Geriatric Emergency Medicine

A timely work describing how localized hospital-based health technology assessment (HB-HTA) complements general, 'arms-length' HTA agency efforts, and what has been the collective global impact of HB-HTA across the globe. While HB-HTA has gained significant momentum over the past few years, expertise in the field, and information on the operation and organization of HB-HTA, has been scattered. This book serves to bring this information together to inform those who are currently working in the field of HTA at the hospital, regional, national or global level. In addition, this book is intended for decision-makers and policy-makers with a stake in determining the uptake and decommissioning of new and established technologies in the hospital setting. HTA has traditionally been performed at the National/Regional level by HTA Agencies, typically linked to governments. Yet hospitals are the main entry door for most health technologies (HTs). Hospital decision-makers must undertake multiple high stakes investment and disinvestment decisions annually for innovative HTs, usually without adequate information. Despite the existence of arms-length HTA Agencies, inadequate information is available to hospital decision-makers either because relevant HTA reports are not yet released at the time of entry of new technologies to the field, or because even when the report exists, the information contained is insufficient to clarify the contextualized

informational needs of hospital decision makers. Therefore, there has recently been a rising trend toward hospital-based HTA units and programs. These units/programs complement the work of National/Regional HTA Agencies by providing the key and relevant evidence needed by hospital decision makers in their specific hospital context, and within required decision-making timelines. The emergence of HB-HTA is creating a comprehensive HTA ecosystem across health care levels, which creates better bridges for knowledge translation through relevance and timeliness.

On the Revolutions of Heavenly Spheres

Catalogs of the Ethel Percy Andrus Gerontology Center, University of Southern California, Los Angeles: Subject catalog

This book discusses all important aspects of emergency medicine in older people, identifying the particular care needs of this population, which all too often remain unmet. The up-to-date and in-depth coverage will assist emergency physicians in identifying patients at risk for adverse outcomes, in conducting appropriate assessment, and in providing timely and adequate care. Particular attention is paid to the common pitfalls in emergency management and means of avoiding them. Between 1980 and 2013, the number of older patients in emergency departments worldwide doubled. Compared with younger patients, older people suffer from more comorbidities, a higher mortality rate, require more complex assessment and diagnostic testing, and tend to stay longer in the emergency department. This book, written by internationally recognized experts in emergency medicine and geriatrics, not only presents the state of the art in the care of this population but also underlines the increasing need for adequate training and development in the field.

Ninja

Instruments and Experimental Techniques

The official Ninja Foodi Pressure Cooker Cookbook is here--the pressure is off When you pair your Ninja® Foodi(tm) Pressure Cooker with The Big Cookbook, getting creative in the kitchen is simple. With 175 foolproof, Ninja-approved recipes that require minimal prep and cleanup, this Ninja Foodi (complete/big book) will open tons of possibilities with your multicooker.

Written by Kenzie Swanhart, Ninja's director of culinary innovation, along with her team of Ninja Test Kitchen Chefs, this is the complete official cookbook for your Ninja® Foodi(tm) Pressure Cooker. The wide variety of easy and tasty recipes in the Ninja Foodi (complete/big book) will allow you to use your favorite appliance every day for any meal--breakfast, lunch, and dinner. The Ninja Foodi (complete/big book) includes: Ninja know-how--How do you know when your food is done? What are the best Ninja accessories to use? Those questions and more, answered. Meal plans--Save time and make fun meals all week with three delicious meal plans from the Ninja Foodi (complete/big book). Fan-tested, chef-approved--These recipes in the Ninja Foodi (complete/big book) don't just come from Ninja experts, but from the Ninja Foodi family of fans and collaborators. Take your kitchen game to incredible new heights with the Ninja Foodi (complete/big book).

Competitive Problems in the Drug Industry

Opinions of the Attorney General

The Ptolemaic system of the universe, with the earth at the center, had held sway since antiquity as authoritative in philosophy, science, and church teaching. Following his observations of the heavenly bodies, Nicolaus Copernicus (1473-1543) abandoned the geocentric system for a heliocentric model, with the sun at the center. His remarkable work, *On the Revolutions of Heavenly Spheres*, stands as one of the greatest intellectual revolutions of all time, and profoundly influenced, among others, Galileo and Sir Isaac Newton.

The federal reporter

Supreme Court Appellate Division Fourth Department

U.S. experiences in Iraq and Afghanistan have demonstrated that improving U.S. capacity for stabilization and reconstruction operations is critical to national security. The authors recommend building civilian rather than military capacity, realigning and reforming existing agencies, and funding promising programs. They also suggest improvements to deployable police capacity, crisis-management processes, and guidance and funding.

Security Force Assistance in Afghanistan

Anglo-American Cataloging Rules

Security force assistance (SFA) is a central pillar of the counterinsurgency campaign being waged by U.S. and coalition forces in Afghanistan. This monograph analyzes SFA efforts in Afghanistan over time, documents U.S. and international approaches to building the Afghan force from 2001 to 2009, and provides observations and recommendations that emerged

from extensive fieldwork in Afghanistan in 2009 and their implications for the U.S. Army.

Information Bulletin

Capital and the Debt Trap

The financial crisis is destroying wealth but is also a remarkable opportunity to uncover the ways by which debt can be used to regulate the economic system. This book uses four case studies of cooperatives to give an in-depth analysis on how they have braved the crisis and continued to generate wealth.

Educational Delusions?

University of California Union Catalog of Monographs Cataloged by the Nine Campuses from 1963 Through 1967: Subjects

The first major battle over school choice came out of struggles over equalizing and integrating schools in the civil rights era, when it became apparent that choice could be either a serious barrier or a significant tool for reaching these goals. The second large and continuing movement for choice was part of the very different anti-government, individualistic, market-based movement of a more conservative period in which many of the lessons of that earlier period were forgotten, though choice was once again presented as the answer to racial inequality. This book brings civil rights back into the center of the debate and tries to move from doctrine to empirical research in exploring the many forms of choice and their very different consequences for equity in U.S. schools. Leading researchers conclude that although helping minority children remains a central justification for choice proponents, ignoring the essential civil rights dimensions of choice plans risks compounding rather than remedying racial inequality.

Forthcoming Books

American Book Publishing Record Cumulative 1950-1977

Vorschule Im Klavierspiel, Op. 101, by Ferdinand Beyer (1803--1863) was first published in 1860. Since that time, it has been used by piano students throughout the world, especially in Asian countries. When compared with piano methods written in the 20th and 21st centuries, it appears more like a technique book than a piano method. This edition has been edited to be useful for today's piano students, either as a method (with teacher guidance) or as a supplementary book.

The Big Ninja Foodi Pressure Cooker Cookbook

31st Annual International Conference Proceedings

Library of Congress Catalog

The Electric Pressure Cooker Cookbook is your resource for learning all the shortcuts to make a delicious meal in a fraction of the usual time—with over 200 new family-friendly recipes from the world's leading blogger on pressure cooking Barbara Schieving (of PressureCookingToday.com). These recipes are big on flavor, imaginative in their variety, and easy to make, featuring fresh, natural, and nutritious ingredients. The Electric Pressure Cooker Cookbook features loads of tips and tricks that help you get the most from your pressure cooker, no matter what brand you own. If you're a busy parent or can't find time to make dinners after work, then you will love the Shortcut Dinners and 30-Minute Meals sections. With the terrific weeknight meals on the fly, you'll also adore the Sunday Suppers perfect for special weekend gatherings. Find recipes for every taste and diet: Robust meat and chicken dishes Vegetarian mains and sides Healthy breakfasts Tasty sandwiches,

wraps, and tacos Soothing soups and stews And a big chapter full of quick and easy desserts Whether you're an experienced pressure cooker user or completely new to this time-saving device, you will return to this cookbook again and again for recipes your whole family will love.

Improving Capacity for Stabilization and Reconstruction Operations

Guides for Electric Cooperative Development and Rural Electrification

Library of Congress Catalogs

Legally Available U.S. Government Information as a Result of the Public Information Act: U.S. Government agencies except the Department of Defense and the National Aeronautics and Space Administration

Noise Control

This series of modules, collectively known as the NRECA International Technical Assistance Guides (TAGs), is the result of an effort to document NRECA International's vast rural electrification and electric cooperative development experience. The modules have been prepared with the purpose of serving as practical guides for practitioners, as well as educational material for those who wish to learn more about specific topics within the field of rural electrification and the electric cooperative model. The overall objective of these modules is to improve rural electrification project design, implementation,

construction, and system operation, ultimately leading to a higher quality and more reliable electric service for those consumers involved.

Bulletin

This book has a unique focus on physiotherapy techniques and training methods that are ideally suited for the obese patient. Despite its related comorbidities and disability, not to mention its pandemic proportions, the impact of obesity on individual capacities and rehabilitative outcomes is often neglected by physiotherapists and physical trainers alike. The number of disabled subjects who are also obese is now increasing worldwide, as is the rate of obese patients admitted to post-acute rehabilitation units. The effective rehabilitative treatment of these patients involves special multidisciplinary considerations. This book fills that gap, by gathering evidence-based chapters addressing not only the physiological limitations of obese subjects but also state-of-the-art, novel and specific treatment and training modalities suited for these patients. Though the content is primarily intended for rehabilitation practitioners (physiotherapists, nutritionists, dieticians, psychologists, PRM specialists), it will also benefit students and researchers engaged in this particular multidisciplinary field. The book's ultimate goal is to increase professionals' awareness of this multidisciplinary area, and to provide a pragmatic guidebook for those who want to engage in the rehabilitation of patients who are also obese.
