Entering its 6th edition, Physician Assistant: A Guide to Clinical Practice is the only text that covers all aspects of the physician assistant profession, the PA curriculum, and the PA's role in clinical practice. It is designed as a highly visual and practical resource to be used across the spectrum of lifelong learning, enabling students and practicing PAs to thrive in a rapidly changing health care system. Teaches how to prepare for each core clinical rotation and common electives, as well as how to work with atypical patient populations such as homeless patients and patients with disabilities. A succinct, bulleted writing style; convenient tables; practical case studies; and clinical application questions throughout enable you to master key concepts and clinical applications. Helps you master all the core competencies needed for certification or recertification. Addresses all six Physician Assistant Competencies, as well as providing guidance for the newly graduated PA entering practice. Includes quick-use resources, such as objectives and key points sections for each chapter, tip boxes with useful advice, abundant tables and images, and 134 updated case studies. Features chapters for the 7 core clinical rotations and 5 common electives, with key guidance on how to prepare effectively and what to expect. Provides updated health policy information, expanded information about international programs, cultural competencies, and pearls and pitfalls on working internationally as a PA. Outlines the basic principles of Interprofessional Education – an important new trend in medical education nationally. New chapters cover: Maximizing Your Education, Future of the Profession, Principles of PA Education, Managing Stress and Burnout, and many other topics.

What do digital platforms mean for cinema studies in Canada? In an era when digital media are proliferating and thousands upon thousands of clips are available online, it seems counter-intuitive to say that audio-visual history is quickly disappearing. But the two processes are actually happening in tandem. Adopting a media-archaeological approach to the history of cinema, contributors to Cinephemera cover a wide range of pressing issues relating to Canadian cinema's ephemerality, including neglected or overlooked histories, the work of found footage filmmakers, questions about access and copyright, and practices of film archiving. Spurred by rapid changes to technologies of production, viewing, and preservation, this collection showcases both leading and emerging scholars grappling with the shifting meaning of cinema as an object of study. Film historians are put in conversation with experimental filmmakers and archivists to provide renewed energy for cinema studies by highlighting common interests around the materiality and circulation of films, videos, and other old media. Considering a wide range of cases from the earliest days of silent film production to the most recent initiatives in preservation, Cinephemera exposes the richness of moving image production in Canada outside the genres of feature length narrative fiction and documentary - a history that is at risk of being lost just as it is appearing. Contributors include Andrew Burke (Winnipeg), Jason Crawford (Champlain), Liz Czach (Alberta), Seth Feldman (York), Monika Kin Gagnon (Concordia), André Habib (Montreal), Randolph Jordan (SFU), Peter Lester (Brock), Scott Mackenzie (Queen's); Louis Pelletier (Montreal), Katherine Quanz (WLU), Micky Story (New College), Charles Tepperman (Calgary), Jennifer VanderBurgh (Saint Mary's), William C. Wees (McGill), Jerry White (Dalhousie), and Christine York (Concordia).

Physician Assistant: A Guide to Clinical Practice E-Book

Miracle in Lake Placid

Silly Old Possum

THE MAGIC HAD ALWAYS BEEN THERE. Tep Jones has always felt the magic of Picture House, an Anasazi cliff dwelling near the seed farm where he lives with his parents. But he could never have imagined what would happen to him on the night of

a lunar eclipse, when he finds a bone flute left behind by grave robbers. Tep falls under the spell of a powerful ancient magic that traps him at night in the body of an animal. Only by unraveling the mysteries of Picture House can Tep save himself and his desperately ill mother. Does the enigmatic old Indian who calls himself Cricket hold the key to unlocking the secrets of the past? And can Tep find the answers in time?

This book constitutes the proceedings of the 17th Brazilian Symposium on Programming Languages, SBLP 2013, held in Brasília, Brazil, in September/October 2013. The 10 full and 2 keynote talks were carefully reviewed and selected from 31 submissions. The papers are organized in topical sections on program generation and transformation, including domain-specific languages and model-driven development in the context of programming languages, programming paradigms and styles, including functional, object-oriented, aspect-oriented, scripting languages, real-time, service-oriented, multithreaded, parallel, and distributed programming, formal semantics and theoretical foundations, including denotational, operational, algebraic and categorical, program analysis and verification, including type systems, static analysis and abstract interpretation, and programming language design and implementation, including new programming models, programming language environments, compilation and interpretation techniques.

U.S. Geological Survey Professional Paper

This book teaches fundamental Windows tasks such as selecting, sizing, and moving a window, opening a menu, etc. Gives experienced users information needed to operate Windows more efficiently, such as font management tips, and customization information.

The Life-Changing Magic of Tidying Up

This book is a love letter to the artists, scenes, and sounds defining North Carolina's extraordinary contributions to American popular music. David Menconi spent three decades immersed in the state's music, where traditions run deep but the energy expands in countless directions. Menconi shows how working-class roots and rebellion tie North Carolina's Piedmont blues, jazz, and bluegrass to beach music, rock, hip-hop, and more. From mill towns and mountain coves to college-town clubs and the stage of American Idol, Blind Boy Fuller and Doc Watson to Nina Simone and Superchunk, Step It Up and Go celebrates homegrown music just as essential to the state as barbecue and basketball. Spanning a century of history from the dawn of recorded music to the present, and with sidebars and photos that help reveal the many-splendored glory of North Carolina's sonic landscape, this is a must-read for every music lover.

Late Quaternary Vegetation History of the White Mountains Region, California, as Reconstructed from the Analysis of Packrat Middens

Pinch is a pack rat who does not want to give up the possessions that are cluttering his house, but when he finally is persuaded to sell them at a neighborhood tag sale, he discovers the beauty of recycling. Includes tips on "reducing, reusing, and recycling."

Understanding Information Retrieval Systems

A Celebration of America's Greatest Olympic Victory—the 1980 US-USSR Hockey Game! Forty years after the "Miracle on Ice" captivated the world, this book deeply examines the impact that singular event had on the people who played and coached in it and how that game changed the trajectory of American hockey. Seasoned journalist John Gilbert was there every step of the way, and thanks to his detailed recordkeeping, allows readers to reexamine the game against the Soviets, what made it the upset it was, why it still resonates today, and what it did to the lives of the players. From Mike Eruzione to

Jim Craig, Mark Johnson, Buzz Schneider, Jack O'Callahan, Herb Brooks, and many others, Gilbert covers all the key players and leaders and in doing so offers a deeper understanding of the emotions and the strategy, the hows and whys of the actual game, and the impact that moment had on their lives both in the immediate aftermath and today. Gilbert doesn't miss a beat in uncovering some never-before-told angles and helping expose the ripple effect the event helped create—and how the movie *Miracle* helped reinvigorate the story and inspire a new generation of players and fans. To explore the lead-up to one of the greatest moments in American sports and the impact on American morale in the aftermath of the *Miracle*, Gilbert dives deep into the archives. In doing so he offers a look at this moment unlike it's ever been done before and helps answer the question as to why it continues to capture our imaginations.

The #1 New York Times bestselling guide to decluttering your home and the inspiration for the hit Netflix show *Tidying Up with Marie Kondo*. Despite constant efforts to declutter your home, do papers still accumulate like snowdrifts and clothes pile up like a tangled mess of noodles? Japanese cleaning consultant Marie Kondo takes tidying to a whole new level, promising that if you properly simplify and organize your home once, you'll never have to do it again. Most methods advocate a room-by-room or little-by-little approach, which doom you to pick away at your piles of stuff forever. The KonMari Method, with its revolutionary category-by-category system, leads to lasting results. In fact, none of Kondo's clients have lapsed (and she still has a three-month waiting list). With detailed guidance for determining which items in your house "spark joy" (and which don't), this international bestseller featuring Tokyo's newest lifestyle phenomenon will help you clear your clutter and enjoy the unique magic of a tidy home—and the calm, motivated mindset it can inspire.

In order to be effective for their users, information retrieval (IR) systems should be adapted to the specific needs of particular environments. The huge and growing array of types of information retrieval systems in use today is on display in *Understanding Information Retrieval Systems: Management, Types, and Standards*, which addresses over 20 typ

Ecology Abstracts

The author recounts his descent into despair and his discovery of spiritual nourishment in the works of Aristotle, Emerson, Ben Franklin, and Plato, and enumerates the seventeen rules that helped transform his life. Og Mandino was one of the leading inspirational authors in the world. But once, he was a thirty-five-year-old derelict who nearly spent his last few dollars on a suicide gun. In *A Better Way to Live*, he describes the joyously redemptive process that turned a down-and-out alcoholic into a millionaire and a happy man within ten years. Og Mandino is the only person who could tell this heartwarming tale of personal triumph—because it is his own true story. And it can profoundly influence your life. Here are the principles that turned Og Mandino’s life around: his seventeen “Rules to Live By.” These simple, easy-to-follow rules comprise a sound, wise prescription for inner growth and for a fulfilling everyday life that will work for you—just as it worked for Og Mandino. You can avoid spending even one more day feeling failure, grief, poverty, shame, or self-pity. Here is a better way to live: a way that literally saved Og Mandino’s life, a way that can help make your dreams come true.

Step It Up and Go

Cinephemera

Over the past thirty years, late Quaternary environments in the arid interior of western North America have been revealed by a unique source of fossils: well-preserved fragments of plants and animals accumulated locally by packrats and quite often encased, amberlike, in large masses of crystallized urine. These packrat middens are ubiquitous in caves and rock crevices throughout the arid West, where they can lie preserved for tens of thousands of years. More than a thousand of these deposits have been dated and analyzed, and middens have supplanted pollen records as a touchstone for studying vegetation dynamics and climatic change in radiocarbon time (the last 40,000 years). Now, similar deposits made by other mammals like hyraxes are being reported from other parts of the world. This book brings together the most recent findings and views of many of the researchers now investigating fossil middens in the United States, Mexico, Africa, the Middle East, and Australia. The contributions serve to open a forum for methodological concerns, update the fossil record of various geographic regions, introduce new applications, and display the vast potential for fossil midden analysis in arid regions worldwide. The findings presented here will serve to foster regional research and to promote general studies devoted to global climate change. Included in the text are more than two hundred charts, photographs, and maps.
