### The Lost Tribes

Stem cells have generated a lot of excitement among the researchers, clinicians and the public alike. Various types of stem cells are being evaluated for their regenerative potential. Marginal benefit resulting by transplanting autologous stem cells (deemed to be absolutely safe) in various clinical conditions has been

proposed to be a growth factor effect rather than true regeneration. In contrast, various pre-clinical studies have been undertaken, using differentiated cells from embryonic stem cells or induced pluripotent stem cells have shown promise, functional improvement and no signs of teratoma formation. The scientists are not in a rush to reach the clinic but a handful of clinical studies have shown promise. This book is a collection of studies/reviews, beginning with an introduction to the pluripotent stem cells and covering various aspects like derivation, differentiation, ethics, etc., and hence would provide insight into the recent standing on the pluripotent stem cells biology. The chapters have been categorized into three sections, covering subjects ranging from the generation of pluripotent stem cells and various means of their derivation from embryonic as well as adult tissues, the mechanistic understanding of pluripotency and narrating the potential therapeutic implications of these in vitro generated cells in various diseases, in addition to the associated pros and cons in the same.

### **The Crucible**

In the middle 1960s a Black astrophysics student discovers how to control gravity but tells no one. Instead, he gathers a small group of his friends together in secret, they build a space craft, travel to the back side of the moon, the side that never shows toward earth, and build an underground colony well before Neil Armstrong shows up. Over the next forty years they secretly bring 2000 additional African

Americans to the moon and develop a Utopian society with advanced science and medicine; they are healthier and live longer than their cousins on earth. Discovery's story begins in 2001, and tells of the circumstances that lead the United States of America to discover that these African Americans have been living on the moon for nearly half a century, and what happens in this country as a result.

Scorch is a good leader and strong Alpha. He will not hurt anyone. When a beautiful red-head ends up in his care, he cannot turn away from the attraction she inspires. ### **The Dark Side: Books 3 And 4**

Winner of the 2016 Baillie Gifford Prize for Nonfiction A profound and profoundly important book--a moving personal detective story, an uncovering of secret pasts, and a book that explores the creation and development of world-changing legal concepts that came about as a result of the unprecedented atrocities of Hitler's Third Reich. East West Street looks at the personal and intellectual evolution of the two men who simultaneously originated the ideas of "genocide" and "crimes

against humanity," both of whom, not knowing the other, studied at the same university with the same professors, in a city little known today that was a major cultural center of Europe, "the little Paris of Ukraine," a city variously called Lemberg, Lwów, Lvov, or Lviv. It is also a spellbinding family memoir, as the author traces the mysterious story of his grandfather, as he maneuvered through Europe in the face of Nazi atrocities. *East West Street* is a book that changes the way we look at the world, at our understanding of history and how civilization has tried to cope with mass murder.

This second collection of outstanding shortlisted contributions from the Critical Management Studies (CMS) Interest Group of the Academy of Management (AOM) 'Dark Side' case-writing competition continues to go where other business case studies fear to tread. There are very many case studies of business best practice when engaging with social, environmental and ethical issues. But when educators look for resources to illustrate to students the more typical examples of bad - let alone scandalous - practices of some firms, the cupboard is almost entirely bare. And yet there is a critical need for business educators to expose students and managers to such issues to understand the different multifaceted phenomena of our late capitalist era; to support critical, reflective moral development; and to reflect and understand the complexities of organizational life. To argue that such cases deal with the bad apples in an otherwise functioning system misses the point. Whether focusing on the phone-hacking scandals at national newspapers, the influence of big pharma companies on clinical trials, the Bhopal tragedy or the use of child labour in the garment industry, the problems discussed are of major importance and in many cases have been demonstrated to be common practice for particular companies. Good news they are not, but all are stimulating and present students with dilemmas and decisions to make in a myriad of ways. Each of these 14 selected cases from 2009-2012 has been thoroughly documented, peer-reviewed and edited. They cover four continents (Asia, the Americas, Europe, and Oceania) and both business and public organizations. The industries covered range from extractive industries, the energy industry, consumer products, pulp and

paper, movies, media, municipal affairs, academia, banking, and the drug industry. The book is split into three sections: 'Community and Environment'; 'Human Rights and Business'; and 'Ethics and Policy'. As with the previous volume, these cases are all supported by teaching guidance and comprehensive teaching notes available free of charge to faculty.

This third collection of outstanding contributions from the Critical Management Studies (CMS) Division of the Academy of Management (AOM) continues to challenge business practice in ways not tackled by other more typical business case studies. There is a critical need for business educators to expose students and managers to the multifaceted phenomena of doing business in the twenty-first century; to support critical, reflective moral development; and to reflect and understand the complexities of organizational life. Is the system broken? Is there need for more systemic change? The cases explore a number of critical issues at some of the largest industries and companies in the world, including wealth creation and human rights in mining, the CSR approaches at Coca-Cola, the palm oil industry, and the supply chain at Apple Inc. Online Teaching Notes to accompany each chapter are available on request with the purchase of the book.

### **Trials of Death**

Over the last twenty-five years, medicine and consumerism have been on an unchecked collision course, but, until now, the fallout from their impact has yet to be fully uncovered. A writer for *The New Yorker* and *The Atlantic Monthly*, Carl Elliott ventures into the uncharted dark side of medicine, shining a light on the series of social and legislative changes that have sacrificed old-style doctoring to the values of consumer capitalism. Along the way, he introduces us to the often shifty characters who work the production line in Big Pharma: from the professional

guinea pigs who test-pilot new drugs and the ghostwriters who pen “scientific” articles for drug manufacturers to the PR specialists who manufacture “news” bulletins. We meet the drug reps who will do practically anything to make quota in an ever-expanding arms race of pharmaceutical gift-giving; the “thought leaders” who travel the world to enlighten the medical community about the wonders of the latest release; even, finally, the ethicists who oversee all that commercialized medicine has to offer from their pharma-funded perches. Taking the pulse of the medical community today, Elliott discovers the culture of deception that has become so institutionalized many people do not even see it as a problem. Head-turning stories and a rogue’s gallery of colorful characters become his springboard for exploring larger ethical issues surrounding money. Are there certain things that should not be bought and sold? In what ways do the ethics of business clash with the ethics of medical care? And what is wrong with medical consumerism anyway? Elliott asks all these questions and more as he examines the underbelly of medicine.

### **The Dark Side Sourcebook**

Born into a Jewish ghetto in Hungary, as a child, Elie Wiesel was sent to the Nazi concentration camps at Auschwitz and Buchenwald. This is his account of that atrocity: the ever-increasing horrors he endured, the loss of his family and his struggle to survive in a world that stripped him of humanity, dignity and faith. Describing in simple terms the tragic murder of a people from a survivor's perspective, *Night* is among the most personal, intimate and poignant of all accounts of the Holocaust. A compelling consideration of the darkest side of human nature and the enduring power of hope, it remains one of the most important works of the twentieth century. New translation by Marion Wiesel, with a new introduction by Elie Wiesel.

wildly different monsters, who all used to be best friends, but now sort of hate each other and compete over absolutely everything, including me. Life would be easier if I wasn't already attached to those four monsters, but they occasionally let their guard down around me, and I get a glimpse of what has to stay hidden under all those snowball layers, since they already rolled downhill a long time ago. I'm tired of losing people I care about. I'm tired of searching aimlessly for answers. I'm tired of not having the right questions to ask. I'm really tired of feeling like my vagina is cursed, but that's obviously lower on the list of priorities. But in my vagina's defense, it may not do tricks, but I keep it pretty. It shouldn't keep scaring men/monsters off so easily, and it's honestly starting to make me feel a little insecure. Anyway, I'm finally closer than ever to having all the answers. A stunning investigation of the roots of the first moon landing forty years ago. This illuminating story of the dawn of the space age reaches back to the reactionary modernism of the Third Reich, using the life of “rocket scientist” Wernher von Braun as its narrative path through the crumbling of Weimar Germany and the rise of the Nazi regime. Von Braun, a blinkered opportunist who could apply only tunnel vision to his meteoric career, stands as an archetype of myriad twentieth century technologists who thrived under regimes of military secrecy and unlimited money. His seamless transformation from developer of the deadly V-2 ballistic missile for Hitler to an American celebrity as the supposed genius behind the golden years of the U.S. space program in the 1950s and 1960s raises haunting questions about the culture of the Cold War, the shared values of technology in totalitarian and democratic societies, and the imperatives of material progress.

Goal #12: Call dibs on my favorite color. Goal #13: Find out if my siblings or my father killed me and my boys\*\*\*\* One ApocalypseThe life goals have stacked up since I started this journey as a sad, lonely little ghost. I'm not sure how things escalated so quickly from trying to be seen and heard, to bearing the weight of the world on my vain little shoulders. As a result, my goals have gotten a little more serious. Goal #14: Learn to take a hit without breaking or suffering some type of death. Goal #15: Decide once and for all if I'm going to save or destroy the world. I'm not sure why people put this sort of responsibility on hell-spawn like me. Goal #16: Practice my evil laugh, because all hell-spawn need a good evil laugh. Goal #17: Find and kill all the unicorns. Mwahahahaha. Goal #18: Live to enjoy forever with the guys I sacrificed all my memories to save. Goal #19: No matter what, they don't get to die. Or I really will be THE Apocalypse. We're the most screwed up collection of antiheroes the world has ever seen, because the only thing that makes me want to save the world is knowing I could lose my boys forever if I don't. It's one HELL of a love story, you know? \*\*Sexual Content. \*\*Language Warning. \*\*Dark humor. \*\*Reverse Harem. \*\*Series FINALE. The classic collaboration from the internationally bestselling authors Neil Gaiman and Terry Pratchett, soon to be an original series starring Michael Sheen and David Tennant. "Good Omens . . . is something like what would have happened if Thomas Pynchon, Tom Robbins and Don DeLillo had collaborated. Lots of literary inventiveness in the plotting and chunks of very good writing and characterization. It's a wow. It would make one hell of a movie. Or a heavenly one. Take your pick."—Washington Post According to The Nice and Accurate Prophecies of Agnes Nutter, Witch (the world's only completely accurate book of prophecies, written in 1655, before she exploded), the world will end on a Saturday. And someone seems to have misplaced the Antichrist . . .

## **East West Street**

Percy is confused. When he awoke after his long sleep, he didn't know much more than his name. His brain-fuzz is lingering, even after the wolf Lupa told him he is a demigod and trained him to fight.
