It is surprising that there is so little research on textbooks, given their centrality to teaching and learning in elementary and secondary schools. Textbooks have become a focus of political and cultural controversy, advocating a multicultural curriculum that has sparked some vigorous protests. Research is absent in this debate; therefore, questions of legitimate knowledge, the role of textbooks, textbook design, policy selection issues, and economic issues concerning the marketplace are not part of the current debate. Without insights of research on considerate text, mentioning, illustrations and so forth, the current controversy will result in publishers responding to demands for more content not less; thus, textbooks will become compendia of information that on the surface satisfy everyone. This volume demonstrates how research on important issues relative to textbook design can advance our knowledge about what makes textbooks effective learning tools, and thus inform policymakers, publishers, and those involved in textbook selection. Representing pure and applied approaches, researchers present papers on the quality of writing, the role of questions, the role of pictures and illustrations, and the role of auxiliary materials in the design of effective textbooks. The chapters provide insight into research and its application to textbook design and improvement -- stimulating others to

Drugs, murder, and the Catholic Church confound Homer's trip to Florence. When the Pope issues a sweeping edict calling for a yearlong war on drugs, no one is more surprised than the Vatican to find the campaign a success. In every Catholic corner of the world, young people throw down their needles to pick up crosses. In Florence, thousands of them converge on the Duomo to thank Christ for their newfound commitment to sobriety. Nearly everyone is relieved by this development -- save for Leonardo Bindo, banker and druglord. To get his business back on

track, he seizes upon a simple plan: Kill the Pope. Standing in his way is Homer Kelly, transcendentalist scholar and occasional detective. In Florence to teach at a new international university, Homer stumbles on Bindo's scheme while investigating the disappearance of a beautiful young student. His Italian may be lousy, but Homer is the only man who can save Italy from itself.

With rich content that captures children's

imagination and built-in reading and vocabulary instruction, your child will not only be learning, he'll be preparing for success while learning the responsibilities of citizenship at every grade level. Captivate your child with numerous colorful visuals and activities that will engage their interest in social studies. Connect, Experience, Understand Connecting is all about activating prior knowledge and jumpstarting your child's journey into social studies. Essential Questions help students see the "big ideas" they're learning about, and activate prior knowledge. They allow students to engage in an active discussion of what they already know about the topic, but also encourage them to think further. Scott Foresman Social Studies offers a variety of ways for your child to think critically about key concepts so they actively experience the world they live in. Developing true understanding means that students don't simply memorize facts, dates, and places. It means taking what they've learned and transferring that knowledge to new content, situations, ideas, and to their own lives. The goal is to help students become successful learners who will remember not only what they have learned, but how to learn more!
