A Guide for Using the Outsiders in the Classroom

Standardized tests demand Standard English, but secondary students (grades 6-12) come to school speaking a variety of dialects and languages, thus creating a conflict between students' language of nurture and the expectations of school. The

purpose of this text is twofold: to explain and illustrate how language varieties function in the classroom and in students' lives and to detail linguistically informed instructional strategies. Through anecdotes from the classroom, lesson plans, and accessible narrative, it introduces theory and clearly builds the bridge to daily classroom practices that respect students' language varieties and use those varieties as strengths upon which secondary English teachers can build. The book explains how to teach about language variations and ideologies in the classroom; uses typically taught texts as models for exploring how power, society, and identity interact with language, literature, and students' lives; connects the Common Core State Standards to the concepts presented; and offers strategies to teach the sense and structure of Standard English and other language variations, so that all students may add Standard English to their linguistic toolboxes.

The Outsiders

Reclaiming English Language Arts Methods Courses showcases innovative work in teacher education that fosters teachers' capacities as reflective practitioners and public intellectuals; extends traditional boundaries of methods courses on teaching the English language arts, literacy, children's and young adult literature; and embodies democratic and critical politics that go beyond the reductive economic aims and traditional classroom practices sanctioned by educational policies and corporate educational reforms. Featuring leading and emerging scholars in English language arts teacher education, each chapter provides rich and concrete examples of elementary and secondary methods courses rooted in contemporary research and theory, on-line resources, and honest appraisals of the possibilities, tensions, and limits of doing teacher education differently in a top-down time of standards-based education, high-stakes testing, teacher assessment, and neoliberal education reforms. This book offers important resources and support for teacher educators and graduate students to explore alternative visions for aligning university methods courses with current trends in English and cultural studies, critical sociocultural literacy, new literacies and web 2.0 tools, and teaching the English language arts in multiethnic, multilingual, and underserved urban communities.

A Novel Approach

Easy-to-implement classroom lessons from the world's premier educational system. Finland shocked the world when its fifteen-year-olds scored highest on the first Programme for International Student Assessment (PISA), a set of tests touted

for evaluating critical-thinking skills in math, science, and reading. That was in 2001; but even today, this tiny Nordic nation continues to amaze. How does Finnish education—with short school days, light homework loads, and little standardized testing—produce students who match the PISA scores of high-powered, stressed-out kids in Asia? When Timothy D. Walker started teaching fifth graders at a Helsinki public school, he began a search for the secrets behind the successes of Finland's schools. Walker wrote about several of those discoveries, and his Atlantic articles on this subject became hot topics of conversation. Here, he gathers all he learned and reveals how any teacher can implement many of Finland's best practices. Remarkably, Finland is prioritizing the joy of learning in its newest core curricula and Walker carefully highlights specific strategies that support joyful K-12 classrooms and integrate seamlessly with educational standards in the United States. From incorporating brain breaks to offering a peaceful learning environment, this book pulls back the curtain on the joyful teaching practices of the world's most lauded school system. His message is simple but profound: these Finland-inspired strategies can be used in the U.S. and other countries. No educator—or parent of a school-aged child—will want to miss out on the message of joy and change conveyed in this book.

The Tiger Rising

“An intense snapshot of the chain reaction caused by pulling a trigger.” —Booklist (starred review) “Astonishing.” —Kirkus Reviews (starred review) “A tour de force.” —Publishers Weekly (starred review) A Newbery Honor Book A Coretta Scott King Honor Book A Printz Honor Book A Los Angeles Times Book Prize Winner for Young Adult Literature Longlisted for the National Book Award for Young People's Literature Winner of the Walter Dean Myers Award An Edgar Award Winner for Best Young Adult Fiction Parents' Choice Gold Award Winner An Entertainment Weekly Best YA Book of 2017 A Vulture Best YA Book of 2017 A BuzzFeed Best YA Book of 2017 An ode to Put the Damn Guns Down, this is New York Times bestselling author Jason Reynolds's electrifying novel that takes place in sixty potent seconds—the time it takes a kid to decide whether or not he's going to murder the guy who killed his brother. A cannon. A strap. A piece. A biscuit. A burner. A heater. A chopper. A gat. A hammer A tool for RULE Or, you can call it a gun. That's what fifteen-year-old Will has shoved in the back waistband of his jeans. See, his brother Shawn was just murdered. And Will knows the rules. No crying. No snitching. Revenge. That's where Will's now heading, with that gun shoved in the back waistband of his jeans, the gun that was his brother's gun. He gets on the elevator, seventh floor, stoked. He knows who he's after. Or does he? As the elevator stops on the sixth floor, on comes Buck. Buck, Will finds out, is who gave Shawn the gun before Will took the gun. Buck tells Will to check that the gun is even loaded. And that's when Will sees that one bullet is missing. And the only one who could have fired Shawn's gun was Shawn. Huh. Will didn't know that Shawn had ever actually USED his gun. Bigger huh. BUCK IS DEAD. But Buck's in the elevator? Just as Will's trying to think this through, the door to the next floor opens. A teenage girl gets on, waves away the smoke from Dead Buck's cigarette. Will doesn't know her, but she knew him. Knew. When they were eight. And stray bullets had cut through the playground, and Will had tried to cover her, but she was hit anyway, and so what she wants to know, on that fifth floor elevator stop, is, what if Will, Will with the gun shoved in the back waistband of his jeans, MISSES. And so it goes, the whole

long way down, as the elevator stops on each floor, and at each stop someone connected to his brother gets on to give Will a piece to a bigger story than the one he thinks he knows. A story that might never know an END...if Will gets off that elevator. Told in short, fierce staccato narrative verse, Long Way Down is a fast and furious, dazzlingly brilliant look at teenage gun violence, as could only be told by Jason Reynolds.

Mapping Comprehensive Units to the ELA Common Core Standards, 6-12

Action research, explored in this book, is a seven-step process for improving teaching and learning in classrooms at all levels. Through practical examples, research tools, and easy-to-follow "implementation strategies," Richard Sagor guides readers through the process from start to finish. Learn how to uncover and use the data that already exist in your classrooms and schools to answer significant questions about your individual or collective concerns and interests. Sagor covers each step in the action research process in detail: selecting a focus, clarifying theories, identifying research questions, collecting data, analyzing data, reporting results, and taking informed action. Drawing from the experience of individual teachers, faculties, and school districts, Sagor describes how action research can enhance teachers' professional standing and efficacy while helping them succeed in settings characterized by increasingly diverse student populations and an emphasis on standards-based reform. The book also demonstrates how

administrators and policymakers can use action research to bolster efforts related to accreditation, teacher supervision, and job-embedded staff development. Part how-to guide, part inspirational treatise, *Guiding School Improvement with Action Research* provides advice, information, and encouragement to anyone interested in reinventing schools as learning communities and restructuring teaching as the true profession it was meant to be.

The Giver

In the 2010 article "Building a Better Teacher" the article that "launched" *Teach Like a Champion*, journalist Elizabeth Green compared two schools of thought—one that teaching skills were the most important driver of classroom learning, the other that content knowledge was the true driver. Some readers saw a conflict between these two perspectives. The authors of *Reading Reconsidered* have always thought that the answer was more complex: that technique was irreplaceable and helped teachers maximize the application of their subject knowledge but there was also no substitute for content knowledge. Moreover, they believed, there were in fact techniques specific to each of the content areas that drive results and could be delineated and learned like the general techniques in *Teach Like a Champion*. *Reading Reconsidered* is the authors' first effort to take on the challenge of defining subject specific methods. It is an anxious time for many teachers but also a time of great opportunity. This book will provide a road map from confusion to success.
