edge authenticity, *M.C. - I Am My Brother's Keeper* catapults readers into the dark and dangerous netherworld of a big city motorcycle club.

Proposes that a Calculus of Variations analogous to that which interested the early Husserl is to replace the isolation of individuals and disciplines and lead to genuine progress and economic justice. The reach beyond effete academic isolation implies that adult growth is viewed normatively as accelerating.
