TV Guide

This is a general reference work on all aspects of intellectual property, including international treaties and conventions, analyses of all fields of intellectual property, its administration, enforcement and teaching, technological and legal developments, and WIPO's work in its Member States. It covers issues including electronic commerce, biotechnology, traditional knowledge and management of copyright and related rights and WIPO's vision and approaches to meet new

challenges with a widening circle of partners. Can be used as a key reference work by creators, innovators, intellectual property lawyers, government officials, university teachers and students.

Malaysia Handbook

A blended learning approach to automotive engineering at levels one to three. Produced alongside the ATT online learning resources, this textbook covers all the theory and technology sections that students need to learn in order to pass levels 1, 2 and 3 automotive courses. It is recommended by the Institute of the Motor Industry and is also ideal for exams run by other awarding bodies. Unlike the current textbooks on the market though, this title takes a blended learning approach, using interactive features that make learning more enjoyable as well as more effective. When linked with the ATT online resources it provides a comprehensive package that includes activities, video footage, assessments and further reading. Information and activities are set out in sequence so as to meet teacher and learner needs as well as qualification requirements. Tom Denton is the leading UK automotive author with a teaching career spanning lecturer to head of automotive engineering in a large college. His nine automotive textbooks published since 1995 are bestsellers and led to his authoring of the Automotive Technician Training multimedia system that is in common use in the UK, USA and several other countries.

The Canadian green consumer guide

58 of the Region's Best Trips! Whether you're a local looking for a long weekend escape, a visitor looking to explore or you simply need some ideas when family and friends come to visit, Lonely Planet's Trips series offers the best itineraries - and makes it easy to plan the perfect trip time and again. Theme icons make finding the perfect trip simple - no matter what your interest. Easy-to-use maps for every trip, plus driving times and directions. Explore the region with trips ranging from two days to three weeks, and day trips from Phoenix, Albuquerque and Santa Fe. Local experts share their favorite trip ideas, including a former director's tour of film locations, a geologist's rock-hunting expedition and an astronomer's stargazing tour. Iconic Trips chapter covers must-do trips across the region, from Motoring the Mother Road: Route 66 to A Green Chile Adventure. Tune in on the road with our regional music playlists. Family-friendly and pet-friendly listings throughout. Green index lists the region's most environmentally friendly options. Travel America with Lonely Planet. Since 1984 Lonely Planet USA has published over 100 guides to America, working with over 200 American travel writers. For this Trips series our authors drove more than 100,000 miles, visited 230 diners, stopped at 810 roadside attractions and rediscovered the country they love. George Monbiot's *Heat: How to Stop the Planet from Burning* marks an important moment in our civilization's thinking about global warming. The question is no longer whether climate change is actually happening. The question is what to do about it. Monbiot offers an ambitious and far-reaching program to cut our carbon dioxide emissions to the point where the environmental scales start tipping away from catastrophe. (But not before he devotes a chapter to unmasking the vested interests that have spent fortunes funding the specious science of the climate change deniers.) It now seems certain that we need a 90% cut in our emissions by 2030 to prevent runaway climate change from taking place. For the first time, this book explains how the cut could be achieved without bringing industrial civilisation to an end. Combining his unique knowledge of political campaigning and environmental science, Monbiot analyses the potential of energy efficiency, renewable resources, carbon burial, nuclear power and new transport and building systems to discover what works, what doesn't, what costs the least and what needs to be done to make change happen. He is not afraid to attack anyone — friend or foe — whose claims are false or whose figures have been fudged. His original, sometimes shocking programme shows that we can reconcile our demands for comfort and security with the survival of the biosphere. Rigorous, passionate and totally surprising, this book could change the world. It is possible to slow the momentum of this global crisis — if we act decisively. In this riveting, fiery book, the No Logo of the environmental movement, George Monbiot shows us how.

The publishers weekly

"In the past fifteen years, file sharing of digital cultural works between individuals has been at the center of a number of debates on the future of culture itself. To some, sharing constitutes piracy, to be fought against and eradicated. Others see it as unavoidable, and table proposals to compensate for its harmful effects. Meanwhile, little progress has been made towards addressing the real challenges facing culture in a digital world. Sharing starts from a radically different viewpoint, namely that the non-market sharing of digital works is both legitimate and useful. It supports this premise with empirical research, demonstrating that non-market sharing leads to more diversity in the attention given to various works. Taking stock of what we have learned about the cultural economy in recent years, Sharing sets out the conditions necessary for valuable cultural functions to remain sustainable in this context."--[P] 4 of cover.
