In *The Business of Creativity*, Brian Moeran, a leading scholar and writer on the creative industries, takes the sacred relic of creativity out of the crypt and airs it in the ethnographic alley. In contrast to the persistent image of creativity as the spontaneous inspiration of a gifted individual, Moeran shows how creativity emerges from collaborative engagements among people, genres, institutions, materials and technologies. He alternates thick description of work in fashion, advertising, and ceramic art with theoretical innovations that shed new light on the aesthetic, symbolic, and economic dimensions of creativity and the production of worth.

It is widely accepted that the machinery of multicultural societies and liberal

democratic systems is dependent upon various forms of dialogue - dialogue between political parties, between different social groups, between the ruling and the ruled. But what are the conditions of a democratic dialogue and how does the philosophical dialogic approach apply to practice? Recently, facing challenges from mass protest movements across the globe, liberal democracy has found itself in urgent need of a solution to the problem of translating mass activity into dialogue, as well as that of designing borders of dialogue. Exploring the multifaceted nature of the concepts of dialogue and democracy, and critically examining materializations of dialogue in social life, this book offers a variety of perspectives on the theoretical and empirical interface between democracy and dialogue. Bringing together the latest work from scholars across Europe, *Democracy in Dialogue*, *Dialogue in Democracy* offers fresh theorizations of the role of dialogue in democratic thought and practice and will appeal to scholars of sociology, political science and social and political theory.
