BONUS: This edition contains an A Mighty Long Way discussion guide. When fourteen-year-old Carlotta Walls walked up the stairs of Little Rock Central High School on September 25, 1957, she and eight other black students only wanted to make it to class. But the journey of the “Little Rock Nine,” as they came to be known, would lead the nation on an even longer and much more turbulent path, one that would challenge prevailing attitudes, break down barriers, and forever change the landscape of America. For Carlotta and the eight other children, simply getting through the door of this admired academic institution involved angry mobs, racist elected officials, and intervention by President Dwight D. Eisenhower, who was forced to send in the 101st Airborne to escort the Nine into the building. But entry was simply the first of many trials. Breaking her silence at last and sharing her story for the first time, Carlotta Walls has written an engrossing memoir that is a testament not only to the power of a single person to make a difference but also to the sacrifices made by families and communities that found themselves a part of history.

The term "mysticism" has never been consistently defined or employed, either in religious traditions or in academic discourse. The essays in this volume

offer ways of defining what mysticism is, as well as methods for grappling with its complexity in a classroom. This volume addresses the diverse literature surrounding mysticism in four interrelated parts. The first part includes essays on the tradition and context of mysticism, devoted to drawing out and examining the mystical element in many religious traditions. The second part engages traditions and religio-cultural strands in which "mysticism" is linked to other terms, such as shamanism, esotericism, and Gnosticism. The volume's third part focuses on methodological strategies for defining "mysticism," with respect to varying social spaces. The final essays show how contemporary social issues and movements have impacted the meaning, study, and pedagogy of mysticism. Teaching Mysticism presents pedagogical reflections on how best to communicate mysticism from a variety of institutional spaces. It surveys the broad range of meanings of mysticism, its utilization in the traditions, the theories and methods that have been used to understand it, and provides critical insight into the resulting controversies.

Hold the Flag High

In July 1863, a significant battle in the Civil War was fought. Sergeant William H. Carney, an officer of the newly formed Massachusetts Fifty-fourth Regiment -- comprised entirely of African Americans -- led his soldiers over the ramparts of Fort Wagner, where Union soldiers charged the Confederates. As the

soldiers fought, they gained strength from the stars and stripes of the American flag, Old Glory. It was Carney's vow to never let Old Glory touch the ground, and despite several gunshot wounds, he was able to rescue the flag from the fallen bearer. Carney held the flag high as a symbol that his regiment would never submit to the Confederacy. The battle of Fort Wagner decimated the Fifty-fourth Regiment, but Carney's heroism that night inspired all who survived. Catherine Clinton's historically precise text paired with Shane Evans's rich illustrations creates a remarkable account of one of the most memorable battles in Civil War history.

The field of communication was founded, in part, because of a need to make people better communicators. That meant teaching them how to communicate more effectively, whether it be in public settings or in private. Most of that teaching has happened within the classroom and many professionals have spent their lives instructing others on various aspects of communication. Inside this second edition, the editors have assembled a fully comprehensive and contemporary discussion of topics and issues concerning the teaching of communication. The chapters contained herein--contributed by key voices throughout the communication discipline--address conceptual as well as practical issues related to communication instruction. The contents of this new edition reflect

Where To Download Unit 2 Week 5 Study Guide The Teachers Guide

the dramatic changes that have occurred in communication education since the publication of the first edition in 1990. This book focuses initially on the goals of communication education, then delves into the preparation of specific communication courses. It includes assistance for instructors in organizing instructional content and discusses the use of instructional strategies and tools, as well as offering ideas on evaluating the processes and products of instruction. The volume also covers unique teaching assignments that may be encountered, from the basic course to continuing education, and addresses 2-year college teaching, directing forensic programs, distance education, and consulting. It concludes with important professional issues faced by both new and experienced communication instructors, including ethics and political issues within classrooms and departments. This volume is a necessity for anyone starting out a career as a communication instructor. Veteran educators--who know that learning to teach is a continual growth experience--will find useful and invaluable information within the book's pages. Whatever background and level of experience, all communication educators will find this new edition to be an essential resource for their work.

The study reported in this volume grew out of some theoretical work, one phase of which bore specifically on the behavior of individuals in social movements that made specific (and unfulfilled) prophecies. We had been forced to depend chiefly on historical

records to judge the adequacy of our theoretical ideas until we by chance discovered the social movement that we report in this book. At the time we learned of it, the movement was in mid-career but the prophecy about which it was centered had not yet been disconfirmed. We were understandably eager to undertake a study that could test our theoretical ideas under natural conditions. That we were able to do this study was in great measure due to the support obtained through the Laboratory for Research in Social Relations of the University of Minnesota. This study is a project of the Laboratory and was carried out while we were all members of its staff. We should also like to acknowledge the help we received through a grant-in-aid from the Ford Foundation to one of the authors, a grant that made preliminary exploration of the field situation possible.
