Aristotle said 'you are what you repeatedly do'. Most of us have no idea that what we repeatedly do creates our lives, we think our future is shaped by big events, the decisions we make, the thoughts we have but, this book will show you that it is your daily actions that are the key. Over the last few decades neuroscientists and psychologists have discovered that there is more power in 'I do' than 'I think'. However, if an action is repeated enough times it becomes habit but habits lack thought, consideration and presence. To effect long-lasting meaningful change our actions need to be filled with a sense of

personal meaning and power – they need to be ritualized. Creating personal ritual in our lives allows us to bring the presence of the sacred into the everyday. The rituals in this book have been designed as symbolic acts providing a framework for anyone to use to create positive change in their lives. The 7 morning rituals are designed to help you 'wake with determination', the 7 afternoon rituals focus on 'living on purpose', and the 7 evening rituals are about 'retiring with satisfaction'.

"A brilliant book based on a brilliant and true concept." - TUCKER CARLSON Remember America? There may come a time when no one will. There will be no monuments to American heroes, no stories that

will praise them. The United States will have become a dark chapter in human history, best forgotten. In *Erasing America: Destroying Our Future by Erasing Our Past* (releasing August 21st), James Robbins reveals that the radical Left controls education, the media, and the Democratic party.... and they seek to demean, demolish, and relentlessly attack America's past in order to control America's present. This toxic movement has already brainwashed an entire generation and is rapidly changing the cultural, historical, and spiritual bonds of our nation. American exceptionalism, history, and patriotism are a magnificent legacy, Robbins warns, but to pass it on to our children, we must view the past with understanding, the present with gratitude, and the future with hope. Wondering if it's really that bad? Here are some facts you'll learn in *Erasing America*: At Yale, residential Calhoun College is being renamed after students complained about the pro-slavery sentiments of John C. Calhoun. In Massachusetts, Simmons College claims saying, "God bless you" is an "Islamophobic microaggression." In Virginia, school districts seek to ban *To Kill a Mockingbird* and *The Adventures of Huckleberry Finn* because parents complained about the racial slurs in the books. Across the country, Christmas songs and movies are labelled as racist and sexist - and banned. In California, a San Francisco school district wants to rename George Washington High School because our first president owned slaves. In Arkansas, a monument engraved with the Ten Commandments was smashed to smithereens by a protester in a Dodge Dart. And in parks and squares across the South, statues of confederate generals and soldiers are disappearing.

In this new collection of essays, Andrew Feenberg argues that conflicts over the design and organization of the technical systems that structure our society shape deep choices for the future. A pioneer in the philosophy of technology, Feenberg demonstrates the continuing vitality of the critical theory of the Frankfurt School. He calls into question the anti-technological stance commonly associated with its theoretical legacy and argues that technology contains potentialities that could be developed as the basis for an alternative form of modern society. Feenberg's critical reflections on the ideas of Jürgen Habermas, Herbert Marcuse, Jean-François Lyotard, and Kitaro Nishida shed new light on the philosophical study of technology and modernity. He contests the prevalent conception of technology as an unstoppable force responsive only to its own internal dynamic and politicizes the discussion of its social and cultural construction. This argument is substantiated in a series of compelling and well-grounded case studies. Through his exploration of science fiction and film,

AIDS research, the French experience with the "information superhighway," and the Japanese reception of Western values, he demonstrates how technology, when subjected to public pressure and debate, can incorporate ethical and aesthetic values.

"A noir writer richly deserving rediscovery."
—Publishers Weekly The book that gave birth to Italian noir . . . Milan, 1966: When Dr. Duca Lamberti is released from prison, he's lost his medical license and his options are few. But thanks to an old connection, he lands a job, although it's a tricky one: guarding the alcoholic son of a plastics millionaire. But Lamberti soon discovers that the young man has a terrible secret, rooted in the mysterious death of a beautiful woman on the gritty side of town. The fast cars, high fashion, and chic nightclubs of glitzy and swinging Milan conceal a dirty reality . . . This is no dolce vita. A Private Venus marks the beginning of Italian noir: Giorgio Scerbanenco pioneered a new type of novel that trained its gaze on the crime and desperation that roiled under prosperous Italian society in the 1960s. And at the heart of this book is Duca Lamberti, an unforgettable protagonist: obsessive, world-weary, unconventional in his methods, and trying hard not to make another fatal mistake. This first edition of this book was a broad study, drawing on a wide range of published research and historical evidence, of the enormous stock market boom that started around 1982 and picked up

incredible speed after 1995. Although it took as its specific starting point this ongoing boom, it placed it in the context of stock market booms generally, and it also made concrete suggestions regarding policy changes that should be initiated in response to this and other such booms. The book argued that the boom represents a speculative bubble, not grounded in sensible economic fundamentals. Part one of the book considered structural factors behind the boom. A list of twelve precipitating factors that appear to be its ultimate causes was given. Amplification mechanisms, naturally-occurring Ponzi processes, that enlarge the effects of these precipitating factors, were described. Part Two discussed cultural factors, the effects of the news media, and of "new era" economic thinking. Part Three discussed psychological factors, psychological anchors for the market and herd behavior. Part Four discussed attempts to rationalize exuberance: efficient markets theory and theories that investors are learning. Part Five presented policy options and actions that should be taken. The second edition, 2005, added an analysis of the real estate bubble as similar to the stock market bubble that preceded it, and warned that "Significant further rises in these markets could lead, eventually, to even more significant declines. The bad outcome could be that eventual declines would result in a substantial increase in the rate of personal bankruptcies, which could lead to a secondary string of bankruptcies of financial institutions as well. Another long-run consequence could be a decline in consumer and business confidence, and another, possibly worldwide, recession." Thus, the second edition of this book was among the first to warn of the
