This beloved book by E. B. White, author of *Stuart Little* and *The Trumpet of the Swan*, is a classic of children's literature that is "just about perfect." Illustrations in this ebook appear in vibrant full color on a full-color device and in rich black-and-

white on all other devices. Some Pig. Humble. Radiant. These are the words in Charlotte's Web, high up in Zuckerman's barn. Charlotte's spiderweb tells of her feelings for a little pig named Wilbur, who simply wants a friend. They also express the love of a girl named Fern, who saved Wilbur's life when he was born the runt of his litter. E. B. White's Newbery Honor Book is a tender novel of friendship, love, life, and death that will continue to be enjoyed by generations to come. It contains illustrations by Garth Williams, the acclaimed illustrator of E. B. White's Stuart Little and Laura Ingalls Wilder's Little House series, among many other books.

Gideon

Jazz Composition and Arranging In the Digital Age is a comprehensive and practical instructional book and reference guide on the art and craft of jazz composition and arranging for small and large ensembles. In this book, veteran composers and arrangers Richard Sussman and Michael Abene combine their extensive years of experience as musicians and instructors to demonstrate how advances in music technology and software may be integrated with traditional compositional concepts to form a new and more efficient paradigm for the creative process. This book builds on material and issues treated in traditional jazz composition and arranging courses, including all the fundamental musical techniques and information associated with jazz arranging and composition instruction. In addition, each chapter of the book also contains specific examples demonstrating the effective utilization of music software as applied to the realization of these techniques. Software is employed both as both a learning tool in the form of examples and exercises, and as a practical tool illustrating how many modern day composer/arrangers are utilizing these techniques successfully in the real world. The book also offers several chapters devoted exclusively to the creative use of music technology and software. The extensive companion website provides listening examples for each chapter as well as enhanced software tips, expanded and additional music examples, and appendices of , basic principles and an expanded recommended listening list for further study.

Quilted Devotions

Is it truth or fiction? Memoir or essay? Narrative or associative? To a writer like Michael Martone, questions like these are high praise. Martone's studied disregard of form and his unruffled embrace of the prospect that nothing--no story, no life--is ever quite finished have yielded some of today's most splendidly unconventional writing. Add to that an utter weakness for pop Americana and what Louise Erdrich has called a "deep affection for the ordinary," and you have one of the few writers who could pull off something like *Racing in Place*. Up the steps of the Washington Monument, down the home stretch at the Indy Speedway, and across the parking lot of the Moon Winx Lodge in Tuscaloosa, Alabama, Martone chases, and is chased by, memories--and memories of memories. He writes about his grandfather's job as a meter reader, those seventies-era hotels with atrium lobbies and open glass elevators, and the legendary temper of basketball coach Bob Knight. Martone, as Peter Turchi has said, looks "under stones the rest of us leave unturned." So, what is he really up to when he dwells on the make of Malcolm X's eyeglasses or the runner-up names for Snow White's seven dwarfs? In "My Mother Invents a Tradition," Martone tells how his mom, as the dean of girls at a brand-new high school in Fort Wayne, Indiana, "constructed a nostalgic past out of nothing." Sitting at their dining room table, she came up with everything from the school colors (orange and brown) to the yearbook title (*Bear Tracks*). Look, and then look again, Martone is saying. "You never know. I never know."

The Paper Craft Book

In this volume of 15 articles, contributors from a wide range of disciplines present their analyses of Disney movies and Disney music, which are mainstays of popular culture. The power of the Disney brand has heightened the need for academics to question whether Disney's films and music function as a tool of the Western elite that shapes the views of those less empowered. Given its global reach, how the Walt Disney Company handles the role of race, gender, and sexuality in social structural inequality merits serious reflection according to a number of the articles in the volume. On the other hand, other authors argue that Disney productions can help individuals cope with difficult situations or embrace progressive thinking. The different approaches to the assessment of Disney films as cultural artifacts also vary according to the theoretical perspectives guiding the interpretation of both overt and latent symbolic meaning in the movies. The authors of the 15 articles encourage readers to engage with the material, showcasing a variety of views about the good, the bad, and the best way forward.

The second book of Practical Studies is designed to logically extend the techniques already presented in the First Book and also to introduce and develop new techniques and rhythms that will offer a challenge to the intermediate student. Through the use of slightly more difficult and more extended studies, it is hoped that the material included in this book may more fully develop general musicianship and more feeling for style and interpretation and thus act as a foundation for solo literature.
