Journal of Policy Analysis and Management

Feminist Critical Policy Analysis II

This book addresses how to conduct policy analysis in the field of national security, including foreign policy and defense strategy. It is a philosophical and conceptual book for helping people think deeply, clearly, and insightfully about complex policy issues. This book reflects the viewpoint that the best policies normally come from efforts to synthesize competing camps by drawing upon the best of each of them and by combining them to forge a sensible whole. While this book is written to be reader-friendly, it aspires to in-depth scholarship.

Money and Inflation: Some Critical Issues

NBER Macroeconomics Annual 2003

Since the days of Adam Smith, ethics and economics have been closely intertwined, and were nominally separated only with the advent of neoclassical

economics in the beginning of the last century. This book features eleven essays by leading scholars in economics and philosophy who argue for a renewal of the bond between the two disciplines. Several of the contributors argue that the ethical content of economics and moral status of the market have been misunderstood, for better and for worse. Some recommend changes in the way that individual economic choice is modelled, in order to incorporate ethical as well as self-interested motivations. Finally, others question the way that societies assess economic policies that affect the welfare and dignity of their constituents. A wide range of philosophical perspectives is offered, drawing from the classic writings of Adam Smith, Immanuel Kant, and the ancient Stoics, to that of current scholars such as Amartya Sen, Elizabeth Anderson, and Christine Korsgaard. This book provides a comprehensive introduction to the cutting edge of interdisciplinary research between ethics and economics, and is sure to be an important resource for scholars in both fields. This book was published as a combination of the special issues *Review of Political Economy* and *Review of Social Economy*.

Beyond Policy Analysis

Nothing rings truer to those teaching political science research methods: students hate taking this course. Tackle the challenge and turn the standard research methods teaching model on its head with *Political Science Research in Practice*. Akan Malici and Elizabeth S. Smith engage students first with pressing political questions and then demonstrate how a researcher has gone about answering them, walking them through real political science research that contributors have conducted. Through the exemplary use of a comparative case study, field research, interviews, textual and interpretive research, statistical research, survey research, public policy and program evaluation, content analysis, and field experiments, each chapter introduces students to a method of empirical inquiry through a specific topic that will spark their interest and curiosity. Each chapter shows the process of developing a research question, how and why a particular method was used, and the rewards and challenges discovered along the way. Students can better appreciate why we need a science of politics—why methods matter—with these first-hand, issue-based discussions. The second edition now includes: Two completely new chapters on field experiments and a chapter on the textual/interpretative method. New topics, ranging from the Arab Spring to political torture to politically sensitive research in China to social networking and voter turnout. Revised and updated "Exercises and Discussion Questions" sections. Revised and updated "Interested to Know More" and "Recommended Resources" sections.

Energy Abstracts for Policy Analysis

Staff Paper

How to Write about Economics and Public Policy is designed to guide graduate students through conducting, and writing about, research on a wide range of topics in public policy and economics. This guidance is based upon the actual writing practices of professional researchers in these fields and it will appeal to

practitioners and students in disciplinary areas such as international economics, macroeconomics, development economics, public finance, policy studies, policy analysis, and public administration. Supported by real examples from professional and student writers, the book helps students understand what is expected of writers in their field and guides them through choosing a topic for research to writing each section of the paper. This book would be equally effective as a classroom text or a self-study resource. Teaches students how to write about qualitative and quantitative research in public policy and economics in a way that is suitable for academic consumption and that can drive public policy debates Uses the genre-based approach to writing to teach discipline-appropriate ways of framing problems, designing studies, and writing and structuring content Includes authentic examples written by students and international researchers from various sub-disciplines of economics and public policy Contains strategies and suggestions for textual analysis of research samples to give students an opportunity to practice key points explained in the book Is based on a comprehensive analysis of a research corpus containing 400+ research articles in various areas of public policy and economics

Proceedings of a Workshop on Capacity Building in Policy Analysis in Tanzania

Engendering Nepalese Civil Service with Specific Reference to Promotion and Entry in Administrative Services

Political Science Research in Practice

This manuscript consists of 16 research papers that were completed between the years 1982 and 2005, the analyses of which range from the purely theoretical, to the empirical, and extending to the more ideological and philosophical. In any case, the emphasis of each paper is upon creativity, with inventiveness and innovation being the essential elements. Part two of this manuscript consists of a purely theoretical paper. This paper presents a fresh approach to macroeconomic theory and policy. Part Three, consisting of empirically oriented projects, employs unique variable and model specifications in order to verify existing theories in economics. The first three papers, in this part, verifies the theories of bilateral monopoly and the employment effects of minimum wage legislation under conditions of competition, monopsony, and monopoly. The next paper examines Caribbean economic integration and verifies the principle of comparative advantage. The fifth paper, in this part, examines the relationship between market structure and rates of return. The sixth paper, in this part, deals with the gaming industry. The fourth part of this manuscript deals with the more ideological and philosophical aspects of economics and social science. The first two papers, in this part, tend to emphasize laissez faire capitalism. The third, and last, paper of this part, begins to break with this tendency, and, thus, serves as somewhat of an introduction to the fifth part of this manuscript. The fifth part of this manuscript is much more interdisciplinary in nature compared to the earlier parts and deals with class conflict and extends to conflict in general. The first paper presents the

primary class conflict model and five additional papers follow. The fifth paper, while an empirical undertaking, is included here because it is consistent with the general topic of this part of the manuscript.

A Practical Guide for Policy Analysis

Resources and Learning Tools in Environmental Economics

Annotated Bibliography on Utilization of System Simulation Models for Agricultural Policy Analysis

How to make firm-level surveys more consistent, yielding data more relevant to policy analysis.

Ethics and Economics

Issues in Teaching and Education Policy, Research, and Special Topics: 2012 Edition

In the Fifth Edition of *A Practical Guide for Policy Analysis: The Eightfold Path to More Effective Problem Solving*, Eugene Bardach and new co-author Eric Patashnik draw on more than 40 years of experience teaching students to be effective, accurate, and persuasive policy analysts. This bestselling handbook presents dozens of concrete tips, interesting case studies, and step-by-step strategies that are easily applicable for the budding analyst as well as the seasoned professional. In this new edition, Bardach and Patashnik update many examples to reflect the shifting landscape of policy issues. A new section with advice on how to undertake policy design in addition to making policy choices makes the book even more engaging. Readers will also appreciate a sample document of real world policy analysis, suggestions for developing creative, "out-of-the-box" solutions, and tips for working with clients.

ALPAN Newsletter No. 7 - May 1989

Issues in Teaching and Education Policy, Research, and Special Topics: 2012 Edition is a ScholarlyEditions™ eBook that delivers timely, authoritative, and comprehensive information about Teaching. The editors have built Issues in Teaching and Education Policy, Research, and Special Topics: 2012 Edition on the vast information databases of ScholarlyNews.™ You can expect the information about Teaching in this eBook to be deeper than what you can access anywhere else, as well as consistently reliable, authoritative, informed, and relevant. The content of Issues in Teaching and Education Policy, Research, and Special Topics: 2012 Edition has been produced by the world's leading scientists, engineers, analysts, research institutions, and companies. All of the content is from peer-reviewed sources, and all of it is written, assembled, and edited by the editors at ScholarlyEditions™ and available exclusively from us. You now have a source you

can cite with authority, confidence, and credibility. More information is available at <http://www.ScholarlyEditions.com/>.

Writing Effective Public Policy Papers

The Resources and Learning Tools in Environmental Economics gives students the tools and the support they need to get the most out of their course. Each chapter in this guide takes a current topic in environmental economics and breaks it down by: outline for review, supporting resources, practice problems and essay questions, case studies, research paper topics, related readings, related web sites, terms and definitions, and solutions to quantitative questions. Plus, each new copy of the Tools contains an access card for the powerful InfoTrac search tool.

The NBER Macroeconomics Annual presents pioneering work in macroeconomics by leading academic researchers to an audience of public policymakers and the academic community. Each commissioned paper is followed by comments and discussion. This year's edition provides a mix of cutting-edge research and policy analysis on such topics as productivity and information technology, the increase in wealth inequality, behavioral economics, and inflation.

Topics on Economics and Social Science

Arguments are developed concerning a number of topics including long-run monetary neutrality, superneutrality, the natural-rate hypothesis, the quantity theory of money, the equation of exchange, the Fisher equation, and purchasing power parity. These are basic, fundamental topics that all students of monetary economics refer to frequently, but there is evidently considerable disagreement concerning their exact nature. Some of the disagreement has likely been

generated by the recent practice by monetary economists of conducting monetary policy analysis in models that include no mention of any monetary variable such as M1 or the monetary base--thereby reflecting the actual policy practice of most central banks. It is argued that these models are consistent in most important ways with highly traditional monetary analysis. More generally, relationships among the various topics are developed and the validity of empirical tests (e.g., cointegration tests) relating to several of the topics are reconsidered.

Policy Analysis in National Security Affairs

Feminist Critical Policy Analysis: A perspective from post-secondary education

Analyses the data in health sciences and policy by introducing meta-analysis strategies while reviewing commonly used techniques. This text provides various chapters that build on principles, develop methodologies to solve statistical problems, and present concrete applications used by experienced medical practitioners and health policymakers.

This Note, reprinted from OR/MS Today, Vol. 15, December 1988, reviews the development of operations research and policy analysis at The RAND Corporation from 1968 to 1988. Rather than taking a chronological approach, the Note considers two related themes--reasons that RAND analysts took on more complex research projects than they did in the corporation's first two decades, and methodological innovations brought to bear on the problems. Finally, the Note describes the RAND Graduate School's interdisciplinary Ph. D. program in policy analysis.

Research Topics in Agricultural and Applied Economics

Program of the Annual Meeting - American Political Science Association

The aim of the Ebook series of Research Topics in Agricultural & Applied Economics (RTAAE) is to publish high quality economic researches applied to both the agricultural and non-agricultural sectors of the economy. The subject areas of this E-book series include, among others, supply and demand analysis, technical change and productivity, industrial organization, labor economics, growth and development, environmental economics, marketing, business economics and finance. By covering a broad variety of economic research topics, this Ebook series should prove to be of considerable interest to a.

Surveying Surveys and Questioning Questions

This text sets out to challenge the traditional power basis of the policy decision makers in education. It contests that others who have an equal right to be consulted and have their opinions known have been silenced, declared irrelevant, postponed and otherwise ignored. Policies have thus been formed and implemented without even a cursory feminist critical glance. The chapters in this text illustrate how to incorporate critical and feminist lenses and thus create policies to meet the lived realities, the needs, aspirations and values of women and girls. A particular focus is the primary and secondary sectors of education.

Long-run Monetary Neutrality and Contemporary Policy Analysis

This report evaluates the IMF's economic research activities and whether they contribute successfully to the objectives of the organisation. It considers five basic issues central to the research process which relate to: organisational structure, culture, incentives and accountability, resource allocation and dissemination. The report concludes that there is room for improvement, and makes a number of recommendations which include setting priorities for research activities, and improving incentives and accountability in the research process.
