Economical in both size and price, 40 Short Stories offers a well-chosen array of popular and significant stories, enhanced by unobtrusive but effective editorial features. This volume in Bedford/St. Martin's series of Portable Anthologies and Portable Guides

offers the series' trademark combination of high quality and great value for teachers of literature and composition and their cost-conscious students.

## **The Human Instinct**

From one of America's best-known biologists, a revolutionary new way of thinking about evolution that shows "why, in light of our origins, humans are still special" (Edward J. Larson, Pulitzer Prize-winning author of *Evolution*). Once we had a special place in the hierarchy of life on Earth—a place confirmed by the literature and traditions of every human tribe. But then the theory of evolution arrived to shake the tree of human understanding to its roots. To many of the most passionate advocates for Darwin's theory, we are just one species among multitudes, no more significant than any other. Even our minds are not our own, they tell us, but living machines programmed for nothing but survival and reproduction. In *The Human Instinct*, Brown University biologist Kenneth R. Miller "confronts both lay and professional misconceptions about evolution" (Publishers Weekly, starred review), showing that while evolution explains how our bodies and brains were shaped, that heritage does not limit or predetermine human behavior. In fact, Miller argues in this "highly recommended" (Forbes) work that it is only thanks to evolution that we have the power to shape our destiny. Equal parts natural science and philosophy, *The Human Instinct* makes an "absorbing, lucid, and engaging...case that it was evolution that gave us our humanity" (Ursula Goodenough, professor of biology at Washington

REALIDADES is a standards-based Spanish curriculum that balances grammar and communication. The program offers technology designed to integrate language and culture to teach and motivate all students.

## **Biology**

Glencoe Health is a comprehensive health program, provided in a flexible format, designed to improve health and wellness among high school students. Real-life application of health skills helps students apply what they learn in health class toward practicing good health behavior in the real world. Hands-on features

are integrated with technology, assessment, and up-to-date health content. Features Hands-on activities-based program focuses on health skills, avoiding risk behaviors, and promoting health literacy. Academic integration throughout the program includes research-based reading and writing strategies in every lesson, as well as Real-World Connections emphasizing math concepts and activities, and Standardized Test Practice focusing on Math and Reading/Writing. Fitness is emphasized through the program with the Fitness Zone. The Fitness Zone includes tips in the Student Edition for incorporating fitness into everyday life, activities in the Teacher Edition, a special section of the Online Learning Center, and a heart-rate activity workbook with CD-ROM. The latest technology includes videos, podcasts, activities for handheld devices, the online student edition, PowerPoint DVD, StudentWorks Plus, and TeacherWorks Plus. Includes: Print Student Edition

## **Miller Levine Biology 2019 Student Edition Grade 9/10**

With its distinctive investigative approach to learning, this best-selling laboratory manual encourages you to participate in the process of science and develop creative and critical reasoning skills. You are invited to pose hypotheses, make predictions, conduct open-ended experiments, collect data, and apply the results to new problems. The Seventh Edition emphasizes connections to recurring themes in biology, including structure and function, unity and diversity, and the overarching theme of evolution. Select tables from the lab manual are provided in Excel(R) format in MasteringBiology(R) at [www.masteringbiology.com](http://www.masteringbiology.com), allowing you to record data directly on their computer, process data using statistical tests, create graphs, and be prepared to communicate your results in class discussions or reports.

## **Biology**

From a leading authority on the evolution debates comes this critically acclaimed investigation into one of the most controversial topics of our times
